Dear Students and Families,

Welcome to **California Go Math!**, Grade 2! In this exciting mathematics program, there are hands-on activities to do and real-world problems to solve. Best of all, you will write your ideas and answers right in your book. In **California Go Math!**, writing and drawing on the pages helps you think deeply about what you are learning, and you will really understand math!

By the way, all of the pages in your **California Go Math!** book are made using recycled paper. We wanted you to know that you can Go Green with **California Go Math!**

Sincerely,

The Authors

Chapter 1 Overview

In this chapter, you will explore and discover answers to the following **Essential Questions**:

- How do you use place value to find the values of numbers and describe numbers in different ways?
- How do you know the value of a digit?
- What are some different ways to show a number?
- How do you count by 1s, 5s, 10s, and 100s?

Chapter 2 Overview

In this chapter, you will explore and discover answers to the following **Essential Questions**:

- How can you use place value to model, write, and compare 3-digit numbers?
- How can you use blocks to show a 3-digit number?
- How can you write a 3-digit number in different ways?
- How can place value help you compare 3-digit numbers?

Whales

by John Hudson

Some scientists study whales. Different kinds of whales swim along the west coast of the United States of America.
A scientist sees 8 blue whales.
Blue whales are the largest animals on Earth.

The scientist also sees 13 humpback whales.

Humpback whales sing underwater.

Did the scientist see more humpback whales or

more blue whales? more _____ whales

Whales also swim along the east coast of Canada and the United States of America. Pilot whales swim behind a leader, or a *pilot*. A scientist sees a group of 29 pilot whales.

Fin whales are fast swimmers. They are the second-largest whales in the world. A scientist sees a group of 27 fin whales. How many tens are in the number 27?

_____ tens

North America

Humpback whales swim to the warm water near Mexico for the winter. Humpback whales may have as many as 35 throat grooves.

In the number 35, the _____ is in the ones place and the _____ is in the tens place.

Name _____

Write About the Story

Look at the pictures. Draw and write your own story. Compare two numbers in your story.

Vocabulary Review

more	fewer
tens	greater than
ones	less than

WRITE Math

The Size of Numbers

The table shows how many young whales were seen by scientists.

Young Whales Seen

Whale	Number of Whales
Humpback	34
Blue	13
Fin	27
Pilot	43

1. Which number of whales has a 4 in the tens place?

2. How many tens and ones describe the number of young blue whales seen?

_____ ten _____ ones

3. Compare the number of young humpback whales and the number of young pilot whales seen. Write $>$ or $<$.

34 \bigcirc 43

4. Compare the number of young fin whales and the number of young blue whales seen. Write $>$ or $<$.

27 \bigcirc 13

Write a story about a scientist watching sea animals. Use some 2-digit numbers in your story.

Number Concepts

At a farmers' market, many different fruits and vegetables are sold.

If there are 2 groups of 10 watermelons on a table, how many watermelons are there?

Name _____

Show What You Know

Model Numbers to 20

Write the number that tells how many.

Use a Hundred Chart to Count

Use the hundred chart.

3. Count from 36 to 47. Which of the numbers below will you say? Circle them.

42 31 48 39 37

1	2	3	4	5	6	7	8	9	10

16. 18

even odd

17. **MATHEMATICAL PRACTICE 3** **Make Arguments**

Which two numbers in the box are even numbers?

_____ and _____

Explain how you know that they are even numbers.

Problem Solving • Applications

WRITE

Math

18. **THINK SMARTER** Fill in the blanks to describe the groups of numbers. Write **even** or **odd**.

_____ numbers

_____ numbers

Write each of these numbers inside the correct loop.

5

6

10

11

24

25

19. **THINK SMARTER** Does each ten frame show an even number? Choose Yes or No.

☐ Yes

☐ No

☐ Yes

☐ No

TAKE HOME ACTIVITY • Have your child show you a number, such as 9, using small objects and explain why the number is even or odd.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Algebra • Represent Even Numbers**Essential Question** Why can an even number be shown as the sum of two equal addends?

Operations and Algebraic Thinking—2.OA.3

MATHEMATICAL PRACTICES
MP.7, MP.8**Listen and Draw**

Make pairs with your cubes. Draw to show the cubes. Then write the numbers you say as you count to find the number of cubes.

_____ cubes

FOR THE TEACHER • Give each small group of children a set of 10 to 15 connecting cubes. After children group their cubes into pairs, have them draw a picture of their cubes and write their counting sequence for finding the total number of cubes.

Math Talk**Mathematical Practices**

Do you have an odd number or even number of cubes? **Explain.**

Model and Draw

An even number of cubes can be shown as two equal groups.

You can match each cube in the first group with a cube in the second group.

$$6 = 3 + 3$$

$$10 = 5 + 5$$

Share and Show

How many cubes are there in all? Complete the addition sentence to show the equal groups.

1. $\underline{\quad} = \underline{\quad} + \underline{\quad}$

2. $\underline{\quad} = \underline{\quad} + \underline{\quad}$

3. $\underline{\quad} = \underline{\quad} + \underline{\quad}$

4. $\underline{\quad} = \underline{\quad} + \underline{\quad}$

Name _____

On Your Own

Shade in the frames to show two equal groups for each number. Complete the addition sentence to show the groups.

5. 10

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

6. 16

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

7. 20

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

8. 18

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

THINK SMARTER

The number 7 is an odd number. Marc showed 7 with this addition sentence. Use Marc's way to show these odd numbers with addition sentences.

$$7 = 3 + 3 + 1$$

9. $5 = \underline{\quad} + \underline{\quad} + \underline{\quad}$

10. $11 = \underline{\quad} + \underline{\quad} + \underline{\quad}$

11. $9 = \underline{\quad} + \underline{\quad} + \underline{\quad}$

12. $13 = \underline{\quad} + \underline{\quad} + \underline{\quad}$

Problem Solving • Applications

Solve. Write or draw to explain.

13. **MATHEMATICAL PRACTICE 2** Use Reasoning

Jacob and Lucas each have the same number of shells. Together they have 16 shells. How many shells do Jacob and Lucas each have?

Jacob: _____ shells

Lucas: _____ shells

Personal Math Trainer

14. **THINK SMARTER +** Choose an even number between 10 and 19. Draw a picture and then write a sentence to explain why it is an even number.

TAKE HOME ACTIVITY • Have your child explain what he or she learned in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Understand Place Value**Essential Question** How do you know the value of a digit?**Number and Operations
in Base Ten—2.NBT.3****MATHEMATICAL PRACTICES**
MP.6, MP.7**Listen and Draw**

Write the numbers. Then choose a way to show the numbers.

Tens	Ones

Tens	Ones

**FOR THE TEACHER** • Read the following problem. Have children write the numbers and describe how they chose to represent them. Gabriel collects baseball cards. The number of cards that he has is written with a 2 and a 5. How many cards might he have?**Math
Talk****Mathematical Practices****Explain** why the value of 5 is different in the two numbers.

Model and Draw

0, 1, 2, 3, 4, 5, 6, 7, 8, and 9 are **digits**.
In a 2-digit number, you know the value of a digit by its place.

64

Tens	Ones
6	4

6 tens 4 ones

The digit **6** is in the tens place. It tells you there are 6 tens, or 60.

The digit **4** is in the ones place. It tells you there are 4 ones, or 4.

Share and Show

Circle the value of the red digit.

1. 26

On Your Own

Circle the value of the red digit.

16. **THINK SMARTER** Look at the digits of the numbers.
Draw quick pictures for the missing blocks.

47

52

Problem Solving • Applications

Write the 2-digit number that matches the clues.

- 17.** My number has 8 tens.
The digit in the ones place is greater than the digit in the tens place.
- My number is** _____.

- 18.** In my number, the digit in the ones place is double the digit in the tens place.
The sum of the digits is 3.
- My number is** _____.

19. **MATHEMATICAL PRACTICE** **1** **Make Sense of Problems**

In my number, both digits are even numbers.
The digit in the tens place is less than the digit in the ones place.
The sum of the digits is 6.

My number is _____.

- 20.** **THINK SMARTER** What is the value of the digit 4 in the number 43?

TAKE HOME ACTIVITY • Write the number 56. Have your child tell you which digit is in the tens place, which digit is in the ones place, and the value of each digit.

PROBLEM SOLVING

Lesson 1.7

Problem Solving • Tens and Ones

Essential Question How does finding a pattern help you find all the ways to show a number with tens and ones?

Number and Operations in Base Ten—2.NBT.3

MATHEMATICAL PRACTICES
MP.1, MP.4, MP.7

Gail needs to buy 32 pencils. She can buy single pencils or boxes of 10 pencils. What are all of the different ways Gail can buy 32 pencils?

What do I need to find?

ways Gail can buy
32 pencils

What information do I need to use?

She can buy single pencils
or boxes of 10 pencils.

Show how to solve the problem.

Draw quick pictures for 32. Complete the chart.

Boxes of 10 pencils	Single pencils
3	2
2	12
1	
0	

HOME CONNECTION • Your child found a pattern in the different combinations of tens and ones. Using a pattern helps to make an organized list.

Try Another Problem

Find a pattern to solve.

- What do I need to find?
- What information do I need to use?

1. Sara has 36 crayons. She can pack them in boxes of 10 crayons or as single crayons. What are all of the ways Sara can pack the crayons?

Boxes of 10 crayons	Single crayons
3	6

2. Mr. Winter is putting away 48 chairs. He can put away the chairs in stacks of 10 or as single chairs. What are all of the ways Mr. Winter can put away the chairs?

Stacks of 10 chairs	Single chairs
4	8

Math Talk

Mathematical Practices

Describe the pattern that helped you solve Exercise 2.

Share and Show

Find a pattern to solve.

3. Philip is putting 25 markers into a bag. He can put the markers in the bag as bundles of 10 or as single markers. What are all of the ways Philip can put the markers in the bag?

Bundles of 10 markers	Single markers

4. Stickers are sold in packs of 10 stickers or as single stickers. Miss Allen wants to buy 43 stickers. What are all of the ways she can buy the stickers?

Packs of 10 stickers	Single stickers

5. **THINK SMARTER** Devin had 32 baseball cards. He gets 7 more cards. He can pack them in boxes of 10 cards or as single cards. What are all of the ways Devin can sort the cards?

Boxes of 10 cards	Single cards

On Your Own

Solve. Write or draw to explain.

6. **MATHEMATICAL PRACTICE 7** Look for Structure

Lee can pack her toy cars in boxes of 10 cars or as single cars. Which of these is a way that she can pack her 24 toy cars? Circle your answer.

4 boxes of
10 cars and
2 single cars

1 box of
10 cars and
24 single cars

2 boxes of
10 cars and
4 single cars

Personal Math Trainer

7. **THINK SMARTER +** Mr. Link needs 30 cups. He can buy them in packs of 10 cups or as single cups. What are all of the different ways he can buy the cups? Find a pattern to solve.

Choose two of the ways from the chart. Explain how these two ways show the same number of cups.

Packs of 10 cups	Single cups

TAKE HOME ACTIVITY • Have your child explain how he or she solved one of the exercises in this lesson.

Count by hundreds.

12. 200, 300, _____, _____, _____, _____, _____

13. **THINK SMARTER** Martin starts at 300 and counts by fives to 420. What are the last 6 numbers Martin will say?

_____, _____, _____, _____, _____, _____

Problem Solving • Applications

MATHEMATICAL PRACTICE 7

Look for a Pattern

14. Lisa counts by fives. She starts at 120 and stops at 175. Which of these numbers will she say? Circle them.

170 151 135
155 200 180

15. George counts by tens. He starts at 750 and stops at 830. Which of these numbers will he say? Circle them.

755 690 780
760 795 810

16. **THINK SMARTER** Carl counts by hundreds. Which of these show ways that Carl could count? Choose Yes or No for each.

100, 110, 120, 130, 140 ☐ Yes ☐ No

100, 200, 300, 400, 500 ☐ Yes ☐ No

500, 600, 700, 800, 900 ☐ Yes ☐ No

300, 305, 310, 315, 320 ☐ Yes ☐ No

TAKE HOME ACTIVITY • With your child, count by fives from 150 to 200.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Chapter 1 Review/Test

1. Does the ten frame show an even number? Choose Yes or No.

☐ Yes ☐ No

☐ Yes ☐ No

2. Write an even number between 7 and 16.
Draw a picture and then write a sentence to explain why it is an odd number.

3. What is the value of the digit 5 in the number 75?

4. Ted has an even number of yellow markers and an odd number of green markers. Choose all the groups of markers that could belong to Ted.

- ☐ 8 yellow markers and 3 green markers
- ☐ 3 yellow markers and 6 green markers
- ☐ 4 yellow markers and 2 green markers
- ☐ 6 yellow markers and 7 green markers

-
5. Jeff starts at 190 and counts by tens. What are the next 6 numbers Jeff will say?

190, _____, _____, _____, _____, _____, _____

-
6. Megan counts by ones to 10. Lee counts by fives to 20. Who will say more numbers? Explain.

Name _____

7. Draw a picture to show the number 43.

Describe the number 43 in two ways.

4 3	tens	4 3	ones
--------	------	--------	------

_____ + _____

8. Jo lives on Maple Road.
Her address has the digit 2 in
the ones place and the digit
4 in the tens place. What is
Jo's address?

_____ Maple Road

9. Do the numbers show counting by fives?
Choose Yes or No.

76, 77, 78, 79, 80

☐ Yes

☐ No

20, 30, 40, 50, 60

☐ Yes

☐ No

70, 75, 80, 85, 90

☐ Yes

☐ No

35, 40, 45, 50, 55

☐ Yes

☐ No

10. Mrs. Payne needs 35 notepads. She can buy them in packs of 10 notepads or as single pads. What are all the different ways Mrs. Payne can buy the notepads? Find a pattern to solve.

Packs of 10 notepads	Single notepads

Choose two of the ways from the chart. Explain how these two ways show the same number of notepads.

11. Ann has a favorite number. It has a digit less than 4 in the tens place. It has a digit greater than 6 in the ones place. Could the number be Ann's number? Choose Yes or No.

$$30 + 9$$

☐ Yes

☐ No

sixty-seven

☐ Yes

☐ No

2 tens 8 ones

☐ Yes

☐ No

Write another number that could be Ann's favorite.

Numbers to 1,000

The White House has 412 doors and 147 windows. Look at the digit 1 in each of these numbers. How do the values of these digits compare?

Name _____

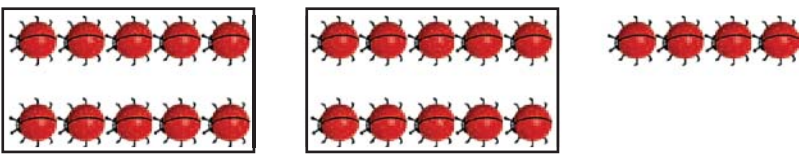

Show What You Know

Identify Numbers to 30

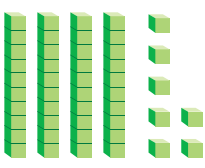

Write how many.

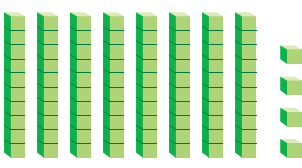

1.  _____ leaves

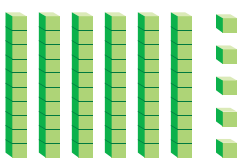

2.  _____ bugs

Place Value: 2-Digit Numbers

Circle the value of the red digit.

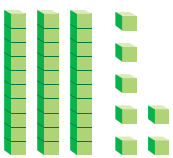

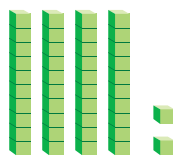

3. $\overline{4}7$

 40 4

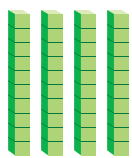

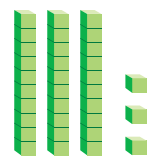

4. $8\overline{4}$

 4 40

5. $6\overline{5}$

 6 60

Compare 2-Digit Numbers Using Symbols

Compare. Write $>$, $<$, or $=$.

6.  
 37 ○ 42

7.  
 40 ○ 33

MP.7, MP.8

Listen and Draw

Circle groups of blocks to show hundreds.
Count the hundreds.

_____ hundreds

_____ straws

FOR THE TEACHER • Read the following problem and have children circle groups of tens blocks to solve. Mrs. Rodriguez has 30 bundles of straws. There are 10 straws in each bundle. How many straws does Mrs. Rodriguez have?

**Math
Talk**

Mathematical Practices

Describe how the number of hundreds would be different if there were 10 more bundles of straws.

Model and Draw

What number is shown with 11 tens?

11 tens

1 hundred 1 ten

110

In the number 110, there is a 1 in the hundreds place and a 1 in the tens place.

Share and Show

Circle tens to make 1 hundred. Write the number in different ways.

11 tens

1 hundred 1 ten

11 tens

1 hundred 1 ten

_____ tens

_____ hundred _____ tens

_____ tens

_____ hundreds _____ tens

7. **THINK SMARTER** Kendra has 120 stickers. 10 stickers fill a page. How many pages can she fill?

_____ pages

Problem Solving • Applications

Solve. Write or draw to explain.

8. **MATHEMATICAL PRACTICE 1 Analyze** There are 16 boxes of **crackers**. There are 10 crackers in each box. How many crackers are in the boxes?

_____ **crackers**

9. **Go DEEPER** Simon makes 8 towers of 10 blocks each. Ron makes 9 towers of 10 blocks each. How many blocks did they use?

_____ **blocks**

10. **THINK SMARTER** Ed has 150 **marbles**. How many bags of 10 marbles does he need to get so that he will have 200 marbles in all?

_____ **bags of 10 marbles**

TAKE HOME ACTIVITY • Have your child draw 110 Xs by drawing 11 groups of 10 Xs.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Model 3-Digit Numbers

Essential Question How do you show a 3-digit number using blocks?

HANDS ON Lesson 2.3

Number and Operations in
Base Ten—2.NBT.1

MATHEMATICAL PRACTICES
MP.4, MP.7

Listen and Draw

Use . Draw to show what you did.

FOR THE TEACHER • Read the following problem. Jack has 12 tens blocks. How many hundreds and tens does Jack have? Have children show Jack's blocks and then draw quick pictures. Then have children circle 10 tens and solve the problem.

**Math
Talk**

Mathematical Practices

If Jack had 14 tens, how many hundreds and tens would he have? **Explain.**

Model and Draw

In the number 348, the 3 is in the hundreds place, the 4 is in the tens place, and the 8 is in the ones place.

Write how many hundreds, tens, and ones.

3 hundreds + 4 tens + 8 ones

Show the number 348 using blocks.

Draw a quick picture.

Share and Show

Write how many hundreds, tens, and ones.

Show with . Then draw a quick picture.

1. 234

___ hundreds + ___ tens + ___ ones

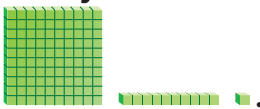

2. 156

___ hundred + ___ tens + ___ ones

Name _____

On Your Own

Write how many hundreds, tens, and ones.

Show with . Then draw a quick picture.

3. 125

___ hundred + ___ tens + ___ ones

4. 312

___ hundreds + ___ ten + ___ ones

5. 245

___ hundreds + ___ tens + ___ ones

6. 103

___ hundred + ___ tens + ___ ones

7. 419

___ hundreds + ___ ten + ___ ones

8. 328

___ hundreds + ___ tens + ___ ones

Problem Solving • Applications

WRITE Math

9. **THINK SMARTER** How are the numbers 342 and 324 alike? How are they different?

MATHEMATICAL PRACTICE

Model Mathematics

Write the number for the clue.

10. A model for my number has 2 hundreds blocks, no tens blocks, and 3 ones blocks.

My number is _____.

11. A model for my number has 3 hundreds blocks, 5 tens blocks, and no ones blocks.

My number is _____.

12. **THINK SMARTER** There are 2 boxes of 100 pencils and some single pencils on the table. Choose all the numbers that show how many pencils could be on the table.

- ☐ 200
☐ 106
☐ 203
☐ 207

TAKE HOME ACTIVITY • Write the number 438. Have your child tell you the values of the digits in the number 438.

FOR MORE PRACTICE:
Standards Practice Book

Talk**

Mathematical Practices

What number is next in the counting pattern you see? **Explain.**

FOR THE TEACHER • Read the following problem and discuss how children can use a counting pattern to solve. At Blossom Bakery, 823 muffins were sold in the morning. In the afternoon, four packages of 10 muffins were sold. How many muffins were sold that day?

Model and Draw

Look at the digits in the numbers. What two numbers are next in the counting pattern?

14,

24,

34,

44,

■,

■

The _____ digit changes by one each time.

The next two numbers are _____ and _____.

Share and Show

Look at the digits to find the next two numbers.

1. 137, 147, 157, 167, ■, ■

The next two numbers are _____ and _____.

2. 245, 345, 445, 545, ■, ■

The next two numbers are _____ and _____.

3. 421, 431, 441, 451, ■, ■

The next two numbers are _____ and _____.

4. 389, 489, 589, 689, ■, ■

The next two numbers are _____ and _____.

Name _____

On Your Own

Look at the digits to find the next two numbers.

5. 193, 293, 393, 493, ,

The next two numbers are _____ and _____.

6. 484, 494, 504, 514, ,

The next two numbers are _____ and _____.

7. 500, 600, 700, 800, ,

The next two numbers are _____ and _____.

8. 655, 665, 675, 685, ,

The next two numbers are _____ and _____.

9. **THINK SMARTER** Mark read 203 pages.
Laney read 100 more pages than Mark.
Gavin read 10 fewer pages than Laney.
How many pages did Gavin read?

_____ pages

Problem Solving • Applications

Solve.

10. **Go DEEPER** There were 135 buttons in a jar. After Robin put more buttons into the jar, there were 175 buttons in the jar. How many groups of 10 buttons did she put into the jar?

_____ groups of 10 buttons

Explain how you solved the problem.

11. **THINK SMARTER** Write the next number in each counting pattern.

162, 262, 362, 462, _____

347, 357, 367, 377, _____

609, 619, 629, 639, _____

TAKE HOME ACTIVITY • With your child, take turns writing number patterns in which you count on by tens or by hundreds.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

PROBLEM SOLVING

Lesson 2.11

Problem Solving • Compare Numbers

Essential Question How can you make a model to solve a problem about comparing numbers?

Number and Operations in
Base Ten—2.NBT.4

MATHEMATICAL PRACTICES
MP.2, MP.4

Children bought 217 boxes of chocolate milk and 188 boxes of plain milk. Did they buy more boxes of chocolate milk or plain milk?

What do I need to find?

if the children bought more
boxes of chocolate milk
or plain milk

What information do I need to use?

 boxes of chocolate
milk
 boxes of plain milk

Show how to solve the problem.

Model the numbers. Draw quick pictures of your models.

The children bought more boxes of _____ milk.

HOME CONNECTION • Your child used base-ten blocks to represent the numbers in the problem. These models were used as a tool for comparing numbers to solve the problem.

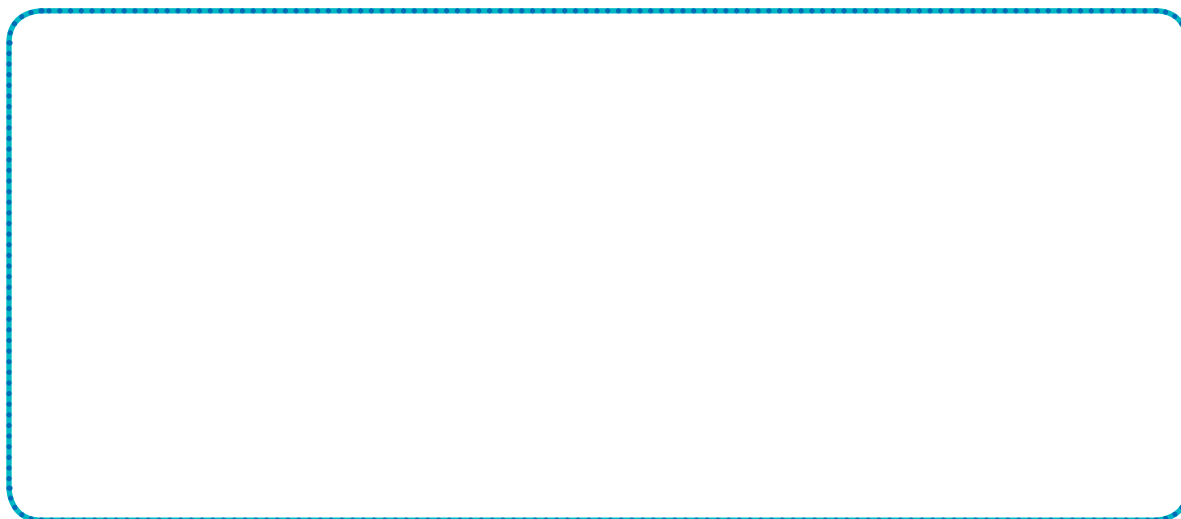

Try Another Problem

Model the numbers. Draw quick pictures to show how you solved the problem.

- What do I need to find?
- What information do I need to use?

1. At the zoo, there are 137 birds and 142 reptiles. Are there more birds or more reptiles at the zoo?

more _____

2. Tom's book has 105 pages.
Delia's book has 109 pages.
Whose book has fewer pages?

_____ book

**Math
Talk**

Mathematical Practices

Explain what you did to solve the second problem.

Name _____

Share and Show

Model the numbers. Draw quick pictures to show how you solved the problem.

3. Mary's puzzle has 164 pieces. Jake's puzzle has 180 pieces. Whose puzzle has more pieces?

_____ puzzle

4. There are 246 people at the game. There are 251 people at the museum. At which place are there fewer people?

at the _____

5. There are 131 crayons in a box. There are 128 crayons in a bag. Are there more crayons in the box or in the bag?

in the _____

6. There are 308 books in the first room. There are 273 books in the second room. In which room are there fewer books?

in the _____ room

Problem Solving • Applications

7. **THINK SMARTER** There are 748 children at Dan's school. There are 651 children at Karen's school. There are 763 children at Jason's school. Which school has more than 759 children?

_____ school

8. **MATHEMATICAL PRACTICE 1 Analyze** There are 136 crayons in a box. Use the digits 4, 1, and 2 to write a number that is greater than 136.

9. **THINK SMARTER** Becky has 134 stamps. Sara has 129 stamps. Who has more stamps?

Sara buys 10 more stamps. Who has more stamps now?

Draw quick pictures to show the stamps Becky and Sara have now.

TAKE HOME ACTIVITY • Ask your child to explain how he or she solved one of the problems on this page.

CRITICAL AREA Building fluency with addition and subtraction

The giraffe is the tallest land animal in the world. Adult giraffes are 13 to 17 feet tall. Newborn giraffes are about 6 feet tall.

A group of 5 giraffes drinks water at a watering hole. A group of 5 giraffes eats leaves from trees. How many giraffes are there in all?

_____ giraffes

The ostrich is the largest bird in the world. Ostriches cannot fly, but they can run fast. Ostrich eggs weigh about 3 pounds each! Several ostriches will lay eggs in a shared nest.

There are 6 eggs in a nest. Then 5 more eggs are put in that nest. How many eggs are in the nest now?

_____ eggs

How do ostriches care for their young?

Kangaroos can move quickly by jumping with their two back legs. When they are moving slowly, they use all four legs.

Western gray kangaroos live in groups called mobs. There are 8 kangaroos in a mob. 4 more kangaroos join the mob. How many kangaroos are in the mob in all?

_____ kangaroos

Wild boars like to eat roots. They use their tough snouts to dig. Wild boars can be up to 6 feet long.

Wild boars live in groups called sounders. There is one sounder of 14 boars. If 7 of the boars are eating, how many boars are not eating?

_____ boars

How do wild boars care for their young?

Moose are the largest kind of deer. Male moose have antlers that may be 5 to 6 feet wide. Moose can trot and gallop. They are also good swimmers!

A ranger saw 7 moose in the morning and 6 moose in the afternoon. How many moose did the ranger see that day?

_____ moose

Name _____

Write About the Story

Choose one kind of animal.
Draw a picture and write your own
story about that kind of animal.
Use addition in your story.

Vocabulary Review

add

in all

giraffe

ostrich

kangaroo

Math

How many eggs are there?

Draw more ostrich eggs in each nest.
Write an addition sentence below each nest to show how many eggs are in each nest now.

Choose a different animal from the story.
Write another story that uses addition.

Basic Facts and Relationships

Curious
about
Math

Parrot fish live near coral reefs in tropical ocean waters. They use their sharp teeth to scrape food off of the coral.

Suppose 10 parrot fish are eating at a coral reef. 3 of the fish swim away. How many fish are still eating?

Name _____

Lesson 3.1

Use Doubles Facts

Essential Question How can you use doubles facts to find sums for near doubles facts?

Operations and Algebraic
Thinking—2.OA.2

MATHEMATICAL PRACTICES
MP.7, MP.8

Listen and Draw

Draw a picture to show the problem. Then write an addition sentence for the problem.

_____ ○ _____ ○ _____

_____ toy cars

FOR THE TEACHER • Read this problem and have children draw a picture for the problem. Nathan has 6 toy cars. Alisha gives him 6 more toy cars. How many toy cars does Nathan have now? After children write an addition sentence, have them name other doubles facts that they know.

**Math
Talk**

Mathematical Practices

Explain why $4 + 4 = 8$ is called a doubles fact.

Model and Draw

You can use doubles facts to find **sums** for other facts.

$$3 + 4 = ?$$

$$3 + 3 + 1 = ?$$

$$3 + 3 = 6$$

$$6 + 1 = 7$$

$$\text{So, } 3 + 4 = \underline{\hspace{2cm}}.$$

$$7 + 6 = ?$$

$$7 + 7 - 1 = ?$$

$$7 + 7 = 14$$

$$14 - 1 = 13$$

$$\text{So, } 7 + 6 = \underline{\hspace{2cm}}.$$

Share and Show

Write a doubles fact you can use to find the sum. Write the sum.

1. $2 + 3 = \underline{\hspace{2cm}}$

$\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

2. $4 + 5 = \underline{\hspace{2cm}}$

$\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

3. $4 + 3 = \underline{\hspace{2cm}}$

$\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

4. $6 + 7 = \underline{\hspace{2cm}}$

$\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

5. $5 + 6 = \underline{\hspace{2cm}}$

$\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

6. $8 + 7 = \underline{\hspace{2cm}}$

$\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

Name _____

On Your Own

Write a doubles fact you can use to find the sum. Write the sum.

7. $5 + 4 =$ _____

_____ + _____ = _____

8. $6 + 5 =$ _____

_____ + _____ = _____

9. $6 + 7 =$ _____

_____ + _____ = _____

10. $7 + 8 =$ _____

_____ + _____ = _____

11. $8 + 9 =$ _____

_____ + _____ = _____

12. $5 + 6 =$ _____

_____ + _____ = _____

13. $7 + 6 =$ _____

_____ + _____ = _____

14. $9 + 8 =$ _____

_____ + _____ = _____

15. **THINK SMARTER** Mr. Norris wrote a doubles fact. It has a sum greater than 6. The numbers that he added are each less than 6. What fact might he have written?

Problem Solving • Applications

Solve. Write or draw to explain.

16. **MATHEMATICAL PRACTICE** 1 **Analyze**

Andrea has 8 red buttons and 9 blue buttons. How many buttons does Andrea have?

_____ buttons

17. **Go DEEPER** Henry sees 3 rabbits. Callie sees double that number of rabbits. How many more rabbits does Callie see than Henry?

_____ more rabbits

18. **THINK SMARTER** Could you use the doubles fact to find the sum for $4 + 5$? Choose Yes or No.

$$4 + 4 = 8$$

☐ Yes

☐ No

$$5 + 5 = 10$$

☐ Yes

☐ No

$$9 + 9 = 18$$

☐ Yes

☐ No

TAKE HOME ACTIVITY • Ask your child to write three different doubles facts with sums less than 17.

FOR MORE PRACTICE:
Standards Practice Book

$8 + 9 = \underline{\quad}$

19. $5 + 3 = \underline{\quad}$

$3 + 5 = \underline{\quad}$

20. $\underline{\quad} = 9 + 9$

$\underline{\quad} = 9 + 8$

21. $6 + 7 = \underline{\quad}$

$7 + 6 = \underline{\quad}$

22. **THINK SMARTER** Sam painted 3 pictures.
Ellie painted twice as many pictures
as Sam. How many pictures did
they paint?

_____ pictures

Problem Solving • Applications

Solve. Write or draw to explain.

23. **GO DEEPER** Chloe draws 8 pictures. Reggie draws 1 more picture than Chloe. How many pictures do they draw?

_____ pictures

24. **MATHEMATICAL PRACTICE 1 Analyze** Joanne made 9 clay bowls last week. She made the same number of clay bowls this week. How many clay bowls did she make in the two weeks?

_____ clay bowls

Personal Math Trainer

25. **THINK SMARTER +** There are 9 raisins in the bowl. Devon puts 8 more raisins in the bowl. Complete the addition sentence to find how many raisins are in the bowl now.

_____ + _____ = _____

_____ raisins

TAKE HOME ACTIVITY • Ask your child to write several addition facts that he or she knows.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Algebra • Make a Ten to Add

Essential Question How is the make a ten strategy used to find sums?

Operations and Algebraic Thinking—2.OA.2

MATHEMATICAL PRACTICES
MP.7, MP.8

Listen and Draw

Write the fact below the ten frame when you hear the problem that matches the model.

FOR THE TEACHER • Read the following problem. There are 6 large dogs and 4 small dogs. How many dogs are there? Have children find the ten frame that models the problem and write the addition sentence. Repeat by revising the story for each addition fact represented by the other ten frames.

Math Talk

Mathematical Practices

Describe a pattern you see in these make a ten facts.

Model and Draw

$$7 + 5 = ?$$

You need to add 3 to 7 to make a ten. Break apart 5 as 3 and 2.

So, $7 + 5 = \underline{\quad\quad}$.

Share and Show

Show how you can make a ten to find the sum.
Write the sum.

1. $8 + 3 = \underline{\quad\quad}$

$10 + \underline{\quad\quad} = \underline{\quad\quad}$

2. $2 + 9 = \underline{\quad\quad}$

$10 + \underline{\quad\quad} = \underline{\quad\quad}$

3. $8 + 5 = \underline{\quad\quad}$

$10 + \underline{\quad\quad} = \underline{\quad\quad}$

4. $4 + 7 = \underline{\quad\quad}$

$10 + \underline{\quad\quad} = \underline{\quad\quad}$

5. $3 + 9 = \underline{\quad\quad}$

$10 + \underline{\quad\quad} = \underline{\quad\quad}$

6. $7 + 6 = \underline{\quad\quad}$

$10 + \underline{\quad\quad} = \underline{\quad\quad}$

Name _____

On Your Own

Show how you can make a ten to find the sum.
Write the sum.

7. $4 + 9 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

9. $8 + 6 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

10. $5 + 9 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

11. $7 + 9 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

12. $8 + 4 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

13. $9 + 9 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

14. $8 + 7 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

15. **THINK SMARTER** There were 5 bees in a hive. How many more bees need to go in the hive for there to be 14 bees?

_____ more bees

Problem Solving • Applications

Math

Solve. Write or draw to explain.

16. **MATHEMATICAL PRACTICE 1** **Analyze** There are 9 large bicycles at the store. There are 6 small bicycles at the store. How many bicycles are at the store?

_____ bicycles

17. **GO DEEPER** Max is thinking of a doubles fact. It has a sum that is greater than the sum of $6 + 4$ but less than the sum of $8 + 5$. What fact is Max thinking of?

_____ + _____ = _____

18. **THINK SMARTER** Natasha had 8 shells. Then she found 5 more shells. Draw to show how to find the number of shells Natasha has now.

How many shells does she have now? _____ shells

TAKE HOME ACTIVITY • Ask your child to name pairs of numbers that have a sum of 10. Then have him or her write the addition sentences.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Lesson 3.4

Algebra • Add 3 Addends

Essential Question How do you add three numbers?

Operations and Algebraic
Thinking—2.OA.2 Also 2.NBT.5

MATHEMATICAL PRACTICES
MP.6, MP.8

Listen and Draw

Write the sum of each pair of addends.

FOR THE TEACHER • After children have recorded the sum of each pair of addends, have them share their answers and discuss the strategies used.

**Math
Talk**

Mathematical Practices

Describe how you found the sum of 5 and 4.

Model and Draw

You can group numbers in different ways to add.

Choose two addends.
Look for facts you know.

Changing the way
the numbers are
grouped does not
change the sum.

$$3 + 2 + 7 = ?$$

$$5 + 7 = \underline{12}$$

$$3 + 2 + 7 = ?$$

$$3 + 9 = \underline{\quad}$$

$$3 + 2 + 7 = ?$$

$$10 + 2 = \underline{\quad}$$

Share and Show

Solve two ways. Circle the two addends you add first.

1. $1 + 8 + 2 = \underline{\quad}$

$1 + 8 + 2 = \underline{\quad}$

2. $7 + 3 + 3 = \underline{\quad}$

$7 + 3 + 3 = \underline{\quad}$

3. $4 + 2 + 4 = \underline{\quad}$

$4 + 2 + 4 = \underline{\quad}$

4. $2 + 8 + 2 = \underline{\quad}$

$2 + 8 + 2 = \underline{\quad}$

Name _____

Lesson 3.5

Algebra • Relate Addition and Subtraction

Essential Question How are addition and subtraction related?

Operations and Algebraic Thinking—2.OA.2

MATHEMATICAL PRACTICES
MP.2, MP.7, MP.8

Listen and Draw

Complete the bar model to show the problem.

_____ soccer balls

15

_____ soccer balls

FOR THE TEACHER • Read the following problems. Have children complete the bar model for each. The soccer team has 8 red balls and 7 yellow balls. How many soccer balls does the team have? The soccer team has 15 balls inside the locker room. The children took the 7 yellow balls outside. How many soccer balls were inside?

Math Talk

Mathematical Practices

Explain how the bar models for the problems are alike and how they are different.

Model and Draw

You can use addition facts to remember **differences**. Related facts have the same whole and parts.

Think of the addends in an addition fact to find the difference for a related subtraction fact.

13

$$6 + 7 = \underline{13}$$

13

$$13 - 7 = \underline{\quad}$$

Share and Show

Write the sum and the difference for the related facts.

1. $5 + 4 = \underline{\quad}$

$$9 - 4 = \underline{\quad}$$

2. $2 + 7 = \underline{\quad}$

$$9 - 2 = \underline{\quad}$$

3. $3 + 8 = \underline{\quad}$

$$11 - 8 = \underline{\quad}$$

4. $5 + 8 = \underline{\quad}$

$$13 - 5 = \underline{\quad}$$

5. $\underline{\quad} = 1 + 8$

$$\underline{\quad} = 9 - 1$$

6. $9 + 9 = \underline{\quad}$

$$18 - 9 = \underline{\quad}$$

7. $\underline{\quad} = 8 + 7$

$$\underline{\quad} = 15 - 8$$

8. $4 + 7 = \underline{\quad}$

$$11 - 7 = \underline{\quad}$$

9. $7 + 5 = \underline{\quad}$

$$12 - 7 = \underline{\quad}$$

Name _____

On Your Own

Write the sum and the difference for the related facts.

10. $4 + 3 = \underline{\quad}$

$7 - 3 = \underline{\quad}$

11. $2 + 6 = \underline{\quad}$

$8 - 6 = \underline{\quad}$

12. $6 + 4 = \underline{\quad}$

$10 - 6 = \underline{\quad}$

13. $7 + 3 = \underline{\quad}$

$10 - 7 = \underline{\quad}$

14. $8 + 6 = \underline{\quad}$

$14 - 6 = \underline{\quad}$

15. $\underline{\quad} = 3 + 9$

$\underline{\quad} = 12 - 9$

16. $6 + 5 = \underline{\quad}$

$11 - 5 = \underline{\quad}$

17. $7 + 7 = \underline{\quad}$

$14 - 7 = \underline{\quad}$

18. $9 + 6 = \underline{\quad}$

$15 - 9 = \underline{\quad}$

19. $5 + 9 = \underline{\quad}$

$14 - 9 = \underline{\quad}$

20. $\underline{\quad} = 4 + 8$

$\underline{\quad} = 12 - 4$

21. $9 + 7 = \underline{\quad}$

$16 - 7 = \underline{\quad}$

MATHEMATICAL
PRACTICE

6

Make Connections

Write a related subtraction fact for each addition fact.

22. $7 + 8 = 15$

23. $5 + 7 = 12$

24. $6 + 7 = 13$

25. $9 + 8 = 17$

Problem Solving • Applications

Solve. Write or draw to explain.

26. Trevor has 7 kites. Pam has 4 kites. How many more kites does Trevor have than Pam?

_____ more kites

27. **THINK SMARTER** Mr. Sims has a bag of 7 pears and a bag of 6 pears. His family eats 5 pears. How many pears does he have now?

_____ pears

28. **THINK SMARTER** Elin counts 7 geese in the water and some geese on the shore. There are 16 geese in all. Draw a picture to show the two groups of geese.

Write a number sentence that can help you find how many geese are on the shore.

How many geese are on the shore? _____ geese

TAKE HOME ACTIVITY • Ask your child to name some subtraction facts that he or she knows well.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Practice Subtraction Facts

Essential Question What are some ways to remember differences?

Operations and Algebraic Thinking—2.OA.2

MATHEMATICAL PRACTICES
MP.1

Listen and Draw

Use Gina's model to answer the question.

Gina's Model

FOR THE TEACHER • Tell children that Gina put 4 color tiles inside the circle and then put 3 color tiles outside the circle. Then ask: What addition fact could be written for Gina's model? Repeat with stories for the three facts that are related to this addition fact.

Math Talk

Mathematical Practices

Explain how the different facts for Gina's model are related.

Model and Draw

These are some ways to find differences.

You can count back by 1, 2, or 3.

$7 - 2 = \underline{\quad}$

Start with 7.
Say: 6, 5.

$9 - 3 = \underline{\quad}$

Start with 9.
Say: 8, 7, 6.

You can think about a missing addend to subtract.

$8 - 5 = \square$

$5 + 3 = 8$

So, $8 - 5 = \underline{\quad}$.

Share and Show

Write the difference.

1. $6 - 4 = \underline{\quad}$

2. $10 - 7 = \underline{\quad}$

3. $\underline{\quad} = 5 - 2$

4. $14 - 6 = \underline{\quad}$

5. $\underline{\quad} = 8 - 4$

6. $11 - 3 = \underline{\quad}$

7. $\underline{\quad} = 7 - 5$

8. $10 - 4 = \underline{\quad}$

9. $5 - 0 = \underline{\quad}$

10. $13 - 9 = \underline{\quad}$

11. $9 - 3 = \underline{\quad}$

12. $\underline{\quad} = 7 - 6$

13. $12 - 3 = \underline{\quad}$

14. $6 - 3 = \underline{\quad}$

15. $9 - 5 = \underline{\quad}$

16. $10 - 6 = \underline{\quad}$

✓ 17. $\underline{\quad} = 8 - 3$

✓ 18. $13 - 5 = \underline{\quad}$

Name _____

On Your Own

Write the difference.

19. $11 - 2 = \underline{\quad}$

20. $9 - 7 = \underline{\quad}$

21. $\underline{\quad} = 7 - 4$

22. $12 - 5 = \underline{\quad}$

23. $8 - 6 = \underline{\quad}$

24. $\underline{\quad} = 7 - 0$

25. $\underline{\quad} = 10 - 5$

26. $15 - 8 = \underline{\quad}$

27. $13 - 7 = \underline{\quad}$

28. $10 - 8 = \underline{\quad}$

29. $8 - 5 = \underline{\quad}$

30. $\underline{\quad} = 9 - 6$

31. $\underline{\quad} = 9 - 4$

32. $11 - 8 = \underline{\quad}$

33. $12 - 7 = \underline{\quad}$

34. **THINK SMARTER**

Write the differences.
Then write the next fact
in the pattern.

$10 - 1 = \underline{\quad}$

$8 - 1 = \underline{\quad}$

$6 - 1 = \underline{\quad}$

$4 - 1 = \underline{\quad}$

$12 - 9 = \underline{\quad}$

$13 - 9 = \underline{\quad}$

$14 - 9 = \underline{\quad}$

$15 - 9 = \underline{\quad}$

$18 - 9 = \underline{\quad}$

$17 - 8 = \underline{\quad}$

$16 - 7 = \underline{\quad}$

$15 - 6 = \underline{\quad}$

TAKE HOME ACTIVITY • With your child, practice saying subtraction facts from this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Mid-Chapter Checkpoint

Concepts and Skills

Write the sum. (2.OA.2)

1. $3 + 6 = \underline{\quad}$ 2. $8 + 0 = \underline{\quad}$ 3. $7 + 7 = \underline{\quad}$

4. $9 + 4 = \underline{\quad}$ 5. $\underline{\quad} = 5 + 6$ 6. $2 + 8 = \underline{\quad}$

7. $3 + 7 + 2 = \underline{\quad}$ 8. $4 + 4 + 6 = \underline{\quad}$

Show how you can make a ten to find the sum.

Write the sum. (2.OA.2)

9. $9 + 7 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

10. $6 + 8 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

Write the sum and the difference for the related facts. (2.OA.2)

11. $5 + 4 = \underline{\quad}$ 12. $3 + 9 = \underline{\quad}$ 13. $8 + 7 = \underline{\quad}$

$9 - 4 = \underline{\quad}$ $12 - 9 = \underline{\quad}$ $15 - 8 = \underline{\quad}$

14. **THINK SMARTER** Lily has 6 toys cars.

Yong has 5 toy cars. How many
toy cars do they have? (2.OA.2)

 toy cars

Name _____

Use Ten to Subtract

Essential Question How does getting to 10 in subtraction help when finding differences?

Operations and Algebraic Thinking—2.OA.2 Also 2.MD.6

MATHEMATICAL PRACTICES
MP.5, MP.8

Listen and Draw

Circle to show the amount you subtract for each problem.

FOR THE TEACHER • Read the following problem. Deveron has 13 crayons. He gives 3 crayons to Tyler. How many crayons does Deveron have now? Have children circle the part of the blue line segment that shows what is subtracted from the total. Repeat for two more problems.

Math Talk

Mathematical Practices

Describe a pattern in the three problems and answers.

Model and Draw

You can subtract in steps to use a tens fact.

$$14 - 6 = ?$$

4 2

Subtract in steps:

$$14 - 4 = 10$$

$$10 - 2 = 8$$

- 2

- 4

So, $14 - 6 = 8$.

Share and Show

Show the tens fact you used. Write the difference.

1. $12 - 5 = \underline{\quad}$

2 3

$10 - \underline{\quad} = \underline{\quad}$

2. $11 - 6 = \underline{\quad}$

1 5

$10 - \underline{\quad} = \underline{\quad}$

3. $15 - 7 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

4. $13 - 7 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

Name _____

On Your Own

Show the tens fact you used. Write the difference.

5. $13 - 5 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

6. $15 - 6 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

7. $12 - 8 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

8. $14 - 8 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

9. $12 - 6 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

10. $16 - 7 = \underline{\quad}$

$10 - \underline{\quad} = \underline{\quad}$

Solve. Write or draw to explain.

11. **THINK SMARTER** Beth has a box of 16 crayons. She gives 3 crayons to Jake and 7 crayons to Wendy. How many crayons does Beth have now?

_____ crayons

Problem Solving • Applications

WRITE

Math

Go DEEPER

Write number sentences that use both addition and subtraction. Use each choice only once.

12.
$$\begin{array}{r} 9 - 2 \\ \hline 7 \end{array} = \begin{array}{r} 3 + 4 \\ \hline 7 \end{array}$$

13. $\underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

14. $\underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

15. $\underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

~~$9 - 2$~~

~~$3 + 4$~~

$1 + 4$

$14 - 6$

$5 + 4$

$15 - 6$

$10 - 5$

$4 + 4$

16. **THINK SMARTER** Does the number sentence have the same difference as $15 - 7 = \blacksquare$? Choose Yes or No.

$10 - 6 = \blacksquare$

☐ Yes

☐ No

$10 - 2 = \blacksquare$

☐ Yes

☐ No

$10 - 4 = \blacksquare$

☐ Yes

☐ No

TAKE HOME ACTIVITY • Ask your child to name pairs of numbers that have a difference of 10. Then have him or her write the number sentences.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Lesson 3.8

Algebra • Use Drawings to Represent Problems

Essential Question How are bar models used to show addition and subtraction problems?

Operations and Algebraic Thinking—2.OA.1

MATHEMATICAL PRACTICES
MP.1, MP.4

Listen and Draw

Complete the bar model to show the problem.
Complete the number sentence to solve.

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \quad \underline{\hspace{2cm}} \text{ pennies}$$

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \quad \underline{\hspace{2cm}} \text{ pennies}$$

Math Talk

Mathematical Practices

Explain how the problems are alike and how they are different.

FOR THE TEACHER • Read each problem and have children complete the bar models. Hailey has 5 pennies in her pocket and 7 pennies in her wallet. How many pennies does she have? Blake has 12 pennies in his bank. He gives 5 pennies to his sister. How many pennies does he have now?

Model and Draw

You can use bar models to show problems.

Ben eats 14 crackers. Ron eats 6 crackers. How many more crackers does Ben eat than Ron?

$$14 - 6 = 8$$

_____ more crackers

Suzy had 14 cookies. She gave 6 cookies to Grace. How many cookies does Suzy have now?

_____ cookies

Share and Show

Complete the bar model. Then write a number sentence to solve.

1. Mr. James bought 15 plain bagels and 9 raisin bagels. How many more plain bagels than raisin bagels did he buy?

_____ more plain bagels

Name _____

On Your Own

Complete the bar model. Then write a number sentence to solve.

2. Cole has 5 **books** about dogs and 6 books about cats. How many books does Cole have?

_____ **books**

3. **THINK SMARTER** Anne has 16 **blue clips** and 9 red clips. How many more blue clips than red clips does she have?

 _____ more **blue clips**

4. **GO DEEPER** Fill in the blank. Then label the bar model and solve.

Miss Gore had 18 **pencils**. She gave _____ pencils to Erin. How many pencils does Miss Gore have now?

_____ **pencils**

Problem Solving • Applications

Use the information in the table to solve. Write or draw to explain.

5. Jenna put all of the roses and all of the tulips into a vase. How many flowers did she put into the vase?

_____ flowers

Jenna's Flowers

Flowers	Number
roses	6
tulips	8
daisies	11

6. **THINK SMARTER** Four of the daisies are white. The other daisies are yellow. How many daisies are yellow?

_____ yellow daisies

7. **THINK SMARTER** Rita counts 4 frogs in the grass and some other frogs in the water. There are 10 frogs in all. How many frogs are in the water? Draw a picture and write a number sentence to solve.

_____ frogs are in the water.

TAKE HOME ACTIVITY • Ask your child to describe what he or she learned in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Algebra • Use Equations to Represent Problems

Essential Question How are number sentences used to show addition and subtraction situations?

Operations and Algebraic Thinking—2.OA.1

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.4

Listen and Draw

Write a story problem that could be solved using this bar model.

Math Talk

Mathematical Practices

Would you add or subtract to solve your story problem?

Explain.

FOR THE TEACHER • Discuss with children how this bar model can be used to represent an addition or a subtraction situation.

Model and Draw

A number sentence can be used to show a problem.

There were some girls and 4 boys at the park.
There were 9 children in all. How many girls were at the park?

$$\square + 4 = 9$$

Think: $5 + 4 = 9$

So, there were 5 girls at the park.

The \square is a placeholder for the missing number.

Share and Show

Write a number sentence for the problem.

Use a \square for the missing number. Then solve.

1. There were 14 ants on the sidewalk. Then 6 ants went into the grass. How many ants were still on the sidewalk?

_____ ants

2. There were 7 big dogs and 4 little dogs at the park. How many dogs were at the park?

_____ dogs

Name _____

On Your Own

Write a number sentence for the problem.

Use a  for the missing number. Then solve.

3. A group of children were flying 13 kites. Some kites were put away. Then the children were flying 7 kites. How many kites were put away?

_____ kites

4. There are 18 boys at the field. 9 of the boys are playing soccer. How many boys are not playing soccer?

_____ boys

5. **MATHEMATICAL PRACTICE 2** Use Reasoning

Matthew found 9 acorns. Greg found 6 acorns. How many acorns did the two boys find?

_____ acorns

6. **THINK SMARTER** There were some ducks in a pond. Four more ducks joined them. Then there were 12 ducks in the pond. How many ducks were in the pond at first?

_____ ducks

Problem Solving • Applications

Read the story. Write or draw to show how you solved the problems.

At camp, 5 children are playing games and 4 children are making crafts. 5 other children are having a snack.

7. How many children are at camp?

_____ children

8. **Go DEEPER** Suppose 7 more children arrive at camp and join the children playing games. How many more children are playing games than children not playing games?

_____ more children

Personal Math Trainer

9. **THINK SMARTER +** Ashley had 9 crayons. She gave 4 crayons to her brother. How many crayons does Ashley have now? Write a number sentence for the problem. Use for the missing number. Then solve.

Ashley has _____ crayons now.

TAKE HOME ACTIVITY • Ask your child to explain how he or she solved one of the problems on this page.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

PROBLEM SOLVING

Lesson 3.10

Problem Solving • Equal Groups

Essential Question How can acting it out help when solving a problem about equal groups?

Number and Operations in Base Ten—2.NBT.2 Also 2.OA.4

MATHEMATICAL PRACTICES
MP.1, MP.5, MP.7

Theo puts his stickers in 5 rows.
There are 2 stickers in each row.
How many stickers does Theo have?

What do I need to find?

how many stickers

Theo has

What information do I need to use?

5 rows of stickers

2 stickers in each row

Show how to solve the problem.

HOME CONNECTION • Your child used counters to act out the problem. Counters are a concrete tool that helps children act out the problem.

Try Another Problem

Act out the problem.

Draw to show what you did.

- What do I need to find?
- What information do I need to use?

1. Maria puts all of her postcards in 6 rows. There are 2 postcards in each row. How many postcards does Maria have? _____ postcards

2. Jamal puts 2 toys in each box. How many toys will he put in 8 boxes? _____ toys

**Math
Talk**

Mathematical Practices

Explain how acting it out and skip counting helped you solve the second problem.

Name _____

Share and Show

Act out the problem.

Draw to show what you did.

3. Mr. Fulton puts 2 bananas on each tray. How many bananas are on 6 trays?

_____ bananas

4. There are 7 rows of apples. There are 2 apples in each row. How many apples are there?

_____ apples

5. **THINK SMARTER** There are 4 plates. Dexter puts 2 grapes on each plate. Then he puts 2 grapes on each of 6 more plates. How many grapes in all does he put on the plates?

_____ grapes

Problem Solving • Applications

6. **MATHEMATICAL PRACTICE** 6 Make Connections

Angela used these counters to act out a problem.

Write a problem about equal groups that Angela could have modeled with these counters.

7. **THINK SMARTER** Max and 8 friends get books from the library. Each person gets 2 books. Draw a picture to show the groups of books.

How many books did they get?

_____ books

TAKE HOME ACTIVITY • Ask your child to explain how he or she solved one of the problems in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Algebra • Repeated Addition**Essential Question** How can you write an addition sentence for problems with equal groups?Operations and Algebraic
Thinking—2.OA.4**MATHEMATICAL PRACTICES**
MP.4, MP.6**Listen and Draw**Use counters to model the problem.
Then draw a picture of your model.

**Math
Talk****Mathematical Practices****Describe** how you found
the number of counters
in your model.**FOR THE TEACHER •** Read the following
problem and have children first model the
problem with counters and then draw a picture
of their models. Clayton has 3 rows of cards.
There are 5 cards in each row. How many cards
does Clayton have?

Model and Draw

You can use addition to find the total amount when you have equal groups.

3 rows of 4

Write: $\overbrace{4}^{4} + \overbrace{4}^{4} + \overbrace{4}^{4} = \underline{\hspace{2cm}}$
_____ in all

Share and Show

Find the number of shapes in each row.
 Complete the addition sentence to find the total.

1.

3 rows of _____

_____ + _____ + _____ = _____

2.

4 rows of _____

_____ + _____ + _____ + _____ = _____

3.

5 rows of _____

_____ + _____ + _____ + _____ + _____ = _____

Name _____

On Your Own

Find the number of shapes in each row.
Complete the addition sentence to find the total.

4.

2 rows of _____

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

5.

3 rows of _____

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

6.

4 rows of _____

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

7.

4 rows of _____

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

8.

5 rows of _____

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

Problem Solving • Applications

Solve. Write or draw to explain.

9. **THINK SMARTER** There are 6 photos on the wall. There are 2 photos in each row. How many rows of photos are there?

_____ rows

10. **GO DEEPER** Mrs. Chen makes 5 rows of 2 chairs and 2 rows of 3 chairs. How many chairs does Mrs. Chen use?

_____ chairs

11. **THINK SMARTER** Find the number of counters in each row. Complete the number sentence to find the total number of counters.

_____ + _____ + _____ = _____

_____ counters

TAKE HOME ACTIVITY • Have your child use small objects to make 2 rows with 4 objects in each row. Then have your child find the total number of objects.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Chapter 3 Review/Test

1. Erin puts 3 small cans, 4 medium cans, and 5 large cans on a shelf. How many cans does she put on the shelf?

_____ cans

2. Fill in the bubble next to all the doubles facts you could use to find the sum of $3 + 2$?

☐ $2 + 2$

☐ $5 + 5$

☐ $3 + 3$

☐ $1 + 1$

3. Does the number sentence have the same difference as $14 - 6 = \square$?
Choose Yes or No.

$10 - 1 = \square$

☐ Yes

☐ No

$10 - 2 = \square$

☐ Yes

☐ No

$10 - 3 = \square$

☐ Yes

☐ No

$10 - 4 = \square$

☐ Yes

☐ No

4. Mr. Brown sold 5 red backpacks and 8 blue backpacks. Write the number sentence. Show how you can make a ten to find the sum. Write the sum.

$$5 + 8 = \underline{\quad}$$

$$10 + \underline{\quad} = \underline{\quad}$$

5. Find the number of shapes in each row.

3 rows of $\underline{\quad}$

Complete the addition sentence to find the total.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

6. Tanya and 2 friends put rocks on the table. Each person put 2 rocks on the table. Draw a picture to show the groups of rocks.

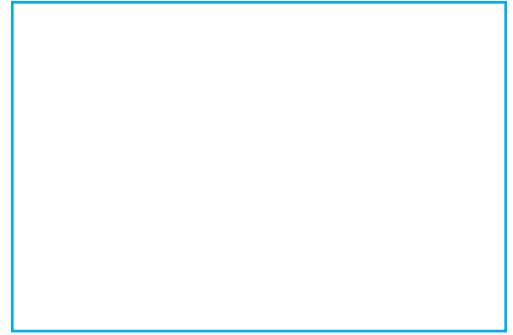

How many rocks did they put on the table?

$\underline{\quad}$ rocks

Name _____

7. Lily sees 15 tan puppies and 8 white puppies at the pet store. How many more tan puppies than white puppies does she see? Draw a picture and write a number sentence to solve.

_____ more tan puppies

8. Mark counts 6 ducks in a pond and some ducks on the grass. There are 14 ducks in all. Draw a picture to show the two groups of ducks.

Write a number sentence that can help you find how many ducks are on the grass.

_____ + _____ = _____

How many ducks are on the grass? _____ ducks

9. There are 8 peaches in a basket. Mrs. Dalton puts 7 more peaches in the basket. Complete the addition sentence to find how many peaches are in the basket now.

_____ + _____ = _____

_____ peaches

- 10.** Use the numbers on the tiles to write the differences.

Then write the next fact in the pattern.

$12 - 6 = \underline{\hspace{2cm}}$

$11 - 6 = \underline{\hspace{2cm}}$

$12 - 7 = \underline{\hspace{2cm}}$

$2 - 6 = \underline{\hspace{2cm}}$

$12 - 8 = \underline{\hspace{2cm}}$

3 - 6 =

- II. Jose wanted to share 18 strawberries with his brother equally. Draw a picture to show how Jose can share the strawberries.

How many strawberries will Jose receive?

 strawberries

- 12.** Hank has 13 grapes. He gives 5 grapes to his sister. How many grapes does Hank have now? Write a number sentence for the problem. Use for the missing number. Then solve.

_____ grapes

2-Digit Addition

The keys of a modern piano are made from wood or plastic. A modern piano has 36 black keys and 52 white keys. How many keys is this in all?

Name _____

Show What You Know

Addition Patterns

Add 2. Complete each addition sentence.

1. $1 + 2 = 3$

4. $4 + \underline{\quad} = \underline{\quad}$

2. $2 + \underline{\quad} = \underline{\quad}$

5. $5 + \underline{\quad} = \underline{\quad}$

3. $3 + \underline{\quad} = \underline{\quad}$

6. $6 + \underline{\quad} = \underline{\quad}$

Addition Facts

Write the sum.

7.
$$\begin{array}{r} 7 \\ + 3 \\ \hline \end{array}$$

8.
$$\begin{array}{r} 8 \\ + 8 \\ \hline \end{array}$$

9.
$$\begin{array}{r} 6 \\ + 7 \\ \hline \end{array}$$

10.
$$\begin{array}{r} 4 \\ + 4 \\ \hline \end{array}$$

11.
$$\begin{array}{r} 9 \\ + 5 \\ \hline \end{array}$$

12.
$$\begin{array}{r} 8 \\ + 7 \\ \hline \end{array}$$

Tens and Ones

Write how many tens and ones for each number.

13. 43

_____ tens _____ ones

14. 68

_____ tens _____ ones

This page checks understanding of important skills needed for success in Chapter 4.

Name _____

Break Apart Ones to Add

Essential Question How does breaking apart a number make it easier to add?

Number and Operations
in Base Ten—2.NBT.5

MATHEMATICAL PRACTICES
MP.4, MP.6

Listen and Draw

Use  . Draw to show what you did.

FOR THE TEACHER • Read the following problem.
Have children use blocks to solve. Griffin read 27 books about animals and 6 books about space.
How many books did he read?

**Math
Talk**

Mathematical Practices

Describe what you did with the blocks.

Model and Draw

Break apart ones to make a ten.
Use this as a way to add.

$$27 + 8 = \underline{\quad? \quad}$$

$$27 + 8 = \underline{\quad\quad}$$

Share and Show

Draw quick pictures. Break apart ones to make a ten. Then add and write the sum.

1. $15 + 7 = \underline{\quad\quad}$

2. $26 + 5 = \underline{\quad\quad}$

3. $37 + 8 = \underline{\quad\quad}$

4. $28 + 6 = \underline{\quad\quad}$

Name _____

On Your Own

Break apart ones to make a ten.
Then add and write the sum.

5. $23 + 9 =$ _____

6. $48 + 5 =$ _____

7. $18 + 5 =$ _____

8. $33 + 9 =$ _____

9. $27 + 6 =$ _____

10. $49 + 4 =$ _____

11. $24 + 8 =$ _____

12. $58 + 7 =$ _____

13. $36 + 8 =$ _____

14. $47 + 9 =$ _____

15. **THINK SMARTER** Bruce sees 29 oak trees and 4 maple trees at the park. Then he sees double the number of pine trees as maple trees. How many trees does Bruce see?

_____ trees

Problem Solving • Applications

Solve. Write or draw to explain.

16. **Go DEEPER** Megan has 38 animal pictures, 5 people pictures, and 3 insect pictures. How many pictures does she have?

_____ pictures

17. **MATHEMATICAL PRACTICE 1 Analyze**

Jamal has a box with some toy cars in it. He puts 3 more toy cars into the box. Now there are 22 toy cars in the box. How many toy cars were in the box before?

_____ toy cars

18. **THINK SMARTER** Dan has 16 pencils. Quentin gives him 5 more pencils. Choose all the ways you can use to find how many pencils Dan has in all.

- ☐ $16 + 5$
- ☐ $16 + 4 + 1$
- ☐ $16 - 5$

TAKE HOME ACTIVITY • Say a number from 0 to 9. Have your child name a number to add to yours to have a sum of 10.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Lesson 4.2

Use Compensation

Essential Question How can you make an addend a ten to help solve an addition problem?

Number and Operations
in Base Ten—2.NBT.5

MATHEMATICAL PRACTICES
MP.4, MP.6

Listen and Draw

Draw quick pictures to show the problems.

FOR THE TEACHER • Have children draw quick pictures to solve this problem. Kara has 47 stickers. She buys 20 more stickers. How many stickers does she have now? Repeat for this problem. Tyrone has 30 stickers and buys 52 more stickers. How many stickers does he have now?

**Math
Talk**

Mathematical Practices

Describe how you found how many stickers Tyrone has.

Model and Draw

Take ones from an addend to make the other addend the next tens number.

$$25 + 48 = ?$$

Adding can be easier when one of the addends is a tens number.

$$\underline{23} + \underline{50} = \underline{\quad}$$

Share and Show

Show how to make one addend the next tens number.
Complete the new addition sentence.

1. $37 + 25 = ?$

$$\underline{40} + \underline{\quad} = \underline{\quad}$$

2. $27 + 46 = ?$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

3. $14 + 29 = ?$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Name _____

On Your Own

Show how to make one addend the next tens number.
Complete the new addition sentence.

4. $18 + 13 = ?$

_____ + _____ = _____

5. $24 + 18 = ?$

_____ + _____ = _____

6. $39 + 19 = ?$

_____ + _____ = _____

Solve. Write or draw to explain.

7. **THINK SMARTER** Zach finds 38 sticks. Kelly finds 27 sticks. How many more sticks do the two children still need if they want 70 sticks in all?

_____ more sticks

Problem Solving • Applications

Solve. Write or draw to explain.

8. **MATHEMATICAL PRACTICE 6** Make Connections

The chart shows the **leaves** that Philip collected. He wants a collection of 52 leaves, using only two colors. Which two colors of leaves should he use?

_____ and _____

Leaves Collected	
Color	Number
green	27
brown	29
yellow	25

9. **THINK SMARTER** Ava has 39 sheets of white paper. She has 22 sheets of green paper. Draw a picture and write to explain how to find the number of sheets of paper Ava has.

Ava has _____ sheets of paper.

TAKE HOME ACTIVITY • Have your child choose one problem on this page and explain how to solve it in another way.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Lesson 4.3

Break Apart Addends as Tens and Ones

Essential Question How do you break apart addends to add tens and then add ones?

Number and Operations
in Base Ten—2.NBT.5

MATHEMATICAL PRACTICES
MP.6, MP.8

Listen and Draw

Write the number. Then write the number as tens plus ones.

+

+

+

**Math
Talk**

Mathematical Practices

What is the value of the 6 in the number 63?

Explain how you know.

FOR THE TEACHER • Direct children's attention to the orange box. Have children write 25 inside the large rectangle. Then ask children to write 25 as tens plus ones. Repeat the activity for 36 and 42.

Model and Draw

Break apart the addends into tens and ones.
Add the tens and add the ones.
Then find the total sum.

$$\begin{array}{r} 27 \longrightarrow 20 + 7 \\ + 48 \longrightarrow 40 + 8 \\ \hline \end{array}$$

$$\underline{60} + \underline{15} = \underline{\quad}$$

Share and Show

Break apart the addends to find the sum.

1. $35 \longrightarrow \underline{\quad} + \underline{\quad}$

$$\begin{array}{r} + 54 \longrightarrow \underline{\quad} + \underline{\quad} \\ \hline \end{array}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

2. $43 \longrightarrow \underline{\quad} + \underline{\quad}$

$$\begin{array}{r} + 29 \longrightarrow \underline{\quad} + \underline{\quad} \\ \hline \end{array}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

3. $56 \longrightarrow \underline{\quad} + \underline{\quad}$

$$\begin{array}{r} + 38 \longrightarrow \underline{\quad} + \underline{\quad} \\ \hline \end{array}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Name _____

On Your Own

Break apart the addends to find the sum.

4. $14 \longrightarrow \underline{\quad} + \underline{\quad}$
 $+ 23 \longrightarrow \underline{\quad} + \underline{\quad}$
 $\underline{\quad} + \underline{\quad} = \underline{\quad}$

5. $37 \longrightarrow \underline{\quad} + \underline{\quad}$
 $+ 45 \longrightarrow \underline{\quad} + \underline{\quad}$
 $\underline{\quad} + \underline{\quad} = \underline{\quad}$

6. $54 \longrightarrow \underline{\quad} + \underline{\quad}$
 $+ 16 \longrightarrow \underline{\quad} + \underline{\quad}$
 $\underline{\quad} + \underline{\quad} = \underline{\quad}$

7. **THINK SMARTER** Julie read 18 pages of her book in the morning. She read the same number of pages in the afternoon. How many pages did she read?

_____ pages

Problem Solving • Applications

Write or draw to explain.

8. **MATHEMATICAL PRACTICE 1** Make Sense of

Problems Len has 35 baseball cards. The rest of his cards are **basketball cards**. He has 58 cards in all. How many basketball cards does he have?

_____ **basketball cards**

9. **MATHEMATICAL PRACTICE 1** Evaluate

Tomás has 17 **pencils**. He buys 26 more pencils. How many pencils does Tomás have now?

_____ **pencils**

Personal Math Trainer

10. **THINK SMARTER +** Sasha used 38 red stickers and 22 blue stickers. Show how you can break apart the addends to find how many stickers Sasha used.

$$\begin{array}{r}
 38 \longrightarrow \underline{\quad\quad} + \underline{\quad\quad} \\
 + 22 \longrightarrow \underline{\quad\quad} + \underline{\quad\quad} \\
 \hline
 \underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}
 \end{array}$$

TAKE HOME ACTIVITY • Write $32 + 48$ on a sheet of paper. Have your child break apart the numbers and find the sum.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Model Regrouping for Addition

Essential Question When do you regroup in addition?

Number and Operations
in Base Ten—2.NBT.5

MATHEMATICAL PRACTICES
MP.5, MP.7

Listen and Draw

Use  to model the problem.
Draw quick pictures to show what you did.

Tens	Ones										
	<table border="1"> <tr><td></td><td></td><td></td><td></td><td></td></tr> <tr><td></td><td></td><td></td><td></td><td></td></tr> </table>										
	<table border="1"> <tr><td></td><td></td><td></td><td></td><td></td></tr> <tr><td></td><td></td><td></td><td></td><td></td></tr> </table>										

FOR THE TEACHER • Read the following problem.
Brandon has 24 books. His friend Mario has 8 books. How many books do they have?

**Math
Talk**

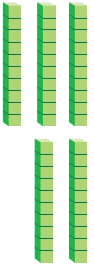

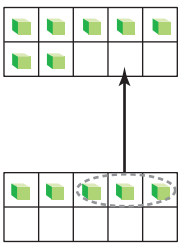

Mathematical Practices

Describe how you made a ten in your model.

Model and Draw

Add 37 and 25.

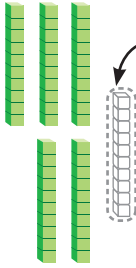

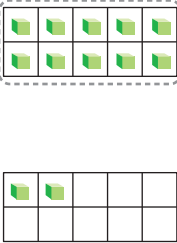

Step 1 Look at the ones. Can you make a ten?

Tens	Ones
	

yes

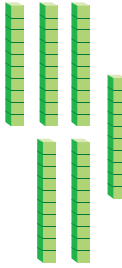

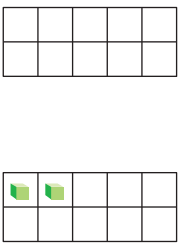

no

Step 2 If you can make a ten, **regroup**.

Tens	Ones
	

Trade 10 ones for 1 ten to regroup.

Step 3 Write how many tens and ones. Write the sum.

Tens	Ones
	

_____ tens _____ ones

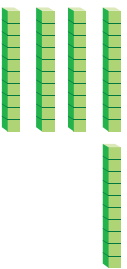

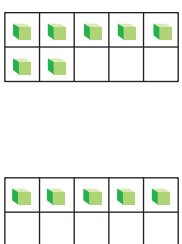

Share and Show

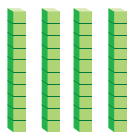

Draw to show the regrouping. Write how many tens and ones in the sum. Write the sum.

1. Add 47 and 15.

Tens	Ones
	

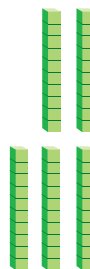

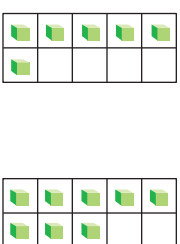

_____ tens _____ ones

2. Add 48 and 8.

Tens	Ones
	

_____ tens _____ ones

3. Add 26 and 38.

Tens	Ones
	

_____ tens _____ ones

Name _____

On Your Own

Draw to show if you regroup. Write how many tens and ones in the sum. Write the sum.

4. Add 79 and 6.

_____ tens _____ ones

5. Add 18 and 64.

_____ tens _____ ones

6. Add 23 and 39.

_____ tens _____ ones

7. Add 54 and 25.

_____ tens _____ ones

8. Add 33 and 7.

_____ tens _____ ones

9. Add 27 and 68.

_____ tens _____ ones

10. **THINK SMARTER** Kara has 25 toy animals and 12 books. Jorge has 8 more toy animals than Kara has. How many toy animals does Jorge have?

_____ toy animals

Problem Solving • Applications

Write or draw to explain.

II. **MATHEMATICAL PRACTICE** 1 **Make Sense of**

Problems Mrs. Sanders has two fish tanks. There are 14 fish in the small tank. There are 27 fish in the large tank. How many fish are in the two tanks?

_____ fish

12. **THINK SMARTER** Charlie climbed 69 steps. Then he climbed 18 more steps. Show two different ways to find how many steps Charlie climbed.

--	--

Charlie climbed _____ steps.

TAKE HOME ACTIVITY • Ask your child to write a word problem with 2-digit numbers about adding two groups of stamps.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Model and Record 2-Digit Addition

Essential Question How do you record 2-digit addition?

Number and Operations in Base Ten—2.NBT.5 *Also 2.NBT.9*

21. **THINK SMARTER** For which of the problems above could you find the sum without rewriting it? Explain.

Problem Solving • Applications

Use the table.
Write or draw to
show how you
solved the problem.

Points Scored This Season	
Player	Number of Points
Anna	26
Lou	37
Becky	23
Kevin	19

22. **MATHEMATICAL PRACTICE 1** Analyze Relationships

Which two players scored 56 points in all? Add to check your answer.

_____ and _____

23. **THINK SMARTER** Shawn says he can find the sum of $20 + 63$ without rewriting it. Explain how to find the sum using mental math.

TAKE HOME ACTIVITY • Have your child write and solve another problem, using the table above.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

PROBLEM SOLVING

Lesson 4.9

Problem Solving • Addition

Essential Question How can drawing a diagram help when solving addition problems?

Operations and Algebraic Thinking—2.OA.1 Also 2.NBT.5

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.4

Kendra had 13 crayons. Her dad gave her some more crayons. Then she had 19 crayons. How many crayons did Kendra's dad give her?

Unlock the Problem

What do I need to find?

how many crayons

Kendra's dad gave her

What information do I need to use?

She had _____ crayons.

After he gave her some more crayons, she had _____ crayons.

Show how to solve the problem.

There are 19 crayons in all.

$$13 + \square = 19$$

_____ crayons

HOME CONNECTION • Your child used a bar model and a number sentence to represent the problem. These help show what the missing amount is in order to solve the problem.

Try Another Problem

Label the bar model. Write a number sentence with a \square for the missing number. Solve.

- What do I need to find?
- What information do I need to use?

1. Mr. Kane has 24 red pens. He buys 19 blue pens. How many pens does he have now?

_____ pens

2. Hannah has 10 pencils. Jim and Hannah have 17 pencils altogether. How many pencils does Jim have?

_____ pencils

**Math
Talk**

Mathematical Practices

Explain how you know if an amount is a part or the whole in a problem.

Name _____

Share and Show

Label the bar model. Write a number sentence with a  for the missing number. Solve.

3. Aimee and Matthew catch 17 crickets in all. Aimee catches 9 crickets. How many crickets does Matthew catch?

_____ crickets

4. Percy counts 16 grasshoppers at the park. He counts 15 grasshoppers at home. How many grasshoppers does Percy count?

_____ grasshoppers

5. **THINK SMARTER** There are three groups of owls. There are 17 owls in each of the first two groups. There are 53 owls in all. How many owls are in the third group?

_____ owls

On Your Own

WRITE Math

Write or draw to explain.

6. There are 37 **paper clips** in the box and 24 paper clips on the table. How many paper clips in all are there?

_____ **paper clips**

7. **MATHEMATICAL PRACTICE 1** **Make Sense of Problems**

Jeff has 19 **postcards** and 2 pens. He buys 20 more postcards. How many postcards does he have now?

_____ **postcards**

8. **Go DEEPER** Alicia drew 15 **flowers**. Marie drew 4 more flowers than Alicia drew. How many flowers did they draw?

_____ **flowers**

9. **THINK SMARTER** There are 23 books in a box. There are 29 books on a shelf. How many books are there?

_____ **books**

TAKE HOME ACTIVITY • Ask your child to explain how to solve one of the problems above.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Math Talk

Mathematical Practices

Explain how you found the number of children on the bus.

FOR THE TEACHER • Read the following problem and have children choose their own methods for solving. There are 15 children on the bus. Then 9 more children get on the bus. How many children are on the bus now?

Model and Draw

You can write a number sentence to show a problem.

Sandy has 16 pencils. Nancy has 13 pencils. How many pencils do the two girls have?

$$16 + 13 = \square$$

THINK:

$$\begin{array}{r} 16 \text{ pencils} \\ + 13 \text{ pencils} \\ \hline 29 \text{ pencils} \end{array}$$

The two girls have _____ pencils.

Share and Show

Write a number sentence for the problem.
Use a \square for the missing number. Then solve.

1. Carl sees 25 melons at the store. 15 are small and the rest are large. How many melons are large?

_____ melons

2. 83 people went to a movie on Thursday. 53 of them were children and the rest were adults. How many adults were at the movie?

_____ adults

Name _____

On Your Own

Write a number sentence for the problem.
Use a  for the missing number. Then solve.

3. Jake had some stamps. Then he bought 20 more stamps. Now he has 56 stamps. How many stamps did Jake have to start?

_____ stamps

4. **THINK SMARTER** Braden's class went to the park. They saw 26 oak trees and 14 maple trees. They also saw 13 cardinals and 35 blue jays. Compare the number of trees and the number of birds that the class saw.

_____ ○ _____

5. **MATHEMATICAL PRACTICE 6 Explain** Amy needs about 70 paper clips. Without adding, circle 2 boxes that would be close to the amount that she needs.

70 clips

81 clips

54 clips

19 clips

35 clips

32 clips

Explain how you made your choices.

Problem Solving • Applications

6. **MATHEMATICAL PRACTICE** 1 Make Sense of Problems

Mr. Walton baked 24 breads last week.

He baked 28 breads this week. How many

breads did he bake in the two weeks? _____ breads

7. **THINK SMARTER** Denise saw these bags of oranges at the store.

Denise bought 26 oranges. Which two bags of oranges did she buy?

Draw or write to show how you solved the problem.

Explain how you found the numbers that have a sum of 26.

TAKE HOME ACTIVITY • Have your child explain how he or she writes a number sentence to stand for a problem.

FOR MORE PRACTICE:

Name _____

Algebra • Find Sums for 3 Addends**Essential Question** What are some ways to add 3 numbers?**Number and Operations in Base Ten—2.NBT.6****MATHEMATICAL PRACTICES**
MP.6, MP.8**Listen and Draw**

Draw to show each problem.

Math Talk**Mathematical Practices**Which numbers did you add first in the first problem? **Explain** why.**FOR THE TEACHER •** Read the following problem and have children draw to show it. Mr. Kim bought 5 blue balloons, 4 red balloons, and 5 yellow balloons. How many balloons did Mr. Kim buy? Repeat for another problem.

Model and Draw

There are different ways to add three numbers.

How can you add 23, 41, and 17?

Think of different ways to choose digits in the ones **column** to add first.

You can make a ten first. Then add the other ones digit. Then add the tens.

$$\begin{array}{r} 23 \\ 41 \\ + 17 \\ \hline \end{array}$$

$$\begin{array}{l} 3 + 7 = 10 \\ 10 + 1 = 11 \end{array}$$

Add from top to bottom. First add the top two digits in the ones column, then add the next digit. Then add the tens.

$$\begin{array}{r} 23 \\ 41 \\ + 17 \\ \hline \end{array}$$

$$\begin{array}{l} 3 + 1 = 4 \\ 4 + 7 = 11 \end{array}$$

Share and Show

Add.

1.
$$\begin{array}{r} 33 \\ 34 \\ + 32 \\ \hline \end{array}$$

2.
$$\begin{array}{r} 47 \\ 21 \\ + 7 \\ \hline \end{array}$$

3.
$$\begin{array}{r} 65 \\ 13 \\ + 15 \\ \hline \end{array}$$

4.
$$\begin{array}{r} 58 \\ 27 \\ + 22 \\ \hline \end{array}$$

5.
$$\begin{array}{r} 12 \\ 22 \\ + 36 \\ \hline \end{array}$$

6.
$$\begin{array}{r} 10 \\ 42 \\ + 36 \\ \hline \end{array}$$

7.
$$\begin{array}{r} 31 \\ 21 \\ + 16 \\ \hline \end{array}$$

8.
$$\begin{array}{r} 30 \\ 29 \\ + 48 \\ \hline \end{array}$$

Name _____

On Your Own

Add.

$$\begin{array}{r} 9. \quad 22 \\ 27 \\ + 18 \\ \hline \end{array}$$

$$\begin{array}{r} 10. \quad 26 \\ 31 \\ + 19 \\ \hline \end{array}$$

$$\begin{array}{r} 11. \quad 24 \\ 11 \\ + 53 \\ \hline \end{array}$$

$$\begin{array}{r} 12. \quad 33 \\ 43 \\ + 4 \\ \hline \end{array}$$

$$\begin{array}{r} 13. \quad 40 \\ 17 \\ + 32 \\ \hline \end{array}$$

$$\begin{array}{r} 14. \quad 25 \\ 25 \\ + 25 \\ \hline \end{array}$$

$$\begin{array}{r} 15. \quad 19 \\ 65 \\ + 24 \\ \hline \end{array}$$

$$\begin{array}{r} 16. \quad 73 \\ 4 \\ + 16 \\ \hline \end{array}$$

$$\begin{array}{r} 17. \quad 35 \\ 24 \\ + 58 \\ \hline \end{array}$$

$$\begin{array}{r} 18. \quad 32 \\ 18 \\ + 28 \\ \hline \end{array}$$

$$\begin{array}{r} 19. \quad 42 \\ 31 \\ + 12 \\ \hline \end{array}$$

$$\begin{array}{r} 20. \quad 70 \\ 18 \\ + 17 \\ \hline \end{array}$$

21. **THINK SMARTER** Sophia had 44 marbles. She bought 24 more marbles. Then John gave her 35 marbles. How many marbles does Sophia have now?

_____ marbles

Problem Solving • Applications

Solve. Write or draw to explain.

- 22.** **MATHEMATICAL PRACTICE** **Evaluate** Mrs. Shaw has 23 red notebooks, 15 blue notebooks, and 27 green notebooks. How many notebooks does she have?

_____ notebooks

- 23.** **MATHEMATICAL PRACTICE** **Model Mathematics**
Write a story problem that could be solved using this number sentence.

$$12 + 28 + \blacksquare = 53$$

- 24.** **THINK SMARTER** Mr. Samson gave his students 31 yellow pencils, 27 red pencils, and 25 blue pencils. How many pencils did he give to his students?

_____ pencils

TAKE HOME ACTIVITY • Ask your child to show you two ways to add 17, 13, and 24.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Algebra • Find Sums for 4 Addends

Essential Question What are some ways to add 4 numbers?

Number and Operations in Base Ten—2.NBT.6

MATHEMATICAL PRACTICES
MP.6, MP.8

Listen and Draw

Show how you solved each problem.

Math Talk

Mathematical Practices

Describe how you found the answer to the first problem.

FOR THE TEACHER • Read this problem and have children choose a way to solve it. Shelly counts 16 ants in her ant farm. Pedro counts 22 ants in his farm. Tara counts 14 ants in her farm. How many ants do the 3 children count? Repeat for another problem.

Model and Draw

You can add digits in a column in more than one way. Add the ones first. Then add the tens.

Find a sum that you know.
Then add to it.

$$\begin{array}{r} 31 \\ 14 \\ 27 \\ + 24 \\ \hline \end{array}$$

THINK:
 $8 + 1 = 9$, then add on
7 more. The sum of
the ones
is 16 ones.

Add pairs of digits first.
Then add these sums.

$$\begin{array}{r} 31 \\ 14 \\ 27 \\ + 24 \\ \hline \end{array}$$

THINK:
 $5 + 11 = 16$,
so there are 16
ones in all.

Chapter 4 Review/Test

1. Beth baked 24 carrot muffins. She baked 18 apple muffins. How many muffins did Beth bake?

Label the bar model. Write a number sentence with a for the missing number. Solve.

--	--

_____ muffins

2. Carlos has 23 red keys, 36 blue keys, and 44 green keys. How many keys does he have?

Carlos has	67	keys.
	80	
	103	

3. Mike sees 17 blue cars and 25 green cars at the toy store. How many cars does he see?

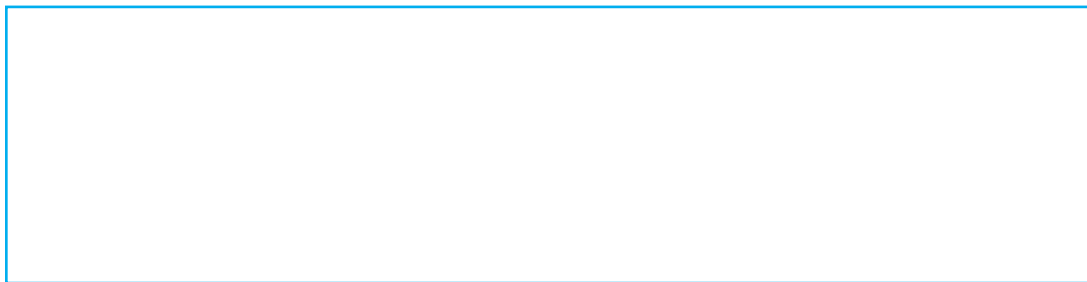

<input type="radio"/> $\begin{array}{r} 17 \\ + 25 \\ \hline \end{array}$	<input type="radio"/> $\begin{array}{r} 25 \\ - 17 \\ \hline \end{array}$	<input type="radio"/> $\begin{array}{r} 25 \\ + 17 \\ \hline \end{array}$	<input type="radio"/> $\begin{array}{r} 17 \\ + 17 \\ \hline \end{array}$
---	---	---	---

Mike sees _____ cars.

Describe how you solved the problem.

4. Jerry has 53 pencils in one drawer. He has 27 pencils in another drawer.

Draw a picture or write to explain how to find the number of pencils in both drawers.

Jerry has _____ pencils.

5. Lauren sees 14 birds. Her friend sees 7 birds. How many birds do Lauren and her friend see? Draw quick pictures to solve. Write the sum.

Tens	Ones

_____ birds

Did you regroup to find the answer? Explain.

6. Matt says he can find the sum of $45 + 50$ without rewriting it. Explain how you can solve this problem using mental math.

Name _____

7. Ling sees the three signs at the theater.

Section A
35 seats

Section B
43 seats

Section C
17 seats

Which two sections have 78 seats?

Explain how you made your choices.

8. Leah put 21 white marbles, 31 black marbles, and 7 blue marbles in a bag. Then her sister added 19 yellow marbles.

Write a number sentence to show the number of marbles in the bag.

9. Nicole made a necklace. She used 13 red beads and 26 blue beads. Show how you can break apart the addends to find how many beads Nicole used.

$$\begin{array}{rcl} 13 & \longrightarrow & \underline{\hspace{1cm}} + \underline{\hspace{1cm}} \\ + 26 & \longrightarrow & \underline{\hspace{1cm}} + \underline{\hspace{1cm}} \\ \hline & & \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} \end{array}$$

- 10.** Without finding the sums, does the pair of addends have a sum greater than 100? Choose Yes or No.

$51 + 92$

☐ Yes

☐ No

$42 + 27$

☐ Yes

☐ No

$82 + 33$

☐ Yes

☐ No

$62 + 14$

☐ Yes

☐ No

Explain how you decided which pairs have a sum greater than 100.

- 11.** Leslie finds 24 paper clips in her desk. She finds 8 more paper clips in her pencil box. Choose all the ways you can use to find how many paper clips Leslie has in all.

☐ $24 + 8$

☐ $24 - 8$

☐ $24 + 6 + 2$

- 12.** Mr. O'Brien visited a lighthouse. He climbed 26 stairs. Then he climbed 64 more stairs to the top. How many stairs did he climb at the lighthouse?

_____ stairs

2-Digit Subtraction

Curious about Math

There are hundreds of different kinds of dragonflies. If 52 dragonflies are in a garden and 10 fly away, how many dragonflies are left? How many are left if 10 more fly away?

Lesson 5.1

Algebra • Break Apart Ones to Subtract

Essential Question How does breaking apart a number make subtracting easier?

Number and Operations
in Base Ten—2.NBT.5

MATHEMATICAL PRACTICES
MP.5, MP.8

Listen and Draw

Write two addends for each sum.

**Math
Talk**

Mathematical Practices

Describe how you chose addends for each sum.

FOR THE TEACHER • After children have recorded addends for each sum, have a class discussion about the different facts that children represented on their papers.

Model and Draw

Break apart ones. Subtract in two steps.

$$63 - 7 = \square$$

Start at 63.
Subtract 3 to get
to 60. Then subtract
4 more.

So, $63 - 7 = \underline{\quad\quad}$.

Share and Show

Break apart ones to subtract. Write the difference.

1. $55 - 8 = \underline{\quad\quad}$

2. $42 - 5 = \underline{\quad\quad}$

3. $41 - 9 = \underline{\quad\quad}$

4. $53 - 6 = \underline{\quad\quad}$

5. $44 - 7 = \underline{\quad\quad}$

6. $52 - 8 = \underline{\quad\quad}$

Name _____

On Your Own

Break apart ones to subtract. Write the difference.

7. $75 - 7 =$ _____

8. $86 - 8 =$ _____

9. $82 - 5 =$ _____

10. $83 - 7 =$ _____

11. $72 - 7 =$ _____

12. $76 - 9 =$ _____

13. $85 - 8 =$ _____

14. $71 - 6 =$ _____

15. **THINK SMARTER** Cheryl brought 27 bagels for the bake sale. Mike brought 24 bagels. They sold all but 9 of them. How many bagels did they sell?

_____ bagels

16. **MATHEMATICAL PRACTICE 1** **Analyze** Lexi has 8 fewer crayons than Ken. Ken has 45 crayons. How many crayons does Lexi have?

_____ crayons

Problem Solving • Applications

Write or draw to explain.

17. Cheryl built a toy train with 27 train cars. Then she added 18 more train cars. How many train cars are on the toy train now?

_____ train cars

18. **MATHEMATICAL PRACTICE 1** Analyze

Samuel had 46 marbles. He gave some marbles to a friend and has 9 marbles left. How many marbles did Samuel give to his friend?

_____ marbles

19. **THINK SMARTER** Matthew had 73 blocks. He gave 8 blocks to his sister. How many blocks does Matthew have now?

Draw or write to show how to solve the problem.

Matthew has _____ blocks now.

TAKE HOME ACTIVITY • Ask your child to describe how to find $34 - 6$.

FOR MORE PRACTICE:

Mathematical Practices

Describe why you traded a tens block for 10 ones blocks.

FOR THE TEACHER • Read the following problem. Michelle counted 21 butterflies in her garden. Then 7 butterflies flew away. How many butterflies were still in the garden?

Model and Draw

How do you subtract 26 from 53?

Step 1 Show 53. Are there enough ones to subtract 6?

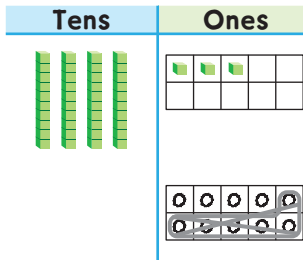

yes

no

Step 2 If there are not enough ones, regroup 1 ten as 10 ones.

Step 3 Subtract 6 ones from 13 ones.

Step 4 Subtract the tens. Write the tens and ones. Write the difference.

___ tens ___ ones

Share and Show

Draw to show the regrouping. Write the difference two ways. Write the tens and ones. Write the number.

1. Subtract 13 from 41.

___ tens ___ ones

2. Subtract 9 from 48.

___ tens ___ ones

3. Subtract 28 from 52.

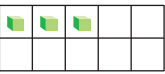

___ tens ___ ones

Name _____

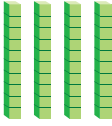

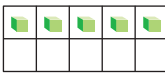

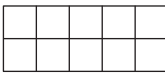

On Your Own

Draw to show the regrouping. Write the difference two ways. Write the tens and ones. Write the number.

Standards Practice Book

Name _____

Add to Find Differences

Essential Question How can you use addition to solve subtraction problems?

Number and Operations
in Base Ten—2.NBT.5

MATHEMATICAL PRACTICES
MP.5, MP.8

Listen and Draw

Draw pictures to show the problem.
Then write a number sentence for your drawing.

_____ markers

Now draw pictures to show the next part of the problem. Write a number sentence for your drawing.

_____ markers

FOR THE TEACHER • Have children draw pictures to represent this problem. Sophie had 25 markers. She gave 3 markers to Josh. How many markers does Sophie have now? Then ask children: How many markers will Sophie have if Josh gives the 3 markers back to her?

**Math
Talk**

Mathematical Practices

Describe what happens when you add back the number that you had subtracted.

Model and Draw

Count up from the number you are subtracting to find the difference.

$$45 - 38 = \square$$

Start at 38. Count up to 40.

Then count up 5 more to 45.

$$2 + 5 = 7$$

So, $45 - 38 = \underline{\quad}$.

Share and Show

Use the number line. Count up to find the difference.

1. $36 - 27 = \underline{\quad}$

2. $56 - 49 = \underline{\quad}$

3. $64 - 58 = \underline{\quad}$

Name _____

On Your Own

Use the number line. Count up to find the difference.

4. $33 - 28 = \underline{\hspace{2cm}}$

5. $45 - 37 = \underline{\hspace{2cm}}$

6. $58 - 49 = \underline{\hspace{2cm}}$

7. **THINK SMARTER** There were 55 books on the table. Sandra picked up some of the books. Now there are 49 books on the table. How many books did Sandra pick up?

 books

Problem Solving • Applications

Solve. You may wish to use the number line to help.

8. There are 46 **game pieces** in a box. Adam takes 38 game pieces out of the box. How many game pieces are still in the box?

_____ **game pieces**

9. **THINK SMARTER** Rachel had 27 craft sticks. Then she gave 19 craft sticks to Theo. How many craft sticks does Rachel have now?

Circle the number from the box to make the sentence true.

Rachel has

6
7
8

 craft sticks now.

Explain how you can use addition to solve the problem.

TAKE HOME ACTIVITY • Have your child describe how he or she used a number line to solve one problem in this lesson.

FOR MORE PRACTICE:

PROBLEM SOLVING

Lesson 5.4

Problem Solving • Subtraction

Essential Question How can drawing a diagram help when solving subtraction problems?

Operations and Algebraic Thinking—2.OA.1; Also 2.NBT.5

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.4

Jane and her mom made 33 puppets for the craft fair. They sold 14 puppets. How many puppets do they still have?

Unlock the Problem

What do I need to find?

how many puppets

they still have

What information do I need to use?

They made _____ puppets.

They sold _____ puppets.

Show how to solve the problem.

$$33 - 14 = \square$$

_____ puppets

HOME CONNECTION • Your child used a bar model and a number sentence to represent the problem. Using a bar model helps show what is known and what is needed to solve the problem.

Try Another Problem

Label the bar model. Write a number sentence with a \square for the missing number. Solve.

- Carlette had a box of 46 craft sticks. She used 28 craft sticks to make a sailboat. How many craft sticks were not used?

- What do I need to find?
- What information do I need to use?

A bar model for problem 1. It consists of a large rectangle with a decorative border of purple and blue dots. Inside, there is a smaller rectangle divided into two sections. The left section is labeled with a blue line and the right section is labeled with a blue line. Below the bar model, there is a blank line for the number sentence and a blank line followed by the text "craft sticks" for the answer.

- Rob's class made 31 clay bowls. Sarah's class made 15 clay bowls. How many more clay bowls did Rob's class make than Sarah's class?

A bar model for problem 2. It consists of a large rectangle with a decorative border of purple and blue dots. Inside, there is a smaller rectangle divided into two sections. The top section is labeled with a blue line and the bottom section is labeled with a blue line. Below the bar model, there is a blank line for the number sentence and a blank line followed by the text "more clay bowls" for the answer.

**Math
Talk**

Mathematical Practices

Explain how you know that Exercise 1 is a take-away problem.

Name _____

Share and Show

Label the bar model. Write a number sentence with a \square for the missing number. Solve.

3. Mr. Hayes makes 32 wooden frames. He gives away 15 frames as gifts. How many frames does he still have?

_____ frames

4. Wesley has 21 ribbons in a box. He has 15 ribbons on the wall. How many more ribbons does he have in the box than on the wall?

_____ more ribbons

5. **THINK SMARTER** Jennifer wrote 9 poems at school and 11 poems at home. She wrote 5 more poems than Nell. How many poems did Nell write?

_____ poems

On Your Own

WRITE Math

6. **Go DEEPER** There are 70 children. 28 children are hiking and 16 are at a picnic. The rest of the children are playing soccer. How many children are playing soccer?

Draw a model with bars for the problem. Describe how your drawing shows the problem. Then solve the problem.

7. **THINK SMARTER** There are 48 crackers in a bag. The children eat 25 crackers. How many crackers are still in the bag? Circle the bar model that can be used to solve the problem.

48

73

25

Write a number sentence with a for the missing number. Solve.

_____ crackers

TAKE HOME ACTIVITY • Ask your child to explain how he or she solved one of the problems on this page.

Listen and Draw

Draw to show the problem. Write a number sentence. Then solve.

Math Talk

Mathematical Practices

Describe how your drawing shows the problem.

FOR THE TEACHER • Read this problem to children. Franco has 53 crayons. He gives some crayons to Courtney. Now Franco has 38 crayons. How many crayons did Franco give to Courtney?

Model and Draw

You can write a number sentence to show a problem.

Liza has 65 postcards. She gives 24 postcards to Wesley. How many postcards does Liza have now?

$$\underline{65 - 24 = \square}$$

THINK:

$$\begin{array}{r} 65 \text{ postcards} \\ -24 \text{ postcards} \\ \hline 41 \text{ postcards} \end{array}$$

Liza has _____ postcards now.

Share and Show

Write a number sentence for the problem.
Use a \square for the missing number. Then solve.

1. There were 32 birds in the trees. Then 18 birds flew away. How many birds are in the trees now?

_____ birds

2. Carla read 43 pages in her book. Joe read 32 pages in his book. How many more pages did Carla read than Joe?

_____ more pages

Name _____

On Your Own

Write a number sentence for the problem.
Use a for the missing number. Then solve.

3. There were 40 **ants** on a rock.
Some ants moved to the
grass. Now there are 26 ants
on the rock. How many ants
moved to the grass?

_____ **ants**

4. **THINK SMARTER** Keisha had a bag
of **ribbons**. She took 29 ribbons
out of the bag. Then there
were 17 ribbons still in the bag.
How many ribbons were in the
bag to start?

_____ **ribbons**

5. **GO DEEPER** There are 50 **bees** in
a hive. Some bees fly out.
If fewer than 20 bees are still
in the hive, how many bees
could have flown out?

_____ **bees**

Use subtraction to prove your
answer.

Problem Solving • Applications

6. MATHEMATICAL PRACTICE 6 Make Connections

Brendan made this number line to find a difference. What was he subtracting from 100? Explain your answer.

7. **THINK SMARTER** There are 52 pictures on the wall. 37 are wild cats and the rest are birds. How many of the pictures are birds?

Use the numbers and symbols on the tiles to complete the number sentence for the problem.

15	25	37	52	—	+	=
----	----	----	----	---	---	---

_____ birds

Label the bar model to show each problem. Then solve.

FOR THE TEACHER • Read this 1st problem for children. Cassie has 32 sheets of paper. She gives Jeff 9 sheets of paper. How many sheets of paper does Cassie have now? After children solve, read this 2nd problem. Cassie draws 18 pictures. Jeff draws 16 pictures. How many pictures do they draw?

Math Talk

Mathematical Practices

Describe how the two bar models are different.

Model and Draw

Bar models help you know what to do to solve a problem.

Ali has 27 stamps. Matt has 38 stamps. How many more stamps are needed so they will have 91 stamps?

First, find how many stamps they have now.

They have _____ stamps now.

Next, find how many more stamps they need.

91

They need _____ more stamps.

Share and Show

Complete the bar models for the steps you do to solve the problem.

THINK: What do you need to find first?

1. Jen has 93 beads. Ana has 46 red beads and 29 blue beads. How many more beads does Ana need to have 93 beads also?

_____ more beads

Name _____

On Your Own

Complete the bar models for the steps you do to solve the problem.

2. Max has 35 trading **cards**. He buys 22 more cards. Then he gives 14 cards to Rudy. How many cards does Max have now?

_____ **cards**

3. Drew has 32 **toy cars**. He trades 7 of those cars for 11 other toy cars. How many toy cars does Drew have now?

_____ **toy cars**

4. Marta and Debbie each have 17 **ribbons**. They buy 1 package with 8 ribbons in it. How many ribbons do they have now?

_____ **ribbons**

Problem Solving • Applications

5. **THINK SMARTER** Shelby had 32 rocks. She finds 33 more rocks at the park and gives 28 rocks to George. How many rocks does she have now?

_____ rocks

6. **Go DEEPER** Benjamin finds 31 pinecones at the park. Together, Jenna and Ellen find the same number of pinecones as Benjamin. How many pinecones could each girl have found?

Jenna: _____ pinecones

Ellen: _____ pinecones

7. **THINK SMARTER** Tanya finds 22 leaves. Maurice finds 5 more leaves than Tanya finds. How many leaves do the children find? Draw to show how you solve the problem.

_____ leaves

TAKE HOME ACTIVITY • Have your child explain how he or she would solve Exercise 6 if the number 31 was changed to 42.

FOR MORE PRACTICE:

Name _____

Chapter 5 Review/Test

- I.** Do you need to regroup to subtract? Choose Yes or No.

65 – 23

☐ Yes

☐ No

50 – 14

☐ Yes

☐ No

37 – 19

☐ Yes

☐ No

77 — 60

☐ Yes

☐ No

- 2.** Use the number line. Count up to find the difference.

$$52 - 48 = \underline{\hspace{2cm}}$$

3. Ed has 28 blocks. Sue has 34 blocks. Who has more blocks? How many more? Label the bar model. Solve.

Circle the word and number from each box to make the sentence true.

Ed
Sue

has

6

16

52

more blocks.

**Break apart the number you are subtracting.
Write the difference?**

4. $42 - 8 = \underline{\hspace{2cm}}$

5. $53 - 16 = \underline{\hspace{2cm}}$

6. What is $33 - 19$? Use the numbers on the tiles to rewrite the subtraction problem. Then find the difference.

$$\begin{array}{r} \underline{\hspace{2cm}} \\ - \hspace{2cm} \\ \hline \hspace{2cm} \\ \hline \hspace{2cm} \end{array}$$

7. Jacob's puzzle has 84 pieces. Jacob puts together 27 pieces in the morning. He puts together 38 more pieces in the afternoon. How many pieces does Jacob need to put together to finish the puzzle?

Complete the bar models for the steps you do to solve the problem.

 more pieces

Name _____

Regroup if you need to. Write the difference.

8.

	Tens	Ones
	<input type="text"/>	<input type="text"/>
	5	5
—	2	8

9.

	Tens	Ones
	<input type="text"/>	<input type="text"/>
	3	2
—	1	2

10. Find the difference.

$$\begin{array}{r} 90 \\ - 62 \\ \hline \end{array}$$

Fill in the bubble next to one number from each column to show the difference.

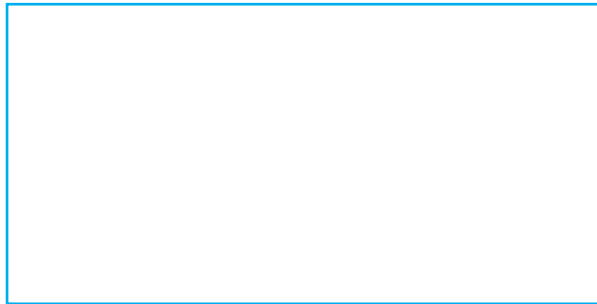

Tens	Ones
<input type="radio"/> 2	<input type="radio"/> 1
<input type="radio"/> 3	<input type="radio"/> 2
<input type="radio"/> 5	<input type="radio"/> 8

11. There are 22 children at the park. 5 children are on the swings. The rest of the children are playing ball. How many children are playing ball?

- ☐ 13
 ☐ 23
 ☐ 17
 ☐ 27

12. Subtract 27 from 43. Draw to show the regrouping. Fill in the bubble next to all the ways to write the difference.

- ☐ 1 ten 6 ones
☐ 66
☐ 6 tens 1 one
☐ 16

13. Jill collects stamps. Her stamp book has space for 64 stamps. She needs 18 more stamps to fill the book. How many stamps does Jill have now?

Write a number sentence for the problem.

Use a  for the missing number. Then solve.

Jill has _____ stamps.

14. Draw a quick picture to solve. Write the difference.

	Tens	Ones
	<input type="text"/>	<input type="text"/>
	6	2
—	2	5

Tens	Ones

Explain what you did to find the difference.

3-Digit Addition and Subtraction

Monarch butterflies roost together during migration.

If you count 83 butterflies on one tree and 72 on another, how many butterflies have you counted altogether?

Name _____

Show What You Know

Model Subtracting Tens

Write the difference.

$$5 \text{ tens} - 3 \text{ tens} = \underline{\quad} \text{ tens}$$

$$50 - 30 = \underline{\quad}$$

$$7 \text{ tens} - 2 \text{ tens} = \underline{\quad} \text{ tens}$$

$$70 - 20 = \underline{\quad}$$

2-Digit Addition

Write the sum.

3.
$$\begin{array}{r} 54 \\ + 25 \\ \hline \end{array}$$

4.
$$\begin{array}{r} 35 \\ + 18 \\ \hline \end{array}$$

5.
$$\begin{array}{r} 82 \\ + 67 \\ \hline \end{array}$$

6.
$$\begin{array}{r} 29 \\ + 81 \\ \hline \end{array}$$

Hundreds, Tens, and Ones

Write the hundreds, tens, and ones shown. Write the number.

Hundreds	Tens	Ones

Vocabulary Builder

Review Words

regroup

sum

difference

hundreds

Visualize It

Fill in the graphic organizer by writing examples of ways to **regroup**.

Understand Vocabulary

1. Write a number that has a **hundreds** digit that is greater than its tens digit.

2. Write an addition sentence that has a **sum** of 20.

3. Write a subtraction sentence that has a **difference** of 10.

2-Digit Shuffle

Materials

- number cards 10–50
- 15  • 15 

Play with a partner.

- 1 Shuffle the number cards. Place them face down in a pile.
- 2 Take two cards. Say the sum of the two numbers.
- 3 Your partner checks your sum.
- 4 If your sum is correct, place a counter on a button. If you regrouped to solve, place a counter on another button.
- 5 Take turns. Cover all the buttons. The player with more counters on the board wins.
- 6 Repeat the game, saying the difference between the two numbers for each turn.

Name _____

Draw to Represent 3-Digit Addition

Essential Question How do you draw quick pictures to show adding 3-digit numbers?

Number and Operations
in Base Ten—2.NBT.7

MATHEMATICAL PRACTICES
MP.5, MP.6

Listen and Draw

Draw quick pictures to model the problem.
Then solve.

Tens	Ones

_____ pages

**Math
Talk**

Mathematical Practices

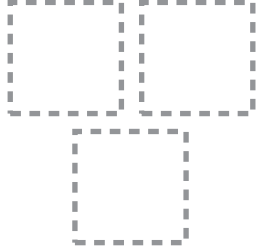

Explain how your quick pictures show the problem.

FOR THE TEACHER • Read this problem to children. Manuel read 45 pages in a book. Then he read 31 more pages. How many pages did Manuel read? Have children draw quick pictures to solve the problem.

Model and Draw

Add 234 and 141.

Hundreds	Tens	Ones
		

3 hundreds 7 tens 5 ones
375

Share and Show

Draw quick pictures. Write how many hundreds, tens, and ones in all. Write the number.

1. Add 125 and 344.

Hundreds	Tens	Ones
		

_____ hundreds _____ tens _____ ones

2. Add 307 and 251.

Hundreds	Tens	Ones

_____ hundreds _____ tens _____ ones

Name _____

On Your Own

Draw quick pictures. Write how many hundreds, tens, and ones in all. Write the number.

3. Add 231 and 218.

Hundreds	Tens	Ones

_____ hundreds _____ tens _____ ones

4. Add 232 and 150.

Hundreds	Tens	Ones

_____ hundreds _____ tens _____ ones

5. **THINK SMARTER** Use the quick pictures to find the two numbers being added. Then write how many hundreds, tens, and ones in all. Write the number.

Hundreds	Tens	Ones
 		 

Add _____ and _____.

_____ hundreds _____ tens _____ ones

Problem Solving • Applications

6. **MATHEMATICAL PRACTICE** 2 Represent a Problem

There are 125 poems in Carrie's book and 143 poems in Angie's book. How many poems are in these two books?

Draw a quick picture to solve.

_____ poems

Personal Math Trainer

7. **THINK SMARTER +** Rhys wants to add 456 and 131.

Help Rhys solve this problem. Draw quick pictures. Write how many hundreds, tens, and ones in all. Write the number.

Hundreds	Tens	Ones

_____ hundreds _____ tens _____ ones

TAKE HOME ACTIVITY • Write $145 + 122$. Have your child explain how he or she can draw quick pictures to find the sum.

4.

$$\begin{array}{r} 391 \\ + 537 \\ \hline \end{array}$$

5. **THINK SMARTER** There are 148 small sand dollars and 119 large sand dollars on the beach. How many sand dollars are on the beach? (2.NBT.7)

_____ sand dollars

Name _____

Lesson 6.6

Estimation in 3-Digit Addition

Essential Question How do you make reasonable estimates when solving problems?

Number and Operations in
Base Ten—2.NBT.7.1

MATHEMATICAL PRACTICES
MP.8

Listen and Draw

How many hundreds does each number have?

427 has _____ hundreds.

651 has _____ hundreds.

348 has _____ hundreds.

What is each sum?

$$\begin{array}{r} 500 \\ + 100 \\ \hline \end{array}$$

$$\begin{array}{r} 300 \\ + 400 \\ \hline \end{array}$$

$$\begin{array}{r} 600 \\ + 200 \\ \hline \end{array}$$

$$\begin{array}{r} 100 \\ + 800 \\ \hline \end{array}$$

FOR THE TEACHER • The activity in the first box is a review of identifying the hundreds digit and describing its value in a 3-digit number. The activity in the second box is for practicing the mental math skill of adding multiples of hundreds.

**Math
Talk**

Mathematical Practices

Describe how you found the sum for each addition problem.

Model and Draw

An **estimate** tells about how many.

Look at the hundreds digits.

$$\begin{array}{r} 518 \\ + 336 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} 500 \\ + 300 \\ \hline 800 \end{array}$$

Use an estimate when
an exact answer is not
needed.

An estimate for the sum is _____.

Share and Show

Use the values of the hundreds digits to
estimate the sum.

1.

$$\begin{array}{r} 257 \\ + 320 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} + \\ \hline \end{array}$$

An estimate for the sum is _____.

2.

$$\begin{array}{r} 719 \\ + 138 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} + \\ \hline \end{array}$$

An estimate for the sum is _____.

3.

$$\begin{array}{r} 231 \\ + 525 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} + \\ \hline \end{array}$$

An estimate for the sum is _____.

Name _____

On Your Own

Use the values of the hundreds digits to estimate the sum.

4.
$$\begin{array}{r} 625 \\ + 309 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} + \\ \hline \end{array}$$

An estimate for the sum is _____.

5. **THINK SMARTER** There are 246 children at Debbie's school. There are 328 children at Jacob's school. Without adding, explain how you could estimate the number of children at the two schools.

6. **MATHEMATICAL PRACTICE 3** **Verify the Reasoning of Others**

There are two boxes of crayons. There are 138 crayons in the first box and 309 crayons in the second box. Manuel estimates that there are about 700 crayons altogether.

Do you agree? Explain why.

Problem Solving • Applications

Solve. Write or draw to explain.

7. **GO DEEPER** Daniel has two boxes of trading cards. There are 327 cards in one box and 418 cards in the other box.

If he buys a pack of 225 cards, estimate the number of cards that he will have then.

Write or draw to show how you made your estimate.

about _____ cards

8. **THINK SMARTER** Andy's family drove 318 miles on Saturday and 553 miles on Sunday. About how far did Andy's family drive in all?

Fill in the bubble next to all the sentences that describe what you would do to estimate the distance.

- ☐ I would add $300 + 500$.
- ☐ I would regroup the tens.
- ☐ I would add the hundreds digits.
- ☐ I would add 100 to the hundreds digits.

TAKE HOME ACTIVITY • Have your child describe what he or she learned in this lesson.

Name _____

PROBLEM SOLVING

Lesson 6.7

Problem Solving • 3-Digit Subtraction

Essential Question How can making a model help when solving subtraction problems?

Number and Operations
in Base Ten—2.NBT.7

MATHEMATICAL PRACTICES
MP.1, MP.4

There were 436 people at the art show.
219 people went home. How many people
stayed at the art show?

What do I need to find?

how many people

_____ stayed at the art show

What information do I need to use?

_____ people were at the art show.

Then, _____ people went home.

Show how to solve the problem.

Make a model. Then draw a quick picture of your model.

_____ people

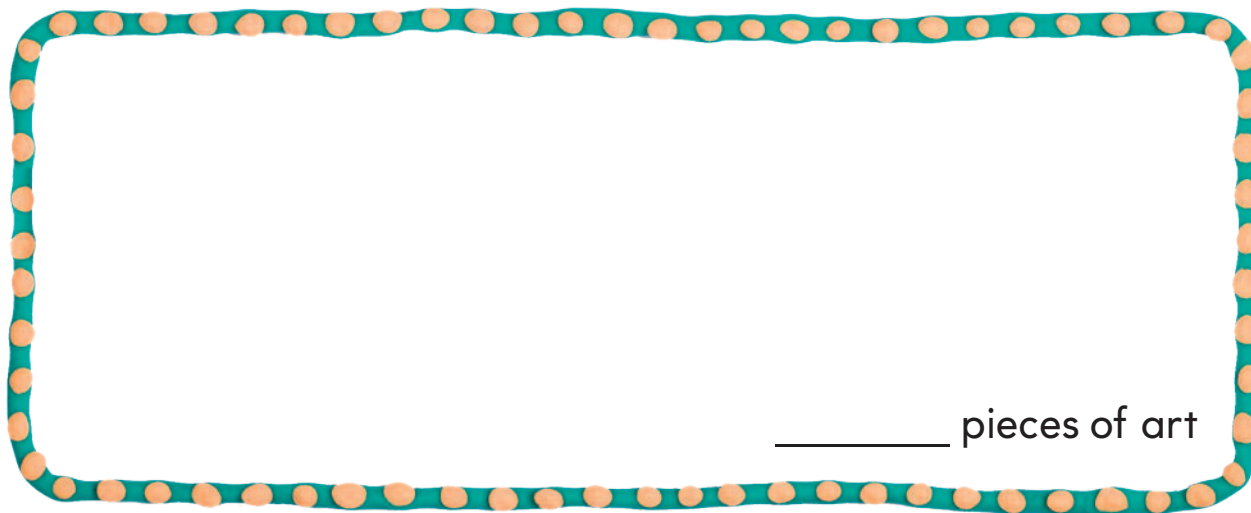

HOME CONNECTION • Your child used a model and a quick picture to represent and solve a subtraction problem.

Try Another Problem

Make a model to solve. Then draw a quick picture of your model.

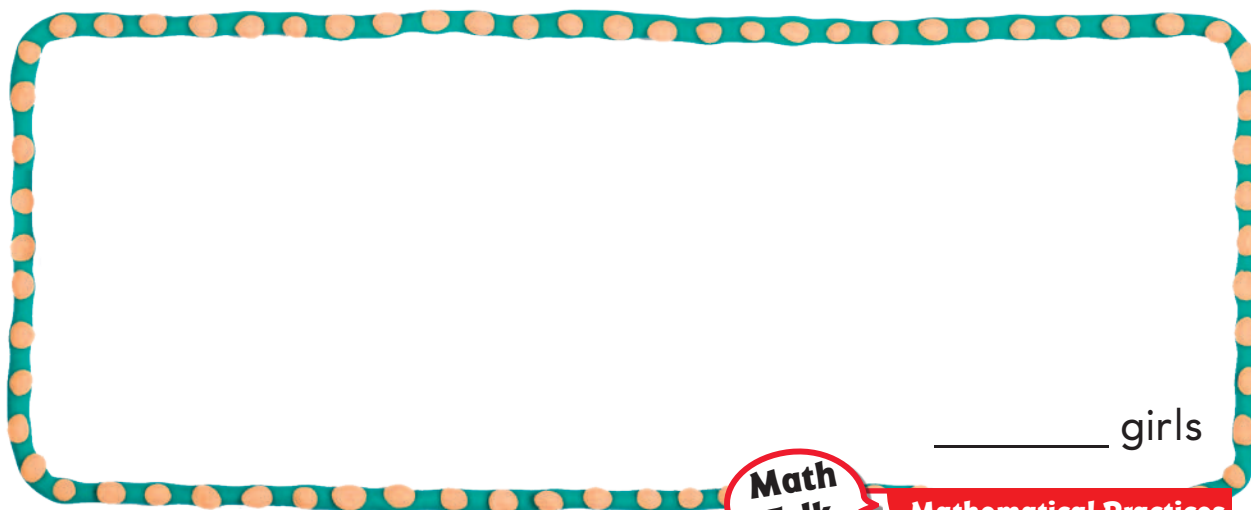

- What do I need to find?
- What information do I need to use?

1. There are 532 pieces of art at the show. 319 pieces of art are paintings. How many pieces of art are not paintings?

_____ pieces of art

2. 245 children go to the face-painting event. 114 of the children are boys. How many of the children are girls?

_____ girls

**Math
Talk**

Mathematical Practices

Explain how you solved the first problem on this page.

Name _____

Share and Show

Make a model to solve. Then draw a quick picture of your model.

3. There were 237 **books** on the table. Miss Jackson took 126 books off the table. How many books were still on the table?

_____ **books**

4. There were 232 **postcards** on the table. The children used 118 postcards. How many postcards were not used?

_____ **postcards**

5. **THINK SMARTER** 164 children and 31 adults saw the movie in the morning. 125 children saw the movie in the afternoon. How many fewer children saw the movie in the afternoon than in the morning?

_____ **fewer children**

**On Your Own****MATHEMATICAL PRACTICE 1****Make Sense of Problems**

6. There were some **grapes** in a bowl. Clancy's friends ate 24 of the grapes. Then there were 175 grapes in the bowl. How many grapes were in the bowl before?

_____ **grapes**

7. **THINK SMARTER** At Gregory's school, there are 547 boys and girls. There are 246 boys. How many girls are there?

Draw a quick picture to solve.

Circle the number that makes the sentence true.

There are

201

301

girls.

793

TAKE HOME ACTIVITY • Ask your child to choose one of the problems in this lesson and solve it in a different way.

Regrouping with Zeros

Essential Question How do you regroup when there are zeros in the number you start with?

Number and Operations in
Base Ten—2.NBT.7

MATHEMATICAL PRACTICES
MP.6, MP.8

Listen and Draw

Draw or write to show how you solved the problem.

FOR THE TEACHER • Read the following problem and have children solve. Mr. Sanchez made 403 cookies. He sold 159 cookies. How many cookies does Mr. Sanchez have now? Encourage children to discuss and show different ways to solve the problem.

**Math
Talk**

Mathematical Practices

Describe another way that you could solve the problem.

Model and Draw

Ms. Dean has a book with 504 pages in it. She has read 178 pages so far. How many more pages does she still have to read?

$$\begin{array}{r} 504 \\ - 178 \\ \hline \end{array}$$

Step 1 There are not enough ones to subtract from.

Since there are 0 tens, regroup 5 hundreds as 4 hundreds 10 tens.

$$\begin{array}{r} 4 \quad 10 \\ 5 \quad 0 \quad 4 \\ - 1 \quad 7 \quad 8 \\ \hline \end{array}$$

Step 2 Next, regroup 10 tens 4 ones as 9 tens 14 ones.

Now there are enough ones to subtract from.

$$14 - 8 = 6$$

$$\begin{array}{r} 9 \\ 4 \quad 10 \quad 14 \\ 5 \quad 0 \quad 4 \\ - 1 \quad 7 \quad 8 \\ \hline 6 \end{array}$$

Step 3 Subtract the tens.

$$9 - 7 = 2$$

Subtract the hundreds.

$$4 - 1 = 3$$

$$\begin{array}{r} 9 \\ 4 \quad 10 \quad 14 \\ 5 \quad 0 \quad 4 \\ - 1 \quad 7 \quad 8 \\ \hline 3 \quad 2 \quad 6 \end{array}$$

Share and Show

Solve. Write the difference.

1.

$$\begin{array}{r} 3 \quad 0 \quad 8 \\ - 2 \quad 5 \quad 9 \\ \hline \end{array}$$

2.

$$\begin{array}{r} 7 \quad 5 \quad 5 \\ - 4 \quad 3 \quad 8 \\ \hline \end{array}$$

Listen and Draw

Which is the nearest hundred to the number?

_____ is the nearest hundred to 181.

_____ is the nearest hundred to 533.

_____ is the nearest hundred to 856.

**Math
Talk**

Mathematical Practices

How can the halfway marks between the hundreds numbers help? **Explain.**

FOR THE TEACHER • For each number line, direct children's attention to the point on the number line with the arrow and number label below it. Have children then determine which hundreds number is closest to that point

Model and Draw

Use the number lines to find the nearest hundred for each number.

Use the nearest hundreds numbers to estimate the difference.

$$\begin{array}{r} 725 \\ - 287 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} 700 \\ - 300 \\ \hline 400 \end{array}$$

An estimate for the difference is _____.

Share and Show

Find the nearest hundred for each number.
Then estimate the difference.

1.
$$\begin{array}{r} 672 \\ - 309 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} \\ - \\ \hline \end{array}$$

An estimate for the difference is _____.

2.
$$\begin{array}{r} 765 \\ - 288 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} \\ - \\ \hline \end{array}$$

An estimate for the difference is _____.

Name _____

On Your Own

Find the nearest hundred for each number.
Then estimate the difference.

3.
$$\begin{array}{r} 518 \\ - 173 \\ \hline \end{array} \quad \longrightarrow \quad \begin{array}{r} \\ - \\ \hline \end{array}$$

An estimate for the difference is _____.

4. **THINK SMARTER** There are 574 people at the game. There are 119 people at the park. Describe how you could estimate how many more people are at the game than the park.

5. **MATHEMATICAL PRACTICE 2** Use Reasoning

At the store, there are 388 apples and 124 plums. Estimate how many more apples than plums are at the store.

about _____ more apples

Problem Solving • Applications

6. **MATHEMATICAL PRACTICE 6 Explain** Monica used $800 - 200$ to estimate the difference for a subtraction problem. Circle the problem that you think she was estimating the difference for.

$$\begin{array}{r} 951 \\ - 126 \\ \hline \end{array}$$

$$\begin{array}{r} 814 \\ - 227 \\ \hline \end{array}$$

$$\begin{array}{r} 735 \\ - 104 \\ \hline \end{array}$$

Explain your choice.

7. **THINK SMARTER** Lin has more beads than Ben. Lin uses $600 - 500$ to estimate how many more beads.

Fill in the bubble next to all the problems she may have been estimating for.

☐
$$\begin{array}{r} 698 \\ - 530 \\ \hline \end{array}$$

☐
$$\begin{array}{r} 602 \\ - 495 \\ \hline \end{array}$$

☐
$$\begin{array}{r} 590 \\ - 511 \\ \hline \end{array}$$

☐
$$\begin{array}{r} 630 \\ - 599 \\ \hline \end{array}$$

TAKE HOME ACTIVITY • Have your child describe how he or she used estimation in this lesson.

<input type="radio"/> 4	<input type="radio"/> 4	<input type="radio"/> 7

4. Anna wants to add 246 and 132.

Help Anna solve this problem. Draw quick pictures.

Write how many hundreds, tens, and ones in all. Write the number.

Hundreds	Tens	Ones

_____ hundreds _____ tens _____ ones

5. Mrs. Preston had 513 leaves. She gave 274 leaves to her students. Draw to show how you found your answer.

--

How many leaves does she still have?

_____ leaves

6. A farmer has 218 pecan trees and 435 walnut trees. About how many trees does he have in all?

How would you estimate the number of trees?

Fill in the bubble next to all the sentences that describe what you would do.

- ☐ I would add the hundreds digits.
- ☐ I would add $18 + 35$.
- ☐ I would regroup the ones.
- ☐ I would add $200 + 400$.

Name _____

7. Amy has 408 beads. She gives 322 beads to her sister. How many beads does Amy have now?

Does the sentence describe how to find the answer? Choose Yes or No.

Regroup 1 ten as 18 ones.

☐ Yes

☐ No

Regroup 1 hundred as 10 tens.

☐ Yes

☐ No

Subtract 2 tens from 10 tens.

☐ Yes

☐ No

Amy has _____ beads.

8. Raul used this method to find the sum $427 + 316$.

$$\begin{array}{r} 427 \\ + 316 \\ \hline 700 \\ 30 \\ + 13 \\ \hline 743 \end{array}$$

Use Raul's method to find this sum.

$$\begin{array}{r} 229 \\ + 313 \\ \hline \end{array}$$

Describe how Raul solves addition problems.

9. Sally scores more points in a game than Ty. Sally uses $900 - 500$ to estimate how many more points.

Fill in the bubble next to all the problems she may have been estimating for.

☐
$$\begin{array}{r} 892 \\ - 502 \\ \hline \end{array}$$

☐
$$\begin{array}{r} 794 \\ - 499 \\ \hline \end{array}$$

☐
$$\begin{array}{r} 922 \\ - 598 \\ \hline \end{array}$$

☐
$$\begin{array}{r} 905 \\ - 510 \\ \hline \end{array}$$

10. Use the numbers on the tiles to solve the problem.

$$\begin{array}{r} 2 \quad 5 \quad 7 \\ + \quad \square \quad 4 \quad \square \\ \hline 6 \quad \square \quad 3 \end{array}$$

Describe how you solved the problem.

Making a Kite

by Kathryn Krieger and Christine Ruiz

Ellie and Mike get the materials to make a kite. Then they make the body of the kite.

Materials

paper kite pattern
tape
straw
10 small paper clips
scissors
hole punch
string
3 sheets of paper
streamer paper

Fold the pattern in half.

Fold along both dashed lines.

Tape on each end.

Mike does not want the front of the kite to bend too much. He uses a straw to make the kite stronger.

Measure 3 paper clips long. Cut.

Tape the straw on the line.

The kite must have a string for Ellie or Mike to hold. If the kite does not have a string, it will blow away. Ellie will tie the string onto the kite.

Punch one hole.

Measure 3 paper-lengths of string. Cut.

Put the string through the hole and tie it.

A tail will help the kite fly straight. Mike measures streamer paper and will tape it to the kite. Then the kite will be finished!

Measure 10 paper-clip-lengths of streamer paper. Cut.

Tape the streamer to the kite as a tail.

You can make a kite too.
Start at the beginning of
this story. Follow the steps.

Name _____

Write About the Story

Draw and write a story about making a kite. Explain how to measure the parts of the kite in your story.

Vocabulary Review

measure
length

Math

What is the length?

Estimate the length of each straw.
Then measure the length of each
straw using small paper clips.

1. Estimate: about _____ paper clips long

Measure: about _____ paper clips long

2. Estimate: about _____ paper clips long

Measure: about _____ paper clips long

3. Estimate: about _____ paper clips long

Measure: about _____ paper clips long

Look around the classroom. Find other
objects to measure. Measure the length
of each object using small paper clips.

Money and Time

Curious
about
Math

A sundial shows the time using the position of the sun. It has numbers around it, like a clock face. What numbers are on a clock face?

Name _____

Show What You Know

Order Numbers to 100 on a Number Line

Write the number that is just before, between, or just after.

Skip Count by Fives and Tens

3. Count by fives. Write how many in all.

_____ paints in all

4. Count by tens. Write how many in all.

_____ paints in all

Time to the Hour

Write the time shown on the clock.

This page checks understanding of important skills needed for success in Chapter 7.

On Your Own

Write the time. Then circle **a.m.** or **p.m.**

5. go to the library

a.m.

p.m.

6. go to science class

a.m.

p.m.

7. eat lunch

a.m.

p.m.

8. look at the moon

a.m.

p.m.

9. **THINK SMARTER** Use the times in the list to complete the story.

Don got to school at _____.
His class went to the library
at _____. After school,
Don read a book at _____.

10:15 a.m.

3:20 p.m.

8:30 a.m.

Problem Solving • Applications

10. **Go DEEPER** Some times are shown on this time line. Write a label for each dot that names something you do at school during that part of the day.

At what times would you say the dots are placed on the time line?

_____ and _____

Personal Math Trainer

11. **THINK SMARTER +** The clock shows the time Jane goes to recess. Write the time. Then circle a.m. or p.m.

a.m.

p.m.

Recess lasted one hour. Write the time recess was over. Write a.m. or p.m.

TAKE HOME ACTIVITY • Name some activities and times. Have your child say a.m. or p.m. for the times.

28	29	30	31			

From January 1 to December 31, there are about 52 weeks. This is 1 **year**.

How many days are in each of these months?

Share and Show

1. Are there more days in July or in November? Explain.

2. In November, there are 4 weeks and _____ days.

390 three hundred ninety

Name _____

On Your Own

Look at the calendars in this lesson to solve.

3. List three months that each have 31 days.

4. List two months that have less than 31 days.

5. In October, there are 4 weeks and _____ days.

Which is the greater amount of time? Circle the correct answer.

6. 1 week or 1 month

7. 1 year or 1 month

8. 1 day or 1 month

9. **THINK SMARTER** Brenda had a library book for 3 weeks. Ivan had a library book for 17 days. Who had a library book for a greater amount of time? Explain.

Problem Solving • Applications

MATHEMATICAL PRACTICE 3

Apply

10. We use the units below to measure how much time passes for different activities and events. List some things that would be measured in each of these units.

• hours _____

• months _____

• weeks _____

• minutes _____

11. **THINK SMARTER** Is the sentence true?

Choose Yes or No.

9 days is more than 1 week. ☐ Yes ☐ No

10 days is longer than 2 weeks. ☐ Yes ☐ No

3 weeks is longer than 14 days. ☐ Yes ☐ No

One month is about 4 weeks long. ☐ Yes ☐ No

There are about 30 weeks in 1 year. ☐ Yes ☐ No

TAKE HOME ACTIVITY • Have your child tell you about the different units of time in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Chapter 7 Review/Test

1. Andrea pays \$2.15 for a jump rope.

Fill in the bubble next to all the ways that show \$2.15.

- ☐ two \$1 bills, 1 dime, and 1 nickel
- ☐ one \$1 bill, 4 quarters, and 1 dime
- ☐ two \$1 bills and 1 quarter
- ☐ one \$1 bill, 3 quarters, and 4 dimes

2. The clock shows the time Michael eats breakfast.

Write the time. Circle a.m. or p.m.

a.m.

_____ p.m.

Tell how you knew whether to select a.m. or p.m.

3. Is the sentence true? Choose Yes or No.

There are about 52 weeks in 1 year.

☐ Yes

☐ No

19 days is longer than 2 weeks.

☐ Yes

☐ No

3 weeks is less than 20 days.

☐ Yes

☐ No

9 days is less than 1 week.

☐ Yes

☐ No

4. Tess gave Raul these coins. Tess says she gave Raul \$1.00. Is Tess correct? Explain.

5. Write the time that is shown on this clock.

____:____

6. What time is shown on the clock? Fill in the bubble next to all the ways to write or say the time.

☐ 4:35

☐ 7:20

☐ 35 minutes past 4

☐ quarter past 4

Name _____

7. Alicia has this money in her pocket.

Circle the amount to complete the sentence.

Alicia has a total of \$1.40
\$1.60
\$1.70 in her pocket.

8. Kate's father gave her these coins. Write the value of the coins. Explain how you found the the total value.

9. Write the times the clocks show.

10. Ben has 30¢. Circle coins to show this amount.

11. Mia buys apples that costs 76¢.

Draw and label coins to show a total value of 76¢.

Chapter

8

Length in Customary Units

The Missouri River is the longest river in the United States.

What is the longest piece of furniture in your classroom? How would you find out?

Name _____

Show What You Know

Compare Lengths

1. Order the pencils from shortest to longest.
Write 1, 2, 3.

Use Nonstandard Units to Measure Length

Use real objects and  to measure.

about _____ 

about _____ 

Measure Length Twice: Nonstandard Units

Use  first. Then use .

Measure the length of the pencil.

4. about _____ 

5. about _____

Vocabulary Builder

Review Words

length

longer

shorter

longest

shortest

Visualize It

Fill in the graphic organizer to describe the lengths of different objects.

Understand Vocabulary

Use review words. Complete the sentences.

1. The blue pencil is the _____ pencil.
2. The red pencil is the _____ pencil.
3. The red pencil is _____ than the yellow pencil.
4. The blue pencil is _____ than the yellow pencil.

Longer or Shorter?

Materials

- 9  • 9  • 

Play with a partner.

- 1 Each player chooses a picture on the board and then finds a real object that matches that picture.
- 2 Place the objects next to each other to find which is longer and which is shorter. If the objects are the same

length, choose another object.

- 3 Spin the pointer on the spinner. The player with the object that matches the spinner puts a cube on that picture on the board.
- 4 Take turns until all the pictures have cubes. The player with more cubes on the board wins.

Measure with Inch Models

Essential Question How can you use inch models to measure length?

HANDS ON Lesson 8.1

Measurement and Data—
2.MD.1

MATHEMATICAL PRACTICES
MP.5, MP.6, MP.8

Listen and Draw

Use color tiles to measure the length.

_____ color tiles

_____ color tiles

_____ color tiles

**Math
Talk**

Mathematical Practices

Describe how to use color tiles to measure the length of an object.

HOME CONNECTION • Your child used color tiles as an introduction to measurement of length before using standard measurement tools.

Model and Draw

A color tile is about 1 **inch** long.

About how many inches long is this string?

Count the color tiles to find how many inches long the string is.

The string is 4 color tiles long.

So, the string is about 4 inches long.

Share and Show

Use color tiles. Measure the length of the object in inches.

about _____ inches

about _____ inches

Problem Solving • Applications

11. **THINK SMARTER** Blue paper chains are 8 inches long. Red paper chains are 6 inches long. How many are needed to have 22 inches of paper chains?

_____ blue paper chains

_____ red paper chains

12. **MATHEMATICAL PRACTICE 2** **Use Reasoning** Liza has a ribbon that is 12 inches long. She needs to cut it into pieces that are each 4 inches long. How many pieces can she make?

_____ pieces

Personal Math Trainer

13. **THINK SMARTER +** Jeremy used color tiles to measure a string. Each tile is 1 inch long. How long is the string? Circle the number in the box to make the sentence true.

The string is about _____ inches long.

2
3
4

TAKE HOME ACTIVITY • Have your child use several of the same small item (such as paper clips) to measure the lengths of some objects at home.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Make and Use a Ruler

Essential Question Why is using a ruler similar to using a row of color tiles to measure length?

HANDS ON Lesson 8.2

Measurement and Data—
2.MD.1

MATHEMATICAL PRACTICES
MP.5, MP.6

Listen and Draw

Use color tiles. Make the given length. Trace along the edge to show the length.

4 inches

2 inches

3 inches

**Math
Talk**

Mathematical Practices

Describe how you knew how many color tiles to use for each length.

HOME CONNECTION • Your child used color tiles as 1-inch models to show different lengths. This activity helps to make inch units a more familiar concept.

Model and Draw

Use a color tile to make a ruler on a paper strip.
Color 6 parts that are each about 1 inch long.

How to use your ruler:

Line up the left edge of an object with the first mark.

Share and Show

Measure the length with your ruler.
Count the inches.

Name _____

about _____ inches

about _____ inches

about _____ inches

Problem Solving • Applications

9. **THINK SMARTER** Work with a classmate.
Use both of your rulers to measure
the length of a bulletin board or a window.
What is the length?

about _____ inches

10. **MATHEMATICAL PRACTICE 6** **Explain** Describe what you did in
Exercise 9. How did you measure a length that
is longer than your rulers?

11. **THINK SMARTER** Measure the length of the yarn with your ruler.
Does the sentence describe the yarn. Choose Yes or No.

The yarn is 2 inches long.	<input type="radio"/> Yes	<input type="radio"/> No
The yarn is 3 inches long.	<input type="radio"/> Yes	<input type="radio"/> No
The yarn is less than 3 inches.	<input type="radio"/> Yes	<input type="radio"/> No
The yarn is longer than 2 inches.	<input type="radio"/> Yes	<input type="radio"/> No

TAKE HOME ACTIVITY • Choose one object in this lesson. Have your
child find objects that are longer, about the same length, and shorter.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Estimate Lengths in Inches

Essential Question How do you estimate the lengths of objects in inches?

Measurement and Data—
2.MD.3

MATHEMATICAL PRACTICES
MP.6, MP.7

Listen and Draw

Choose three objects. Measure their lengths with your ruler. Draw the objects and write their lengths.

about _____ inches

about _____ inches

about _____ inches

**Math
Talk**

Mathematical Practices

Describe how the three lengths compare. Which is the longest object?

FOR THE TEACHER • Provide a collection of small objects, 2 to 6 inches in length, for children to measure. Have them select one object, measure it, and return it before selecting another object.

Model and Draw

The bead is 1 inch long. Use this bead to help find how many beads will fit on the string. Which is the best estimate for the length of the string?

2 inches

5 inches

8 inches

2 inches is too short.

5 inches is about right.

8 inches is too long.

Share and Show

Circle the best estimate for the length of the string.

1.

1 inch

3 inches

5 inches

2.

10 inches

5.

3 inches

6 inches

9 inches

6.

1 inch

3 inches

5 inches

7. **THINK SMARTER** Use the 1-inch mark. Estimate the length of each ribbon.

Estimates:

red ribbon: about _____ inches

blue ribbon: about _____ inches

Problem Solving • Applications

MATHEMATICAL PRACTICE 1

Analyze Relationships

8. Sasha has a string that is the length of 5 beads. Each bead is 2 inches long. What is the length of the string?

_____ inches

9. Maurice has a string that is 15 inches long. He has beads that are each 3 inches long. How many beads will fit on the string?

_____ beads

10. **THINK SMARTER** Tameka has this string. She has many beads that are 1 inch long, like this blue bead. What is the best estimate for the length of the string? Draw more beads on the string to show your estimate.

_____ inches

TAKE HOME ACTIVITY • With your child, estimate the lengths in inches of some small objects, such as books.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Measure with an Inch Ruler

Essential Question How do you use an inch ruler to measure lengths?

HANDS ON Lesson 8.4

Measurement and Data—
2.MD.1

MATHEMATICAL PRACTICES
MP.5, MP.6

Listen and Draw

Draw each worm to match the given length.

FOR THE TEACHER • Have children use the rulers that they made in Lesson 8.2 to draw a worm that is 1 inch long. Have children use the 1-inch-long worm as a guide to draw a worm that is 2 inches long and a worm that is 3 inches long, without using their rulers.

**Math
Talk**

Mathematical Practices

Describe how you decided how long to draw the 2-inch and 3-inch worms.

Model and Draw

What is the length of the string to the nearest inch?

2 inches

Step 1

Line up the end of the string with the zero mark on the ruler.

Step 2

Find the inch mark that is closest to the other end of the string.

Share and Show

Measure the length to the nearest inch.

Name _____

On Your Own

Measure the length to the nearest inch.

5.

_____ inches

6.

_____ inches

7.

_____ inches

8.

_____ inches

9.

_____ inches

10.

_____ inches

Problem Solving • Applications

11. **THINK SMARTER** How much longer is the red string than the blue string?

_____ inches longer

12. **THINK SMARTER** If the red and blue strings were straight and placed end to end, what would the total length be?

_____ inches

13. **THINK SMARTER** Mrs. Grant's pencil is 5 inches long. Is this Mrs. Grant's pencil? Use an inch ruler to find out. Use the numbers and words on the tiles to make the sentences true.

The pencil is _____ inches long.

This pencil _____ Mrs. Grant's pencil.

TAKE HOME ACTIVITY • Have your child measure the lengths of some objects to the nearest inch using a ruler or a similar measuring tool.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

PROBLEM SOLVING

Lesson 8.5

Problem Solving • Add and Subtract in Inches

Essential Question How can drawing a diagram help when solving problems about length?

Measurement and Data—
2.MD.5, 2.MD.6

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.4

There is a paper clip chain that is 16 inches long. Aliyah removes 9 inches of paper clips from the chain. How long is the paper clip chain now?

What do I need to find?

how long the paper

clip chain is now

What information do I need to use?

The chain is _____ inches long.

_____ inches of paper clips are removed from the chain.

Show how to solve the problem.

The paper clip chain is _____ inches long now.

HOME CONNECTION • Your child drew a diagram to represent a problem about lengths. The diagram can be used to choose the operation for solving the problem.

Try Another Problem

Draw a diagram. Write a number sentence using a \square for the missing number. Solve.

- What do I need to find?
- What information do I need to use?

1. Carmen has a string that is 13 inches long and a string that is 8 inches long. How many inches of string does she have?

Carmen has _____ inches of string.

2. Eli has a cube train that is 24 inches long. He removes 9 inches of cubes from the train. How long is Eli's cube train now?

Eli's cube train is _____ inches long now.

**Math
Talk**

Mathematical Practices

Describe how your diagram shows what happened in the second problem.

Name _____

Share and Show

Draw a diagram. Write a number sentence using a  for the missing number. Solve.

3. Lee has a paper strip chain that is 25 inches long. He unhooks 13 inches from the chain. How long is Lee's paper strip chain now?

Lee's paper strip chain is _____ inches long now.

4. **THINK SMARTER** Sue has two ribbons that have the same length. She has 18 inches of ribbon in all. How long is each ribbon?

Each ribbon is _____ inches long.

TAKE HOME ACTIVITY • Have your child explain how he or she used a diagram to solve a problem in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Mid-Chapter Checkpoint

Concepts and Skills

Use color tiles. Measure the length of the object in inches. (2.MD.1)

1.  about _____ inches

The bead is one inch long. Circle the best estimate for the length of the string. (2.MD.3)

2. 
1 inch 2 inches 5 inches

Draw a diagram. Write a number sentence using a  for the missing number. Solve.

3. A mark is 17 inches long. Katy erases 9 inches from the mark. How long is the mark now? (2.MD.5, 2.MD.6)

_____ The mark is _____ inches long now.

4. **THINK SMARTER** Use an inch ruler. What is the length of the string to the nearest inch? (2.MD.1)

Name _____

Measure in Inches and Feet

Essential Question Why is measuring in feet different from measuring in inches?

HANDS ON Lesson 8.6

Measurement and Data—
2.MD.2

MATHEMATICAL PRACTICES
MP.5, MP.6, MP.7

Listen and Draw

Draw or write to describe how you did each measurement.

First measurement

Second measurement

**Math
Talk**

Mathematical Practices

Describe how the length of a sheet of paper and the length of a paper clip are different.

FOR THE TEACHER • Have pairs of children stand apart and measure the distance between them with sheets of paper folded in half lengthwise. Then have them measure the same distance using large paper clips.

Model and Draw

12 inches is the same as 1 **foot**.

A 12-inch ruler is 1 foot long.

You can measure lengths in inches and also in feet.

The real table is about 60 inches long.

The real table is also about 5 feet long.

Share and Show

Measure to the nearest inch.

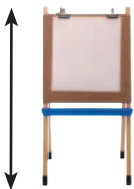

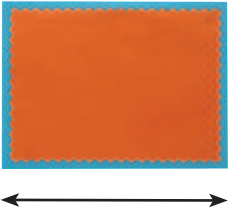

Then measure to the nearest foot.

	Find the real object.	Measure.
1.	<p>desk</p>	<p>_____ inches</p> <p>_____ feet</p>
2.	<p>window</p>	<p>_____ inches</p> <p>_____ feet</p>
3.	<p>door</p>	<p>_____ inches</p> <p>_____ feet</p>

Name _____

On Your Own

Measure to the nearest inch.
Then measure to the nearest foot.

	Find the real object.	Measure.
4.	<p>chalkboard</p> 	<p>_____ inches</p> <p>_____ feet</p>
5.	<p>poster</p> 	<p>_____ inches</p> <p>_____ feet</p>
6.	<p>teacher's desk</p> 	<p>_____ inches</p> <p>_____ feet</p>
7.	<p>easel</p> 	<p>_____ inches</p> <p>_____ feet</p>
8.	<p>bulletin board</p> 	<p>_____ inches</p> <p>_____ feet</p>

Problem Solving • Applications

9. **THINK SMARTER** Estimate the length of a real shelf in inches and in feet. Then measure.

Estimates:

_____ inches

_____ feet

Measurements:

_____ inches

_____ feet

10. **MATHEMATICAL PRACTICE 6** Explain

Look at your measurements for the shelf. Why is the number of inches different from the number of feet?

11. **THINK SMARTER** Use the words on the tiles that makes the sentence true.

A book shelf is 4 _____ long.

Deb's necklace is 20 _____ long.

A marker is 3 _____ long.

Jim's bicycle is 4 _____ long.

inches

feet

TAKE HOME ACTIVITY • Have your child measure the distance of a few footsteps in inches and then in feet.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Estimate Lengths in Feet

Essential Question How do you estimate the lengths of objects in feet?

Measurement and Data—
2.MD.3

MATHEMATICAL PRACTICES
MP.6, MP.7

Listen and Draw

Look for 3 classroom objects that are about the same length as a 12-inch ruler. Draw and label the objects.

**Math
Talk**

Mathematical Practices

FOR THE TEACHER • Provide a collection of objects for children to choose from. Set a 12-inch ruler on the table with the objects for children to use as a visual comparison.

Which objects have a greater length than the ruler? **Explain.**

Model and Draw

Estimate how many 12-inch rulers will be about the same length as this bulletin board.

Think about how many rulers will fit end-to-end.

_____ rulers, or _____ feet

Share and Show

Find each object. Estimate how many 12-inch rulers will be about the same length as the object.

1. bookshelf

Estimate: _____ rulers, or _____ feet

2. chair

Estimate: _____ rulers, or _____ feet

Name _____

On Your Own

Find each object. Estimate how many 12-inch rulers will be about the same length as the object.

3. desktop

Estimate: _____ rulers, or _____ feet

4. wall map

Estimate: _____ rulers, or _____ feet

5. window

Estimate: _____ rulers, or _____ feet

6. teacher's desk

Estimate: _____ rulers, or _____ feet

Problem Solving • Applications

7. **THINK SMARTER** Estimate the distance from your desk to the door in feet. Then estimate the same distance in inches.

_____ feet

_____ inches

Explain how you made your estimates for the number of feet and for the number of inches.

8. **THINK SMARTER** Match the object with the estimate of its length in feet.

1 foot

3 feet

7 feet

jump rope

12-inch ruler

baseball bat

TAKE HOME ACTIVITY • With your child, estimate the lengths of some objects in feet.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Choose a Tool

Essential Question How do you choose a measuring tool to use when measuring lengths?

Measurement and Data—
2.MD.1

MATHEMATICAL PRACTICES
MP.5, MP.8

Listen and Draw

Draw or write to describe how you measured the distances with the yarn.

Distance 1

Distance 2

FOR THE TEACHER • Have each small group use a 1-yard piece of yarn to measure a distance marked on the floor with masking tape. Have groups repeat the activity to measure another distance that is different from the first one.

Math Talk

Mathematical Practices

Which distance was longer? **Explain** how you know.

Model and Draw

You can use different tools to measure lengths and distances.

inch ruler

An inch ruler can be used to measure shorter lengths.

yardstick

A **yardstick** shows 3 feet. It can be used to measure greater lengths and distances.

measuring tape

A **measuring tape** can be used to measure lengths and distances that are not flat or straight.

Share and Show

Choose the best tool for measuring the real object. Then measure and record the length or distance.

inch ruler
yardstick
measuring tape

1. the length of a book

Tool: _____

Length: _____

2. the distance around a cup

Tool: _____

Distance: _____

Name _____

On Your Own

inch ruler
yardstick
measuring tape

Choose the best tool for measuring the real object.
Then measure and record the length or distance.

3. the length of a chalkboard

Tool: _____

Length: _____

4. the length of a marker

Tool: _____

Length: _____

5. the distance around a globe

Tool: _____

Distance: _____

6. the length of a classroom wall

Tool: _____

Length: _____

Problem Solving • Applications

7. **THINK SMARTER** Rachel wants to measure the length of a sidewalk. Should she use an inch ruler or a yardstick? Explain.

Rachel should use _____ because

8. **MATHEMATICAL PRACTICE 3** **Apply**

What is an object that you would measure with a measuring tape? Explain why you would use this tool.

Personal Math Trainer

9. **THINK SMARTER +** Jim measures the length of a picnic table with an inch ruler. Is Jim using the best tool for measuring? Explain.

TAKE HOME ACTIVITY • Have your child name some objects that he or she would measure using a yardstick.

Display Measurement Data

Essential Question How can a line plot be used to show measurement data?

Measurement and Data—
2.MD.9

MATHEMATICAL PRACTICES
MP.4, MP.5, MP.6

Listen and Draw

Use an inch ruler. Measure and record each length.

_____ inches

_____ inches

_____ inches

HOME CONNECTION • Your child practiced measuring different lengths in inches in preparation for collecting measurement data in this lesson.

**Math
Talk**

Mathematical Practices

Describe how the lengths of the three strings are different.

Model and Draw

A **line plot** is a way to show data.
On this line plot, each **X** stands for
the length of one pencil in inches.

Lengths of Pencils in Inches

How many pencils
are just 6 inches long?
How many different pencils
are shown
in this data?

Share and Show

- Use an inch ruler. Measure and record the lengths of 5 books in inches.

1st book: _____ inches
2nd book: _____ inches
3rd book: _____ inches
4th book: _____ inches
5th book: _____ inches

- Write a title for the line plot. Then write the numbers and draw the **Xs**.

Name _____

On Your Own

3. Use an inch ruler. Measure and record the lengths of 5 pencils in inches.
4. Write a title for the line plot. Then write the numbers and draw the **X**s.

1st pencil: _____ inches

2nd pencil: _____ inches

3rd pencil: _____ inches

4th pencil: _____ inches

5th pencil: _____ inches

5. Use an inch ruler. Measure and record the lengths of 4 crayons in inches. Then complete the line plot.

1st crayon: _____ inches

2nd crayon: _____ inches

3rd crayon: _____ inches

4th crayon: _____ inches

Problem Solving • Applications

Math

6. **THINK SMARTER** Use the data in the list to complete the line plot.

Lengths of Ribbons

6 inches
5 inches
7 inches
6 inches

7. **THINK SMARTER** Sarah made a line plot to show the data about the length of leaves. Is Sarah's line plot correct? Tell why or why not.

The Length of Leaves

4 inches	6 inches
5 inches	4 inches
3 inches	5 inches
4 inches	

Lengths of Leaves in Inches

TAKE HOME ACTIVITY • Have your child describe how to make a line plot.

1. Josh wants to measure the distance around a soccer ball.

Circle the best choice of tool.

inch ruler yardstick measuring tape

Explain your choice of tool.

2. Luke has a string that is 6 inches long and a string that is 11 inches long. How many inches of string does Luke have?

Draw a diagram. Write a number sentence using a for the missing number. Solve.

Luke has _____ inches of string.

3. Use an inch ruler. What is the length of the lip balm to the nearest inch?

Circle the number in the box to make the sentence true.

The lip balm is

2

3

4

inches long.

-
4. Tom uses tiles to measure a string. Each tile is 1 inch long. Tom says the string is 3 inches long. Is he correct? Explain.

Name _____

5. Dalia made a line plot to show the lengths of her ribbons. How many ribbons are shown in the line plot?

The line plot shows _____ ribbons.

Suppose Dalia cut one of the ribbons that is 6 inches long into two pieces that are each 3 inches long. Explain how she should change the line plot.

6. Use the words on the tiles to make the sentence true.

The table is 3 _____ long.

The belt is 30 _____ long.

The hallway is 15 _____ long.

inches

feet

7. Use the 1-inch mark. Estimate the length of each object.

about _____ inches

about _____ inches

8. Use an inch ruler. What is the length of the paper clip to the nearest inch?

_____ inches

-
9. Estimate how many 12-inch rulers will be about the same height as a classroom door. Does the sentence describe the door? Choose Yes or No.

The door is about 8 feet high. ☐ Yes ☐ No

The door is less than 3 rulers high. ☐ Yes ☐ No

The door is more than 20 feet high. ☐ Yes ☐ No

The door is less than 15 rulers high. ☐ Yes ☐ No

What is your estimate of how wide the door is?

Length in Metric Units

Curious
about

MP.6, MP.7****Listen and Draw**

Find three classroom objects that are shorter than your 10-centimeter strip. Draw the objects. Write estimates for their lengths.

about _____ centimeters

about _____ centimeters

about _____ centimeters

**Math
Talk****Mathematical Practices**

Which object has a length closest to 10 centimeters? **Explain.**

HOME CONNECTION • Your child used a 10-centimeter strip of paper to practice estimating the lengths of some classroom objects.

Model and Draw

This pencil is about 10 centimeters long.
Which is the most reasonable estimate
for the length of the ribbon?

7 centimeters

13 centimeters

20 centimeters

The ribbon is longer
than the pencil.
7 centimeters is not
reasonable.

The ribbon is not
twice as long as the pencil.
20 centimeters is not
reasonable.

The ribbon is a little longer than the pencil.
So, 13 centimeters is the most reasonable estimate.

Share and Show

PROBLEM SOLVING

Lesson 9.4

Problem Solving • Add and Subtract Lengths

Essential Question How can drawing a diagram help when solving problems about lengths?

Measurement and Data—
2.MD.6, 2.MD.5

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.4

Nate had 23 centimeters of string.
He gave 9 centimeters of string to Myra.
How much string does Nate have now?

What do I need to find?

how much string

Nate has now

What information do I need to use?

Nate had _____ centimeters of string.

He gave _____ centimeters of string to Myra.

Show how to solve the problem.

Nate has _____ centimeters of string now.

HOME CONNECTION • Your child drew a diagram to represent a problem about lengths. The diagram can be used to choose the operation for solving the problem.

Try Another Problem

Draw a diagram. Write a number sentence using a \square for the missing number. Then solve.

- What do I need to find?
- What information do I need to use?

1. Ellie has a ribbon that is 12 centimeters long. Gwen has a ribbon that is 9 centimeters long. How many centimeters of ribbon do they have?

They have _____ centimeters of ribbon.

2. A string is 24 centimeters long. Justin cuts 8 centimeters off. How long is the string now?

Now the string is
_____ centimeters long.

**Math
Talk**

Mathematical Practices

Explain how your diagram shows what happened in the first problem.

Name _____

Share and Show

Draw a diagram. Write a number sentence using a  for the missing number. Then solve.

-  3. A chain of paper clips is 18 centimeters long. Sondra adds 6 centimeters of paper clips to the chain. How long is the chain now?

The chain is _____ centimeters long now.

4. **THINK SMARTER** A ribbon was 22 centimeters long. Then Martha cut a piece off to give to Tao. Now the ribbon is 5 centimeters long. How many centimeters of ribbon did Martha give to Tao?

Martha gave _____ centimeters of ribbon to Tao.

TAKE HOME ACTIVITY • Have your child explain how he or she used a diagram to solve one problem in this lesson.

_____ classmates

7. Which game did the most classmates choose?

8. **GO DEEPER** Did more classmates choose a card game or a computer game?

How many more? _____ more classmates

9. Which game did the fewest classmates choose?

10. **MATHEMATICAL PRACTICE 3** **Apply** How many classmates did not choose a board game or a puzzle? **Explain** how you know.

Problem Solving • Applications

- II. **THINK SMARTER** Maeko asked her classmates to choose their favorite subject. She made this tally chart.

How many more classmates chose math than reading?

_____ more classmates

Favorite Subject	
Subject	Tally
reading	I
math	
science	

Write a question about the data in the chart. Then write the answer to your question.

12. **THINK SMARTER** Fill in the bubble next to all the sentences that describe data in the tally chart.

- ☐ 10 children voted for lunch.
- ☐ 13 children voted for breakfast.
- ☐ More children voted for dinner than for lunch.
- ☐ A total of 35 children voted for their favorite meal.

Favorite Meal	
Meal	Tally
breakfast	III
lunch	
dinner	II

TAKE HOME ACTIVITY • With your child, take a survey about favorite games and make a tally chart to show the data.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Read Picture Graphs

Essential Question How do you use a picture graph to show data?

Measurement and Data—
2.MD.10

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.6

Listen and Draw

Use the tally chart to solve the problem.
Draw or write to show what you did.

Favorite Hobby	
Hobby	Tally
crafts	I
reading	
music	
sports	II

_____ more children

**Math
Talk**

Mathematical Practices

Can the chart be used to find how many girls chose music? **Explain.**

FOR THE TEACHER • Read the following problem. Mr. Martin's class made this tally chart. How many more children in his class chose sports than chose reading as their favorite hobby?

Model and Draw

A **picture graph** uses pictures to show data.

Key: Each  stands for 1 game.

A **key** tells how many each picture stands for.

Share and Show

Use the picture graph to answer the questions.

Key: Each  stands for 1 child.

1. Which snack was chosen by the fewest children? _____

2. How many more children chose pretzels than apples? _____ more children

Name _____

On Your Own

Use the picture graph to answer the questions.

Key: Each  stands for 1 pencil.

3. How many pencils do Alana and Brad have? _____ pencils
4. How many more pencils does Kiana have than Alana has? _____ more pencils
5. **THINK SMARTER** Mrs. Green has the same number of pencils as the four children. How many pencils does she have? _____ pencils

6. **MATHEMATICAL PRACTICE** **Use Graphs** Christy has 7 pencils. Write two sentences to describe how her number of pencils compares to the data in the picture graph.

Problem Solving • Applications

Favorite Balloon Color								
green								
blue								
red								
purple								

Key: Each  stands for 1 child.

7. **Go DEEPER** Which three colors were chosen by a total of 13 children? _____

8. **THINK SMARTER** Use the numbers on the tiles to complete the sentence about the picture graph.

Number of Pets				
Scott				
Andre				
Maddie				

Key: Each  stands for 1 pet.

Scott has _____ pets.

Andre has _____ fewer pets than Scott.

Maddie and Scott have _____ more pets than Andre.

TAKE HOME ACTIVITY • Have your child explain how he or she solved one of the problems in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Make Picture Graphs

Essential Question How do you make a picture graph to show data in a tally chart?

Measurement and Data—
2.MD.10

MATHEMATICAL PRACTICES
MP.1, MP.4, MP.6

Listen and Draw

Take turns choosing a cube from the bag.
Draw a smiley face in the graph for each cube.

Cube Colors					
blue					
red					
green					
orange					

Key: Each 😊 stands for 1 cube.

**Math
Talk**

Mathematical Practices

Explain how you know that the number of smiley faces for blue matches the number of blue cubes.

HOME CONNECTION • Your child made a graph by recording smiley faces for the colors of cubes taken from a bag. This activity prepares children for working with picture graphs in this lesson.

Model and Draw

Each picture in the graph stands for 1 flower.
Draw pictures to show the data in the tally chart.

Number of Flowers Picked	
Name	Tally
Jessie	
Inez	
Paulo	

Number of Flowers Picked					
Jessie					
Inez					
Paulo					

Key: Each  stands for 1 flower.

Share and Show

- Use the tally chart to complete the picture graph.
Draw a 😊 for each child.

Favorite Sandwich	
Sandwich	Tally
cheese	
ham	
tuna	
turkey	

Favorite Sandwich					
cheese					
ham					
tuna					
turkey					

Key: Each 😊 stands for 1 child.

2. How many children chose tuna? _____ children

3. How many more children chose cheese than ham? _____ more children

Name _____

On Your Own

4. Use the tally chart to complete the picture graph.
Draw a ☺ for each child.

Favorite Fruit	
Fruit	Tally
apple	
plum	
banana	
orange	

Favorite Fruit					
apple					
plum					
banana					
orange					

Key: Each ☺ stands for 1 child.

5. How many children chose banana? _____ children
6. How many fewer children chose plum than banana? _____ fewer children

7. **THINK SMARTER** How many children chose a fruit that was not a plum?

_____ children

8. **Go DEEPER** Which three fruits were chosen by a total of 10 children?

TAKE HOME ACTIVITY • Ask your child to explain how to read the picture graph on this page.

FOR MORE PRACTICE:
Standards Practice Book

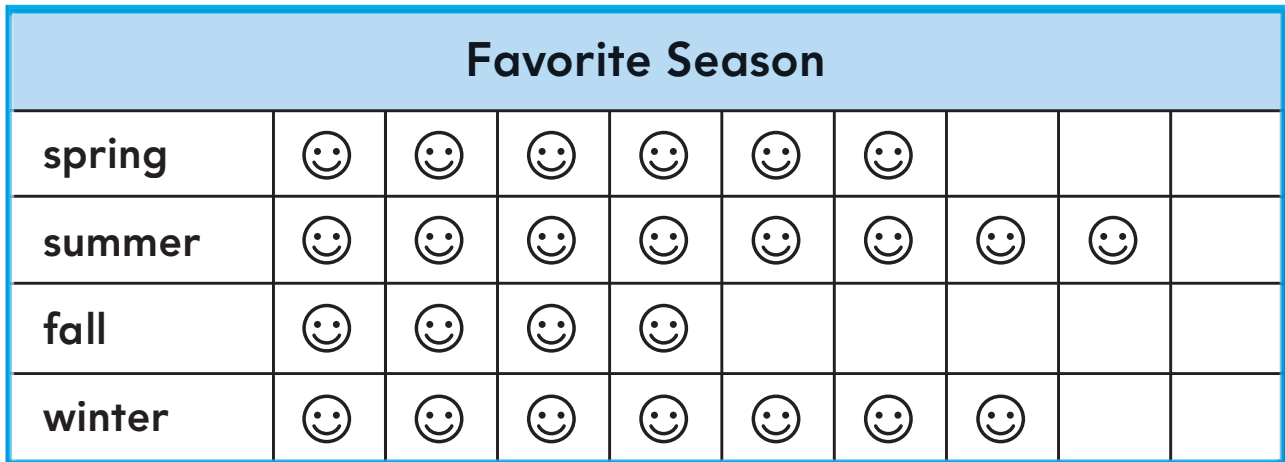

Name _____

Mid-Chapter Checkpoint

Concepts and Skills

Use the picture graph to answer the questions. (2.MD.10)

Key: Each 😊 stands for 1 child.

- Which season did the fewest children choose?

- How many more children chose spring than fall?
_____ more children
- How many children chose a season that was not winter?
_____ children

4. **THINK SMARTER** How many children chose a favorite season?

_____ children

Draw tally marks to show this number.

Name _____

Read Bar Graphs

Essential Question How is a bar graph used to show data?

Measurement and Data—2.MD.10
Also 2.MD.6

MATHEMATICAL PRACTICES
MP.1, MP.2, MP.6

Listen and Draw

Use the picture graph to solve the problem.
Draw or write to show what you did.

Red Trucks Seen Last Week								
Morgan	■	■	■					
Terrell	■	■	■	■	■	■		
Jazmin	■	■	■	■	■	■	■	■
Carlos	■	■	■	■				

Key: Each ■ stands for 1 red truck.

_____ red trucks

**Math
Talk**

Mathematical Practices

Describe how the data in the graph for Terrell and for Jazmin are different.

FOR THE TEACHER • Read this problem to children. Morgan made a picture graph to show the number of red trucks that she and her friends saw last week. How many red trucks did the four children see last week?

Model and Draw

A **bar graph** uses bars to show data.
Look at where the bars end.
This tells how many.

There are
8 children playing
soccer.

Share and Show

Use the bar graph.

1. How many green marbles are in the bag?

_____ green marbles

2. How many more blue marbles than purple marbles are in the bag?

_____ more blue marbles

3. How many marbles are in the bag?

_____ marbles

Name _____

On Your Own

Use the bar graph.

4. How many children chose the beach?

_____ children

5. Which place did the fewest children choose?

6. How many more children chose the zoo than the aquarium?

_____ more children

7. **Go DEEPER** How many children chose a place that was not the zoo?

_____ children

8. **THINK SMARTER** Greg chose a place that has more votes than the aquarium and the museum together. Which place did Greg choose?

Problem Solving • Applications

Use the bar graph.

9. How many trees are at the farm?

_____ trees

10. How many trees are not apple trees?

_____ trees

11. **MATHEMATICAL PRACTICE 6 Explain** Suppose 7 more trees are brought to the farm. How many trees would be at the farm then? Explain.

12. **THINK SMARTER** Use the data in the bar graph about trees to finish the sentences.

There are _____ fewer apple trees than oak trees. Explain.

TAKE HOME ACTIVITY • Ask your child to explain how to read a bar graph.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Make Bar Graphs

Essential Question How do you make a bar graph to show data?

Measurement and Data—2.MD.10
Also 2.MD.6

MATHEMATICAL PRACTICES
MP.3, MP.4, MP.6

Listen and Draw

Use the bar graph to solve the problem.
Draw or write to show what you did.

_____ writing tools

Math Talk

Mathematical Practices

Describe how the information in the graph for crayon and for marker is different.

FOR THE TEACHER • Read the following problem. Barry made this bar graph. How many writing tools are in the box?

Model and Draw

Abel read 2 books, Jiang read 4 books, Cara read 1 book, and Jamila read 3 books.

Complete the bar graph to show this data.

Share and Show

Ella is making a bar graph to show the kinds of pets her classmates have.

- 5 classmates have a dog.
- 7 classmates have a cat.
- 2 classmates have a bird.
- 3 classmates have fish.

1. Write labels and draw bars to complete the graph.

2. How will the graph change if one more child gets a bird?

Name _____

On Your Own

Dexter asked his classmates which pizza topping is their favorite.

- 4 classmates chose peppers.
- 7 classmates chose meat.
- 5 classmates chose mushrooms.
- 2 classmates chose olives.

3. Write a title and labels for the bar graph.

4. Draw bars in the graph to show the data.

5. Which topping did the most classmates choose? _____

6. **THINK SMARTER** Did more classmates choose peppers and olives than meat? Explain.

Problem Solving • Applications

Cody asked his classmates which zoo animal is their favorite.

- 6 classmates chose bear.
- 4 classmates chose lion.
- 7 classmates chose tiger.
- 3 classmates chose zebra.

7. Use the data to complete the bar graph. Write a title and labels. Draw bars.

8. **GO DEEPER** How many fewer classmates chose lion than classmates that chose the other zoo animals?

_____ fewer classmates

Personal Math Trainer

9. **THINK SMARTER +** Look at the bar graph above.

Suppose 2 of Cody's classmates chose zebra instead of bear. Explain how the bar graph would change.

TAKE HOME ACTIVITY • Ask your child to describe how to make a bar graph to show data.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

PROBLEM SOLVING

Lesson 10.6

Problem Solving • Display Data

Essential Question How does making a bar graph help when solving problems about data?

Measurement and Data—2.MD.10

MATHEMATICAL PRACTICES

MP.1, MP.3, MP.4

Maria recorded the rainfall in her town for four months. How did the amount of rainfall change from September to December?

September	4 inches
October	3 inches
November	2 inches
December	1 inch

Unlock the Problem

What do I need to find?

how the amount of rainfall
changed from September to
December

**What information do
I need to use?**

the amount of rainfall in
each of the four months

Show how to solve the problem.

The amount of rainfall _____

HOME CONNECTION • Your child made a bar graph to show the data. Making a graph helps your child organize data to solve problems.

Try Another Problem

Make a bar graph to solve the problem.

1. Matthew measured the height of his plant once a week for four weeks. Describe how the height of the plant changed from May 1 to May 22.

- What do I need to find?
- What information do I need to use?

May 1	2 inches
May 8	3 inches
May 15	5 inches
May 22	7 inches

The height of the plant _____

**Math
Talk**

Mathematical Practices

How many inches did the plant grow from May 1 to May 22?

Explain.

Name _____

Share and Show

Make a bar graph to solve the problem.

2. Bianca wrote the number of hours that she practiced playing guitar in June. Describe how the amount of practice time changed from Week 1 to Week 4.

Week 1	1 hour
Week 2	2 hours
Week 3	4 hours
Week 4	5 hours

The amount of practice time _____

3. **THINK SMARTER** If Bianca's practice time is 4 hours in Week 5, how does her practice time change from Week 1 to Week 5?

Problem Solving • Applications

4. How many strings are 9 inches long?

_____ strings

5. **Go DEEPER** How many strings are more than 6 inches long?

_____ strings

Lengths of Strings in Inches

Personal Math Trainer

6. **THINK SMARTER +** David measured the snowfall for four weeks. Fill in the bubble next to all the sentences that describe the data. Make a bar graph to solve the problem.

Week 1	1 inch
Week 2	2 inches
Week 3	3 inches
Week 4	4 inches

- ☐ There were 2 inches of snow in Week 2.
- ☐ The amount of snowfall increased each week.
- ☐ Snowfall decreased from Week 3 to Week 4.
- ☐ There were a total of 4 inches of snow in Week 2 and Week 3.
- ☐ There were 3 more inches of snow in Week 4 than in Week 1.

TAKE HOME ACTIVITY • Have your child explain how he or she solved one of the problems in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Chapter 10 Review/Test

1. Hara asked her friends their favorite yogurt flavor. Use the data on the card to make a tally chart.

lime - 2 people
 peach - 3 people
 berry - 5 people
 vanilla - 7 people

Favorite Yogurt Flavor	
Yogurt	Tally
peach	
berry	
lime	
vanilla	

2. Does the sentence describe the data in the tally chart above? Choose Yes or No.

7 children like berry and peach ☐ Yes ☐ No

More children like peach than lime ☐ Yes ☐ No

More children like vanilla than any other flavor. ☐ Yes ☐ No

3. Hara asked 5 more friends. 3 friends like berry and 2 friends like lime. Which flavor do most children choose now? Explain.

4. Teresa counted the leaves on her plant once a month for four months. Describe how the number of leaves on the plant changed from May 1 to August 1. Make a bar graph to solve the problem.

May 1	2 leaves
June 1	4 leaves
July 1	6 leaves
August 1	8 leaves

The number of leaves on the plant _____

5. If Teresa counts 1 more leaf on September 1, how does the number of leaves change from May 1 to September 1?

Name _____

6. Use the tally chart to complete the picture graph. Draw a 😊 for each child.

Favorite Recess Game	
tag	I
hopscotch	HHH
kickball	III
jacks	II

Favorite Recess Game					
tag					
hopscotch					
kickball					
jacks					

Key: Each 😊 stands for 1 child.

-
7. How many children chose hopscotch?

_____ children

8. How many fewer children chose tag than kickball?

_____ fewer children

9. Which two games were chosen by a total of 4 children?

10. Mr. Sanchez asked the children in his class to name their favorite kind of book. Use the data to complete the bar graph.

8 children like fiction
4 children like science
6 children like history
9 children like poetry

11. Fill in the bubble next to all the sentences that describe the data in the bar graph above.
- ☐ 8 children chose fiction.
 - ☐ Fewer children chose fiction than history.
 - ☐ 3 more children chose history than science.
 - ☐ More children chose poetry than any other kind of book.

12. Did more children choose science and history than poetry? Explain.

13. How many children chose a book that is not fiction?

_____ children

A Farmer's Job

by Tami Morton

CRITICAL AREA Describing and analyzing shapes

A farmer's job is never done. Farmers are busy during all of the seasons of the year. They grow fruits and vegetables for people to eat. What shapes do you see?

In the spring, farmers get the fields ready.
They plow the fields and fertilize the soil.
They plant their seeds.
What shapes do you see?

In the summer, farmers take care of their crops. They make sure that the plants have enough water when it does not rain. What shapes do you see?

Why does a farmer need to know about changes in the weather?

In the fall, farmers harvest many fruits and vegetables. They sell most of these fruits and vegetables to other people. What shapes do you see?

In the winter, farmers clear the fields
and get ready for the next season.
They plan what they are going to plant.
They check their machines.
A farmer's job is never done.
What shapes do you see?

Name _____

Write About the Story

Look at the pictures of the farm objects.
Draw a picture and write your own story
about the objects. Tell about the shapes
that the objects look like.

Vocabulary Review

cylinder	cube
cone	circle
sphere	triangle
square	rectangle
rectangular prism	

WRITE Math

What shape do you see?

Draw a line to match the shape with the name.

●

●

●

●
cylinder

●
rectangular prism

●
circle

Circle each shape that has a curved surface.

cylinder

rectangular prism

cube

cone

sphere

Write a riddle about a shape. Ask a classmate to read the riddle and name the shape.

Geometry and Fraction Concepts

Hot air rises. A balloon filled with hot air will float up into the sky.

Some balloons look as though they have two-dimensional shapes on them. Name some two-dimensional shapes. Then draw some examples of them.

Name _____

Show What You Know

Equal Parts

Circle the shape that has two equal parts.

1.

2.

Identify Three-Dimensional Shapes

3. Circle each .

4. Circle each .

Identify Shapes

Circle all the shapes that match the shape name.

5. triangle

6. rectangle

This page checks understanding of important skills needed for success in Chapter 11.

Name _____

Vocabulary Builder

Review Words

equal parts

shape

rectangle

triangle

square

Visualize It

Draw pictures to complete the graphic organizer.

Understand Vocabulary

Draw a **shape** to match the shape name.

rectangle

triangle

square

Count the Sides

Materials • 1  • 10  • 10 

Play with a partner.

- 1 Toss the . If you toss a 1 or a 2, toss the  again.
- 2 Look for a shape that has the same number of sides as the number you tossed.
- 3 Put one of your counters on that shape.
- 4 Take turns. Cover all the shapes. The player with more counters on the board wins.

Name _____

Three-Dimensional Shapes

Essential Question What objects match three-dimensional shapes?

Geometry—2.G.1

MATHEMATICAL PRACTICES
MP.6

Listen and Draw

Draw a picture of an object with the same shape shown.

**Math
Talk**

Mathematical Practices

Describe how the shapes are alike.

Describe how they are different.

FOR THE TEACHER • Have children look at the first shape and name some real objects that have this shape, such as a cereal box. Have each child draw a picture of a real-life object that has the same shape. Repeat for the second shape.

Model and Draw

These are three-dimensional shapes.

cube

rectangular prism

sphere

cylinder

cone

Which of these objects has the shape of a cube?

Share and Show

Circle the objects that match the shape name.

1. sphere

2. cube

Name _____

On Your Own

Circle the objects that match the shape name.

3. cylinder

4. rectangular prism

5. cone

6. cube

7. **THINK SMARTER** Circle the shapes that have a curved surface.
Draw an X on the shapes that do not have a curved surface.

Problem Solving • Applications

8. MATHEMATICAL PRACTICE 6 Make Connections

Reba traced around the bottom of each block. Match each block with the shape Reba drew.

9. THINK SMARTER Match the shapes.

TAKE HOME ACTIVITY • Ask your child to name an object that has the shape of a cube.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Attributes of Three-Dimensional Shapes

Essential Question How would you describe the faces of a rectangular prism and the faces of a cube?

Geometry—2.G.1

MATHEMATICAL PRACTICES
MP.4, MP.5, MP.6

Listen and Draw

Circle the cones. Draw an X on the sphere.

**Math
Talk**

Mathematical Practices

Name the other shapes on this page. **Describe** how they are different.

HOME CONNECTION • Your child identified the shapes on this page to review some of the different kinds of three-dimensional shapes.

Model and Draw

The **faces** of a cube are squares.

The **vertices** are the corner points of the cube.

Share and Show

Write how many for each.

faces

edges

vertices

1.

rectangular
prism

2.

cube

Name _____

On Your Own

3. **Go DEEPER** Use dot paper.
Follow these steps to draw a cube.

Step 1 Draw a square. Make each side 4 units long.

Step 2 Draw edges from 3 vertices, like this.

Step 3 Draw 2 more edges.

Step 4 Draw 3 dashed edges to show the faces that are not seen.

4. **THINK SMARTER** Trace all the faces of a rectangular prism on a sheet of paper. Write to tell about the shapes that you drew.

Problem Solving • Applications

5. **MATHEMATICAL PRACTICE 6** **Make Connections** Marcus traced around the faces of a three-dimensional shape. Circle the name of the shape he used.

cylinder
cube
sphere
cone

6. **THINK SMARTER** Use the words on the tiles to label the parts of the cube.

edge

face

vertex

Describe the faces of a cube.

TAKE HOME ACTIVITY • Have your child tell you about the faces on a cereal box or another kind of box.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Build Three-Dimensional Shapes

Essential Question How can you build a rectangular prism?

HANDS ON Lesson 11.3

Geometry—2.G.1

MATHEMATICAL PRACTICES
MP.4, MP.6

Listen and Draw

Circle the shapes with curved surfaces. Draw an X on the shapes with flat surfaces.

**Math
Talk**

Mathematical Practices

Name the shapes you drew an X on. **Describe** how they are different.

HOME CONNECTION • Your child sorted the shapes on this page using the attributes of the shapes.

Model and Draw

Build this rectangular prism using 12 unit cubes.

The shading shows the top and front views.

top view

front view

Share and Show

Build a rectangular prism with the given number of unit cubes. Shade to show the top and front views.

1. 9 unit cubes

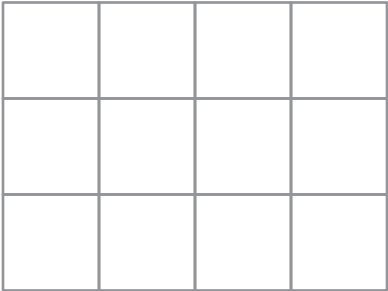

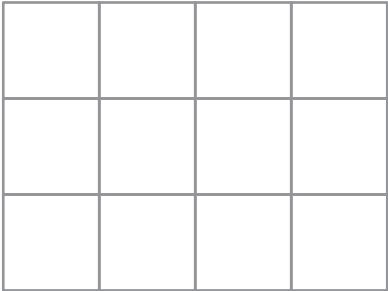

2. 16 unit cubes

Name _____

On Your Own

Build a rectangular prism with the given number of unit cubes. Shade to show the top and front views.

	top view	front view
3. 24 unit cubes		

4. **THINK SMARTER** The top, side, and front views of a rectangular prism are shown. Build the prism. How many unit cubes are used to build the solid?

top view

front view

side view _____ unit cubes

5. **MATHEMATICAL PRACTICE** **Analyze** Jen uses 18 cubes to build a rectangular prism. The top and front views are shown. Shade to show the side view.

top view

front view

side view

Problem Solving • Applications

Solve. Write or draw to explain.

6. **Go DEEPER** Tomas built this rectangular prism. How many unit cubes did he use?

_____ cubes

7. **MATHEMATICAL PRACTICE 7** Look for Structure

Theo builds the first layer of a rectangular prism using 4 cubes. He adds 3 more layers of 4 cubes each. How many cubes are used for the prism?

_____ cubes

Personal Math Trainer

8. **THINK SMARTER +** Tyler built this rectangular prism using unit cubes. Then he took it apart and used all of the cubes to build two new prisms. Fill in the bubble next to the two prisms he built.

TAKE HOME ACTIVITY • Ask your child to show how he or she solved an exercise in the lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Two-Dimensional Shapes

Essential Question What shapes can you name just by knowing the number of sides and vertices?

Geometry—2.G.1

MATHEMATICAL PRACTICES
MP.4, MP.7

Listen and Draw

Use a ruler. Draw a shape with 3 straight sides.
Then draw a shape with 4 straight sides.

**Math
Talk**

Mathematical Practices

Describe how your shapes are different from the shapes a classmate drew.

FOR THE TEACHER • Have children use rulers as straight edges for drawing the sides of shapes. Have children draw a two-dimensional shape with 3 sides and then a two-dimensional shape with 4 sides.

Model and Draw

You can count **sides** and **vertices** to name two-dimensional shapes. Look at how many sides and vertices each shape has.

triangle

3 sides
3 vertices

quadrilateral

4 sides
 vertices

pentagon

 sides
 vertices

hexagon

 sides
 vertices

Share and Show

Write the number of sides and the number of vertices.

1. triangle

 sides
 vertices

2. hexagon

 sides
 vertices

3. pentagon

 sides
 vertices

Name _____

On Your Own

Write the number of sides and the number of vertices. Then write the name of the shape.

pentagon
triangle
hexagon
quadrilateral

4.

_____ sides
_____ vertices

5.

_____ sides
_____ vertices

6.

_____ sides
_____ vertices

7.

_____ sides
_____ vertices

8.

_____ sides
_____ vertices

9.

_____ sides
_____ vertices

Draw more sides to make the shape.

10. pentagon

11. quadrilateral

12. hexagon

Problem Solving • Applications

Solve. Draw or write to explain.

13. **THINK SMARTER** Alex draws a hexagon and two pentagons. How many sides does Alex draw altogether?

_____ sides

14. **MATHEMATICAL PRACTICE** **Use Diagrams**

Ed draws a shape that has 4 sides. It is not a square. It is not a rectangle. Draw a shape that could be Ed's shape.

15. **THINK SMARTER** Count the sides and vertices of each two-dimensional shape. Draw each shape where it belongs in the chart.

Quadrilateral	Hexagon	Triangle

TAKE HOME ACTIVITY • Ask your child to draw a shape that is a quadrilateral.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Angles in Two-Dimensional Shapes

Essential Question How do you find and count angles in two-dimensional shapes?

Geometry—2.G.1

MATHEMATICAL PRACTICES
MP.4, MP.6, MP.7

Listen and Draw

Use a ruler. Draw two different triangles.
Then draw two different rectangles.

FOR THE TEACHER • Have children use pencils and rulers (or other straight edges) to draw the shapes. Have them draw two different triangles in the green box and two different rectangles in the purple box.

**Math
Talk**

Mathematical Practices

Describe a triangle and a rectangle. Tell about their sides and vertices.

Model and Draw

When two sides of a shape meet, they form an **angle**.

This shape has 3 angles.

Share and Show

Circle the angles in each shape.
Write how many.

1.

_____ angles

2.

_____ angles

3.

_____ angles

4.

_____ angles

Name _____

On Your Own

Circle the angles in each shape. Write how many.

5.

_____ angles

6.

_____ angles

7.

_____ angles

8.

_____ angles

9. **THINK SMARTER** Draw more sides to make the shape.
Write how many angles.

pentagon

_____ angles

quadrilateral

_____ angles

Problem Solving • Applications

10. Draw two shapes that have 7 angles in all.

II. MATHEMATICAL PRACTICE 4 Use Diagrams

Ben drew 3 two-dimensional shapes that had 11 angles in all. Draw shapes Ben could have drawn.

12. **THINK SMARTER** Fill in the bubble next to all the shapes that have 5 angles.

TAKE HOME ACTIVITY • Ask your child to draw a shape with 4 sides and 4 angles.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Sort Two-Dimensional Shapes

Essential Question How do you use the number of sides and angles to sort two-dimensional shapes?

Geometry—2.G.1

MATHEMATICAL PRACTICES
MP.4, MP.6

Listen and Draw

Make the shape with pattern blocks. Draw and color the blocks you used.

Use one block.

Use two blocks.

Use three blocks.

FOR THE TEACHER • Tell children that the shape shown three times on the page is a trapezoid. Have children use pattern blocks to make the trapezoid three times: with one pattern block, with two pattern blocks, and then with three pattern blocks.

Math Talk

Mathematical Practices

Describe how you could sort the blocks you used.

Model and Draw

Which shapes match the rule?

Shapes with more than 3 sides

Shapes with fewer than 5 angles

Share and Show

Circle the shapes that match the rule.

1. Shapes with 5 sides

2. Shapes with more than 3 angles

3. Shapes with fewer than 4 angles

4. Shapes with fewer than 5 sides

Name _____

On Your Own

Circle the shapes that match the rule.

5. Shapes with 4 sides

6. Shapes with more than 4 angles

7. Shapes with fewer than 4 angles

8. Shapes with fewer than 5 sides

9. **THINK SMARTER** Draw three shapes that match the rule. Circle them. Then draw two shapes that do not match the rule.

Shapes with fewer than 5 angles

Problem Solving • Applications

10. **MATHEMATICAL PRACTICE** 6 Make Connections

Sort the shapes.

- Use red to color the shapes with more than 4 sides.
- Use blue to color the shapes with fewer than 5 angles.

II. **THINK SMARTER** Draw each shape where it belongs in the chart.

Shapes with 4 or Fewer Sides	Shapes with More than 4 sides

TAKE HOME ACTIVITY • Ask your child to draw some shapes that each have 4 angles.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Partition Rectangles

Essential Question How do you find the total number of same-size squares that will cover a rectangle?

HANDS ON Lesson 11.7

Geometry—2.G.2
Also 2.OA.4

MATHEMATICAL PRACTICES
MP.5, MP.8

Listen and Draw

Put several color tiles together. Trace around the shape to draw a two-dimensional shape.

**Math
Talk**

Mathematical Practices

Is there a different shape that can be made with the same number of tiles? **Explain.**

HOME CONNECTION • After putting together tiles, your child traced around them to draw a two-dimensional shape. This activity is an introduction to partitioning a rectangle into several same-size squares.

Model and Draw

Trace around color tiles. How many square tiles cover this rectangle?

Number of rows: 2

Number of columns: 3

Total: _____ square tiles

Share and Show

Use color tiles to cover the rectangle.
Trace around the square tiles. Write how many.

1.

Number of rows: _____

Number of columns: _____

Total: _____ square tiles

2.

Number of rows: _____

Number of columns: _____

Total: _____ square tiles

Name _____

On Your Own

Use color tiles to cover the rectangle.
Trace around the square tiles. Write how many.

3.

Number of rows: _____

Number of columns: _____

Total: _____ square tiles

4.

Number of rows: _____

Number of columns: _____

Total: _____ square tiles

5.

THINK SMARTER

Mary started to cover this rectangle with ones blocks. **Explain** how you would estimate the number of ones blocks that would cover the whole rectangle.

TAKE HOME ACTIVITY • Have your child describe what he or she did in this lesson.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Mid-Chapter Checkpoint

Concepts and Skills

Circle the objects that match the shape name. (2.G.1)

1. cylinder				
2. cube				

Write the number of sides and the number of vertices. (2.G.1)

3. quadrilateral

_____ sides

_____ vertices

4. pentagon

_____ sides

_____ vertices

5. hexagon

_____ sides

_____ vertices

6. **THINK SMARTER** How many angles does this shape have? (2.G.1)

_____ angles

Name _____

Equal Parts**Essential Question** What are halves, thirds, and fourths of a whole?

Geometry—2.G.3

MATHEMATICAL PRACTICES
MP.6, MP.8**Listen and Draw**

Put pattern blocks together to match the shape of the hexagon. Trace the shape you made.

**Math
Talk****Mathematical Practices****Describe** how the shapes you used are different from the shapes a classmate used.**FOR THE TEACHER** • Have children place a yellow hexagon pattern block on the workspace and make the same shape by using any combination of pattern blocks. Discuss how they know if the outline of the blocks they used is the same shape as the yellow hexagon.

Model and Draw

The green rectangle is the whole.
It can be divided into equal parts.

There are 2 **halves**.
Each part is a half.

There are 3 **thirds**.
Each part is a third.

There are 4 **fourths**.
Each part is a fourth.

Share and Show

Write how many equal parts there are in the whole.
Write **halves**, **thirds**, or **fourths** to name the equal parts.

1.

_____ equal parts

2.

_____ equal parts

3.

_____ equal parts

4.

_____ equal parts

5.

_____ equal parts

6.

_____ equal parts

Name _____

On Your Own

Write how many equal parts there are in the whole.
Write **halves**, **thirds**, or **fourths** to name the equal parts.

7.

_____ equal parts

8.

_____ equal parts

9.

_____ equal parts

10.

_____ equal parts

11.

_____ equal parts

12.

_____ equal parts

13.

THINK SMARTER

Draw to show halves.
Explain how you know that the
parts are halves.

Problem Solving • Applications

14. **MATHEMATICAL PRACTICE 6** Make Connections Sort the shapes.

- Draw an X on shapes that do **not** show equal parts.
- Use red to color the shapes that show thirds.
- Use blue to color the shapes that show fourths.

Personal Math Trainer

15. **THINK SMARTER +** Draw lines to show fourths three different ways. Explain how you know that the parts are fourths.

Explain how you know that the parts are fourths.

TAKE HOME ACTIVITY • Ask your child to fold one sheet of paper into halves and another sheet of paper into fourths.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Show Equal Parts of a Whole

Essential Question How do you know if a shape shows halves, thirds, or fourths?

Geometry—2.G.3

MATHEMATICAL PRACTICES
MP.5, MP.6

Listen and Draw

Circle the shapes that show equal parts.

**Math
Talk**

Mathematical Practices

Does the triangle show halves? **Explain.**

HOME CONNECTION • Your child completed this sorting activity with shapes to review the concept of equal parts.

Model and Draw

You can draw to show equal parts of a whole.

halves
2 equal parts

There are 2 halves
in a whole.

thirds
3 equal parts

There are 3 thirds
in a whole.

fourths
4 equal parts

There are 4 fourths
in a whole.

Share and Show

Draw to show equal parts.

1. thirds

2. halves

3. fourths

4. halves

5. fourths

6. thirds

Name _____

On Your Own

Draw to show equal parts.

7. halves

8. fourths

9. thirds

10. thirds

11. halves

12. fourths

13. halves

14. thirds

15. fourths

16. Does this shape show thirds?
Explain.

Problem Solving • Applications

WRITE

Math

17. Colton and three friends want to share a pizza equally. Draw to show how the pizza should be divided.

18. **Go DEEPER** There are two square pizzas. Each pizza is cut into fourths. How many pieces of pizza are there?

_____ pieces

19. **THINK SMARTER** Fill in the bubble next to the shapes that show thirds. Explain your answer.

TAKE HOME ACTIVITY • Have your child describe how to show equal parts of a shape.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Describe Equal Parts

Essential Question How do you find a half of, a third of, or a fourth of a whole?

Geometry—2.G.3

MATHEMATICAL PRACTICES
MP.4, MP.6

Listen and Draw

Find shapes that show fourths and color them green.
Find shapes that show halves and color them red.

**Math
Talk**

Mathematical Practices

Describe how the thirds in the unshaded shapes compare to each other.

HOME CONNECTION • Your child identified the number of equal parts in shapes to review describing equal parts of a whole.

Model and Draw

These are some ways to show and describe an equal part of a whole.

1 of 4 equal parts is called a **quarter of** that shape.

2 equal parts

A **half of** the shape is green.

3 equal parts

A **third of** the shape is green.

4 equal parts

A **fourth of** the shape is green.

Share and Show

Draw to show thirds.
Color a third of the shape.

1.

2.

3.

Draw to show fourths.
Color a fourth of the shape.

4.

5.

6.

Name _____

On Your Own

Draw to show halves.
Color a half of the shape.

7.

8.

9.

Draw to show thirds.
Color a third of the shape.

10.

11.

12.

Draw to show fourths.
Color a fourth of the shape.

13.

14.

15.

Problem Solving • Applications

16. **THINK SMARTER** Two posters are the same size. A third of one poster is red, and a fourth of the other poster is blue.

Is the red part or the blue part larger?
Draw and write to explain.

17. **THINK SMARTER** Draw to show halves, thirds, and fourths. Color a half, a third, or a fourth of the shape.

TAKE HOME ACTIVITY • Draw a square. Have your child draw to show thirds and color a third of the square.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

PROBLEM SOLVING

Lesson 11.11

Problem Solving • Equal Shares

Essential Question How can drawing a diagram help when solving problems about equal shares?

Geometry—2.G.3

MATHEMATICAL PRACTICES
MP.1, MP.4, MP.6

There are two sandwiches that are the same size. Each sandwich is divided into fourths, but the sandwiches are cut differently. How might the two sandwiches be cut?

What do I need to find?

how the sandwiches

could be cut

What information do I need to use?

There are _____ sandwiches.

Each sandwich is divided

into _____.

Show how to solve the problem.

HOME CONNECTION • Your child drew a diagram to represent and solve a problem about dividing a whole in different ways to show equal shares.

Try Another Problem

Draw to show your answer.

1. Marquis has two square sheets of paper that are the same size. He wants to cut each sheet into halves. What are two different ways he can cut the sheets of paper?

- What do I need to find?
- What information do I need to use?

2. Shanice has two pieces of cloth that are the same size. She needs to divide each piece into thirds. What are two different ways she can divide the pieces of cloth?

**Math
Talk**

Mathematical Practices

In Problem 2, **explain** how a third of the two pieces of cloth are alike and how they are different.

Name _____

Share and Show

Draw to show your answer.

3. Brandon has two pieces of toast that are the same size. What are two different ways he can divide the pieces of toast into halves?

4. Mr. Rivera has two small cakes that are the same size. What are two different ways he can cut the cakes into fourths?

5. **THINK SMARTER** Erin has two ribbons that are the same size. What are two different ways she can divide the ribbons into thirds?

Problem Solving • Applications

Solve. Write or draw to explain.

6. **MATHEMATICAL PRACTICE** **Use Diagrams** David needs to divide two pieces of paper into the same number of equal shares. Look at how the first paper is divided. Show how to divide the second paper a different way.

7. **Go DEEPER** Mrs. Lee cut two sandwiches into halves. How many equal shares does she have?

_____ equal shares

8. **THINK SMARTER** Emma wants to cut a piece of paper into fourths. Fill in the bubble next to all the ways she could cut the paper.

TAKE HOME ACTIVITY • Ask your child to draw two rectangles and show two different ways to divide them into fourths.

FOR MORE PRACTICE:
Standards Practice Book

Name _____

Chapter 11 Review/Test

1. Match the shapes.

2. Do the sentences describe a cube?
Choose Yes or No.

A cube has 4 faces.

☐ Yes

☐ No

A cube has 8 vertices.

☐ Yes

☐ No

A cube has 14 edges.

☐ Yes

☐ No

Each face of a cube is a square.

☐ Yes

☐ No

Rewrite each sentence with a mistake to make
it a true sentence.

3. Draw lines to show thirds.

Explain how you know that the parts are thirds.

4. Will and Ana have gardens that are the same size. They divide their gardens into fourths. What are two different ways they can divide the gardens? Draw to show your answer.

5. Draw to show halves, thirds, and fourths. Color a half, a third, and a fourth.

halves

thirds

fourths

Name _____

6. Max wants to cover the rectangle with blue tiles. Explain how you would estimate the number of blue tiles he would need to cover the rectangle.

7. Jenna built this rectangular prism. Circle the number of unit cubes Jenna used.

8. Rachel makes a pentagon and a quadrilateral with toothpicks. She uses one toothpick for each side of a shape. How many toothpicks does Rachel need?

_____ toothpicks

9. Kevin drew 2 two-dimensional shapes that had 9 angles in all. Draw the shapes Kevin could have drawn.

10. Fill in the bubble next to the shapes that show fourths.

11. Draw each shape where it belongs in the chart.

Mathematical Practices

MP.8	Look for and express regularity in repeated reasoning.	Lessons 1.2, 1.5, 1.6, 2.1, 2.2, 2.4, 2.12, 3.1, 3.2, 3.3, 3.4, 3.5, 3.7, 4.3, 4.6, 4.11, 4.12, 5.1, 5.2, 5.5, 5.8, 6.2, 6.3, 6.4, 6.5, 6.6, 6.8, 6.9, 6.10, 6.11, 6.12, 7.3, 7.4, 7.8, 7.9, 7.10, 8.1, 8.8, 9.1, 11.7, 11.8
-------------	--	--

Domain: Operations and Algebraic Thinking

Represent and solve problems involving addition and subtraction.

2.OA.1	Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	Lessons 3.8, 3.9, 4.9, 4.10, 5.9, 5.10, 5.11
---------------	--	--

Add and subtract within 20

2.OA.2	Fluently add and subtract within 20 using mental strategies. By end of Grade 2, know from memory all sums of two one-digit numbers.	Lessons 3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7
---------------	---	---

Work with equal groups of objects to gain foundations for multiplication.

2.OA.3	Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.	Lessons 1.1, 1.2
2.OA.4	Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.	Lesson 3.11

Standards You Will Learn

Student Edition Lessons

Domain: Number and Operations in Base Ten

Understand place value.

2.NBT.1	Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases:	Lessons 2.2, 2.3, 2.4, 2.5
----------------	---	----------------------------

	a. 100 can be thought of as a bundle of ten tens — called a “hundred.”	Lesson 2.1
--	--	------------

	b. The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).	Lesson 2.1
--	---	------------

2.NBT.2	Count within 1000; skip-count by 2s, 5s, 10s, and 100s.	Lessons 1.8, 1.9, 3.10
----------------	---	------------------------

2.NBT.3	Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	Lessons 1.3, 1.4, 1.5, 1.6, 1.7, 2.6, 2.7, 2.8
----------------	--	--

2.NBT.4	Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons.	Lessons 2.11, 2.12
----------------	---	--------------------

Use place value understanding and properties of operations to add and subtract.

2.NBT.5	Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.	Lessons 4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 5.7, 5.8
----------------	---	--

2.NBT.6	Add up to four two-digit numbers using strategies based on place value and properties of operations.	Lessons 4.11, 4.12
----------------	--	--------------------

Standards You Will Learn

Student Edition Lessons

Domain: Number and Operations in Base Ten

Use place value understanding and properties of operations to add and subtract.

2.NBT.7	Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	Lessons 6.1, 6.2, 6.3, 6.4, 6.5, 6.7, 6.8, 6.9, 6.10, 6.11
2.NBT.7.1	Use estimation strategies to make reasonable estimates in problem solving.	Lessons 6.6, 6.12
2.NBT.8	Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900.	Lessons 2.9, 2.10
2.NBT.9	Explain why addition and subtraction strategies work, using place value and the properties of operations.	Lesson 6.9

Domain: Measurement and Data

Measure and estimate lengths in standard units.

2.MD.1	Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	Lessons 8.1, 8.2, 8.4, 8.8, 9.1, 9.3
2.MD.2	Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.	Lessons 8.6, 9.5

Standards You Will Learn

Student Edition Lessons

Domain: Measurement and Data

Measure and estimate lengths in standard units.

2.MD.3	Estimate lengths using units of inches, feet, centimeters, and meters.	Lessons 8.3, 8.7, 9.2, 9.6
2.MD.4	Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.	Lesson 9.7

Relate addition and subtraction to length.

2.MD.5	Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.	Lessons 8.5, 9.4
2.MD.6	Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole-number sums and differences within 100 on a number line diagram.	Lessons 8.5, 9.4

Work with time and money.

2.MD.7	Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m. Know relationships of time (e.g., minutes in an hour, days in a month, weeks in a year).	Lessons 7.8, 7.9, 7.10, 7.11, 7.12
2.MD.8	Solve word problems involving combinations of dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. <i>Example: If you have 2 dimes and 3 pennies, how many cents do you have?</i>	Lessons 7.1, 7.2, 7.3, 7.4, 7.5, 7.6, 7.7

Standards You Will Learn

Student Edition Lessons

Domain: Measurement and Data

Represent and interpret data.

2.MD.9	Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.	Lesson 8.9
2.MD.10	Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	Lessons 10.1, 10.2, 10.3, 10.4, 10.5, 10.6

Domain: Geometry

Reason with shapes and their attributes.

2.G.1	Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	Lessons 11.1, 11.2, 11.3, 11.4, 11.5, 11.6
2.G.2	Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.	Lesson 11.7
2.G.3	Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words <i>halves</i> , <i>thirds</i> , <i>half of</i> , <i>a third of</i> , etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	Lessons 11.8, 11.9, 11.10, 11.11

inverse relationship between size of units and number of units needed to measure, 421–424, 461–464

in meters, 461–464, 465–468

Line plots, 433–436

Listen and Draw

Listen and Draw appears in most Student Edition lessons. Some examples are: 21, 37, 281, 297, 493, 553

Math Story, 109–116, 333–339, 509–516

Look for Structure, 40, 135, 532

M

Make a Graph strategy, 501–504

Make a Model strategy, 97–100, 305–308

Make Arguments, 15, 87, 315

Make Connections, 28, 36, 139, 160, 180, 268, 352, 376, 524, 528, 544, 552

Make Sense of Problems, 24, 184, 188, 192, 208, 212, 308, 312, 360, 372

Manipulatives and Materials

base-ten blocks, 25, 33, 65–68, 97–100, 173, 185, 189, 241, 289, 293, 305–308, 309

centimeter rulers, 453–456, 462–464, 469–472

color tiles, 401–403, 406, 545–547

connecting cubes, 13–14, 17, 481, 489

counters (two-color), 157–160, 161

inch rulers, 414–416, 422–424, 425–428, 430–431, 433–436

measuring tape, 430–432

pattern blocks, 541, 549

play money 345, 349, 353, 357–360, 361–363

unit cubes 445–448, 453

yardstick, 430–431

Math on the Spot, 16, 19, 23, 27, 31, 35, 39, 47, 59, 63, 71, 88, 91, 104, 123, 124, 127, 131, 136, 140, 143, 147, 151, 155, 159, 164, 175, 179, 183, 187, 188, 191, 195, 199, 203, 207, 211, 215, 219, 231, 235, 240, 244, 247, 251, 255, 259, 263, 267, 272, 283, 287, 291, 296, 299, 303, 307, 311, 316, 319, 323, 324, 327, 347, 348, 351, 359, 363, 367, 371, 375, 380, 384, 387, 391, 404, 408, 411, 416, 419, 424, 428, 432, 436, 448, 452, 456, 459, 464, 468, 471, 472, 484, 487, 491, 495, 499, 503, 504, 523, 527, 531, 536, 539, 543, 547, 551, 552, 556, 560, 563

Mathematical Practices

MP.1 Make sense of problems and persevere in solving them 37, 141, 149, 153, 157, 197, 205, 209, 261, 265, 269, 305, 369, 417, 457, 481, 485, 489, 493, 501, 561

MP.2 Reason abstractly and quantitatively 97, 137, 153, 205, 209, 261, 265, 269, 389, 417, 457, 469, 485, 493

MP.3 Construct viable arguments and critique the reasoning of others 13, 85, 193, 197, 245, 265, 497, 501

MP.4 Model with mathematics 25, 37, 65, 97, 149, 153, 161, 173, 177, 189, 205, 209, 241, 261, 265, 269, 305, 353, 357, 361, 365, 369, 417, 433, 457, 469, 481, 489, 497, 501, 525, 529, 533, 537, 541, 557, 561

MP.5 Use appropriate tools strategically 13, 145, 157, 185, 229, 233, 237, 257, 281, 401, 405, 413, 421, 429, 433, 445, 453, 461, 525, 545, 553

MP.6 Attend to precision 21, 29, 33, 41, 45, 57, 73, 85, 101, 133, 161, 173, 177, 181, 193, 201, 213, 217, 245, 253, 281, 285, 289, 293, 297, 309, 313, 317, 321, 345, 349, 373, 379, 381, 385, 389, 401, 405, 409, 413, 421, 425, 433, 445, 449, 453, 461, 465, 482, 485, 489, 493, 497, 521, 525, 529, 537, 541, 549, 553, 557, 561

MP.7 Look for and make use of structure 3, 17, 21, 33, 37, 41, 45, 57, 61, 65, 69, 73, 77, 81, 85, 89, 93, 121, 125, 129, 137, 157, 185, 189, 197, 201, 237, 241, 249, 253, 345, 349, 361, 365, 369, 385, 389, 409, 421, 425, 449, 461, 465, 533, 537

MP.8 Look for and express regularity in repeated reasoning 17, 29, 33, 57, 61, 69, 101, 121, 125, 129, 133, 137, 145, 181, 193, 213, 217, 229, 233, 245, 257, 285, 289, 293, 297, 301, 309, 313, 317, 321, 325, 353, 357, 373, 377, 381, 401, 429, 445, 545, 549

Math Story, 109–116, 333–339, 509–516

Math Talk

Math Talk appears in every Student Edition lesson. Some examples are: 13, 121, 245, 409, 485, 541

Measurement. See Length

Meters, 461–464, 465–468

Mid-Chapter Checkpoint, 32, 84, 144, 200, 252, 300, 364, 420, 460, 492, 548

Midnight, 386

Minutes, 374–376, 377–380, 381–384

Model and Draw

Model and Draw appears in most Student Edition lessons. Some examples are: 14, 122, 246, 402, 486, 542

Money

in addition, 185–188, 189–192,
193–196, 197–199, 202–204,
213–216, 217–220, 289–292,
293–296, 297–299
in subtraction, 237–240, 241–244,
245–248, 249–251, 253–256,
309–312, 313–316, 317–320,
321–324

Shapes

three-dimensional
attributes of, 525–528
identify and describe, 521–524

two-dimensional
angles in, 537–540, 542–544
attributes of, 533–536, 537–540,
541–544
identify and describe, 533–536
partitioned into equal parts,
549–552, 553–556, 557–560,
561–564

Share and Show

Share and Show appears in every
Student Edition lesson. Some
examples are: 14, 126, 238, 402,
482, 542

Show What You Know, 10, 54, 118, 170,
226, 278, 342, 398, 442, 478, 518

Sides, 533–536, 637–540, 541–544

Skip counting. See Counting

Spheres, 521–525, 525, 529

Squares, 525–528, 533–536, 541–544

Subtraction

basic facts, 137–140, 141–143,
145–148, 149–152, 153–156
break apart strategy, 229–232,
233–236
estimation in, 325–328
relate to addition, 137–140, 257–260
represented with bar models,
137–138, 149–152, 153, 261–264,
269–272
three-digit numbers, 305–308,
309–312, 313–316, 317–320,
321–324
regrouping once, 309–312, 313–316,
317–320
regrouping twice, 317–320
regrouping with zeros, 321–324
two-digit numbers, 229–232, 233–236,
237–240, 241–244, 245–248,
249–251, 253–256, 257–260,
261–264, 265–268, 269–272
using models and quick pictures,
237–240, 241–244, 245, 305–308,
309, 313, 317
using number lines, 145–148, 230–232,
233–236, 257–260
write equations to represent
problems, 149–152, 153–156, 257,
261–264, 265–268

See *also* Problem Solving; Problem Types, for word problems

Surveys, 481–484

Take Home Activity, 16, 20, 24, 28, 31, 36, 40, 44, 48, 60, 64, 68, 72, 76, 80, 83, 88, 92, 96, 100, 104, 124, 128, 132, 136, 140, 143, 148, 152, 156, 160, 164, 176, 180, 184, 188, 192, 196, 199, 204, 208, 212, 216, 220, 232, 236, 240, 244, 248, 251, 256, 260, 264, 268, 272, 284, 288, 292, 296, 299, 304, 308, 312, 316, 320, 324, 328, 348, 352, 356, 360, 363, 368, 372, 376, 380, 384, 388, 392, 404, 408, 412, 416, 424, 428, 432, 436, 448, 452, 456, 464, 468, 472, 484, 488, 491, 496, 500, 504, 524, 528, 532, 536, 540, 544, 547, 552, 556, 560, 564
